By closing this banner, scrolling this page, clicking on a link or continuing to browse anything else, you agree to the use of cookies. This indoor-mounted timer is so easy to use that you can forget about the instructions. The intuitive zone-by-zone planning allows you to set irrigation times differently for each area of the yard, giving greener results with less water. By turning the wheel to each zone, you can easily set custom days of the week, odd or even days, or a cycle number on days regardless of all other zones. You can also set up to four different custom irrigation times of the day to water slopes and clay soil in short intervals to allow water to soak in and avoid runoff. The settings for each zone can be reviewed quickly with easy-to-read LED indicator lights. Light.
