Android chat app

Slowly but surely, the world is moving away from SMS and MMS as the default way for people's text messages. It started years ago with apps like AOL Instant Messenger and has evolved into a lot of options that all work really well. Evolution has certainly swung him over the last few years. Now you have more options than you'll ever need. The best messenger program, however, is one that you can convince all your friends and family to use them. Chances are you'll end up with more than one of these. Which messenger apps are best? In this list we will explore the best messenger applications and chat apps for Android.

Band**Discord****Facebook Messenger** (and **Messenger Lite**)**Kik****Slack****Skype****Snapchat****Telegram****Viber** **Messenger****KajsApp****Band****Price:** Free with in-app purchases**Band** is an up-and-coming app for chat for groups. You can create all the groups you want and invite all the people you want. Developers recommend this app to people in sports teams, school groups, playing clans, workgroups and all the like. Everyone joins in, chats and has a nice party. You can organize groups into different channels similar to apps like Discord and Slack. You can also send messages directly to individuals and add calendar events for your group activities. It worked well in our tests and is free to use. **Discord****Price:** Free/\$9.99 per month/\$99.99 per year**Sache** is easily among the best messenger apps for players. It has multi-platform support among most mobile phones and computer operating systems. There is also an online client for these platforms without native applications. The app also has voice chat, more text chats, gif support and more. People on the service can create their own servers or join others as they need them. Mostly for gambling. However, some people use it only for their fantastic organizational system and above-average voice chat capabilities. The service is free for everyone. However, you can unlock some cosmetic accessories with a discord Nitro subscription. **Facebook Messenger (Lite)****Price:** Free**Facebook Messenger** is among the most popular messenger applications. Facebook has two chat apps for this. Common includes all features, such as chat headers, stickers, and other features. Version Lite is just a basic chat app with much less frills. Those who invest heavily in the Facebook Messenger experience may want a regular app. However, those who do not wish to deal with Facebook's nonsense should use the Lite version. Facebook eventually introduces ads to these chat apps. However, they are free to use. Facebook had some security problems in early 2018. We cannot imagine that this would make the social network irrelevant. A lot of people still uses **Facebook.Kik****Price:** Free with purchases in the Kik app is another popular messenger app. This lets you choose a screen name instead of your real name or phone It gives her a very old school feel. The app is especially popular with casual mobile players and people who like random chatting mostly. The app also includes stickers, emoji, group chats, video chats, themes and Material Design. In-app purchases give you extra stickers and other things like that. Another good chat app in this genre is **GroupMe**. It has many of the same functions and caterers for the same kind of people. **Slack****Price:** Free/\$6.67-\$12.50 per user (for business use only)**Slack** is one of the better chat apps for business. It has an extremely clean and professional look and feel. Groups can create channels, make voice calls, and more. The app also has support for third-party apps such as Giphy, Google Drive, Asana and other fun or productive tools. Users can also join multiple slack servers. It's a more professional version of The Divergence. Like **Discord**, it's also completely free without in-app purchases. Those with larger teams who need more features can pay an optional subscription for extra things. **Skype****Price:** Free with purchases in Skype apps is one of the most recognizable messenger applications ever. Everyone knows what Skype is and what it is. Text chat, video call, and voice call can call other members. You can even call people on the right phone number with a nominal commission. The app includes some additional features that may or may not be useful. Depends on what you need. Nevertheless, this has excellent cross-platform support, multi-chat support, and support for most file types, including documents, GIFs, and other things. This is a rock solid option and there is a Lite version if you like Skype but do not need any features. **Snapchat****Price:** Free**Snapchat** is one of the more unique messenger apps. It supports a number of things, including voice calls, video messages, photo messages and text messages. Deletes messages after viewing the service. That means there's no history of what we're talking about outside the low counter. There are also Snapchat Stories. This allows people to send the proverbial status updates that all their followers can view. Expire in 24 hours. Many app features mimic other apps (mainly Instagram). However, Snapchat is still quite popular among younger people and it's definitely something different. **Telegram** or **Signal Private Messenger****Price:** Free**Telegram** is one of the most popular messenger privacy apps. It boasts 256-bit symmetrical AES encryption, 2048-bit RSA encryption and more. It is one of the safest messaging services. The app also has file sharing, multi-platform support, group chats, gif support, and more. It grew in popularity very quickly. That was initially a poor judgment. However, tone of people service now. **Signal Private Messenger** is another decent application in this space. Security and privacy are primarily However, each user base of each application has many different ideas about which one is better. Both are sending messages, and both are good enough to be here compared to competitors like LINE or unencrypted chat rooms. **Viber** **Messenger****Price:** Free with purchases in vber apps in some parts of the world is not great. But it's one of the most popular messenger apps ever. It boasts a full experience including messages, calls, self-destructing chat, group chats, video messages, video chats, and more. It also includes some add-ons such as stickers, world news and more. Most label packages cost extra, so in-app purchases. It's actually a fairly well-rounded chat experience. However, it is slightly heavier than most chat apps. Those who want cleaner, more minimal experiences may want to avoid this one. Moreover, he sees most of his popularity from outside the US. It's no big deal, it's just your head up. **WhatsApp****Price:** Free**Everybody** knows WhatsApp. After all, it's the most popular messenger app in the world. It has a tone of features, gets frequent updates and competes positively with basically every other chat app. Includes voice and video chats, text messages, group chats, support for most multimedia formats such as GIFs, video, etc. It is strong, accessible and popular. This is a sacred triumvirate for chat apps. It is also free without in-app purchases. If we missed any great messenger apps for Android, let us know about them in the comments! You can also click here to check out our latest Android apps and game lists! The video call is as easy as it can get these days. You can do this on computers, mobile devices, and even tablets. It is popular and widespread enough that you even have options. There are many options for those looking for video chat with friends or family. Or even strangers, if you like. Here are the best video chat apps for Android! **Facebook Messenger****Discord****Google Duo****JusTalk****Kik****Price:** Free**Facebook Messenger** is one of the most popular messaging apps on the planet. We know that many people don't like the app. We agree that he still needs a lot of work. However, there are so many people who use Facebook that Facebook Messenger just makes sense. The video chat experience works relatively well. Since most people you know are on Facebook, it's easier to use this app than to convince everyone to join the new platform. Besides, the new ads that are being squirming aren't great. It's not perfect, but it's perhaps the most convenient of the video chat apps in this list. At least it's free. **Discord****Price:** For free with in-app purchases, **Discount** is one of the most popular group chat apps out there. It is mainly made for You can turn the server and chat with as minded folks about about all the topics you might think of. The application is mostly group chats, DMs, and voice chats for players. However, there is a video chat feature if you need it. Of course, you both have to use Discord to make it work, but otherwise everything went well in our testing. **Google Duo****Price:** Free**Google Duo** is basically Google's answer to FaceTime. It's also one of the most simple video chat apps available. Simply log in, check the number and you can go. You can call other Google Duo users as if you're on a normal phone call. It also includes a feature called Knock Knock, which allows you to see what someone is doing before answering a video call. The application is a cross platform. This means it works between iOS and Android. It is said that in the end comes the online version for computer support. It's about as easy as it gets for video calling apps. It's really, really good. In-app purchases are for things like emotions and stickers. **JusTalk****Price:** For free with purchases in Apps**JusTalk** is another lesser-known video chat app. But it's actually pretty decent. You'll be able to do the app the way you want. In addition, you can do things like doodle while in a video call to add a little fun in the process. It also includes group chats, encryption, and cross-platform support. It's a decent alternative to something like Google Duo, where video calls are the primary feature. However, we don't see that it would be too favorable with the chat app, which also has video chat features. The app is free to download and use. In-app purchases are for things like themes and other customizations. They do not affect functionality. **Kik****Price:** Free**Kik** is a popular video chat app. It's actually a text chat app with video chat features. The app has single or group chats, support for most types of media sharing (GIF, video, pictures, etc.) and a few additional things like stickers. Kik is a popular mobile chat service. For example, in the past I used it to fight clans. It also does not rely on your phone number. You only need a standard username to use much like Skype and unlike WhatsApp or Google Duo. It's colourful, so those who want something more serious may have to keep looking. Otherwise, Kik is a perfectly acceptable app for both video and text chat. **Signal Private Messenger****Price:** Free**Signal Private Messenger** is one of the most popular apps for chatting with privacy. It has end-to-end encryption for all messages, voice calls and video chats between two signal users. He focuses a lot on individual chats. There are group chat features, but it's mostly for personal use. This is one of the biggest differences between it and a competitive chat app It's a telegram. Video calls worked fine with our tests, so we don't have a problem with the recommendation. It's a good way to get some encrypted chats as well. The app is also completely free and open source. **Yhu Yhu** it really goes wrong with it, but there are better video chat apps if you need group video chats. **Skype****Price:** Free with in-app purchases**Skype** is one of the most popular video chat apps for any platform. It has native applications on most platforms, including a computer, which makes it one of the best cross-platform options out there. The Android app is definitely not perfect, but it can usually do the job. You can make group video calls with up to 25 people. The app also has free text chat, Microsoft and Facebook account integration, and you can even call regular mobile phones for a nominal fee. The app still needs work, but it's definitely better than it was a year or two ago. Cross-platform support is cutting edge. **Viber** **Messenger****Price:** Free with purchases in the Vber app, he started life as a voice calling app. You used to be able to call people at the service along with regular phone calls. Since then, it has evolved into an adult messaging service. You can still make the phone call as you can before (for an extra charge). You can also sms chat, video call and more. It also has voice, text, and video call encryption among Viber users. There are some additional fun features like hidden chats as well. It's a little heavier, similar to Facebook Messenger. Besides, it's not bad. The app is not very popular in the US, but it is quite large internationally. In-app purchases are for things like stickers and other customization items. **WhatsApp****Price:** Free**WhatsApp** is one of the most popular messaging apps ever. It is one of the few that can boast more than a billion active users. It started as a chat sms service before Facebook bought them some time ago. Since then, the app has had integrated voice calling, video calling and tone of other features. The video call works quite well and you should not have problems using it. Not everyone trusts the app because it's run by Facebook. But if you're looking for something that works and is stable, it's a good app you can try. Carrier and OME video chatting**Price:** Free (usually)As it turns out, OEMs and promoters have taken matters into their own hands for video chat. Some carriers, including Verizon, T-Mobile and others, have a built-in video call to each phone sold by the carrier. You can chat quickly and easily with anyone else on the service. So someone with a Galaxy S7 on T-Mobile and someone with an LG V20 on T-Mobile video can call each other directly from the calling app as you phoned. They're a little restrictive, but they work pretty well when you can actually use them. We hope that these possibilities will expand over time. Bonus: Company-level video chat apps**Pricena:** Free / VariesA lot of video chat apps business level. They work differently than things at the consumer level. For example, a greater emphasis is placed on file sharing, participation, and conference tools compared to something like Skype, WhatsApp, or Google Duo. Google Hangouts is slowly coming to this genre. Some other good options are Zoom, Cisco Webex Meetings, GoToMeeting and some others. Prices vary, but the software generally works fine. However, we only recommend them for business use. Our list of the best video conferencing apps can be found at the button above! Check out our best choice here! If we missed any of the best video chat apps for Android, let us know about them in the comments! Thanks for reading! Reading!
