Summoners war magic shop guide

Guide by: elsilver. Click here to go to the original source on Reddit. After seeing so many people complain about not pulling nat 5 in x amount of time, do they think that a week or months is the minimum requirement to get one? This only makes sense from the number of calls you make... 10 months with 1 premium package per month is definitely not the same as 10 months with 15 contributions per month for example... So here's what you need to do to increase your chances of max (for F2P players) get a Nat5. Assumptions Introduction When you're leveling 6 stars, what are you doing? You open 2x and forget about everything else and just grind and refresh.. great When you're looking for a run, what are you doing? Just grind drags/giants for days/weeks trying to find the perfect subs, or until you give up.. Right? When you're in the rush hour arena, what are you doing? Just refresh your wings (if you're looking for the highest rank possible) and make the arena forgetting everything else. I mean, you focus on one thing at a time.. So let's focus on strictly getting NAT5 What we won't do to nat 5 stars take care of the arena higher than the conqueror make up the wings, Ever Farm a monthly weekend of secret dungeon farm hall heroes (only get 1 to collect if we don't have) Level each monster spend any mana on runes (only 3 per day on mission) Buy pieces ifrit Buy weekly angelmon What we'll do to get Nat 5 stars if you can make dragons, you can only make dragons, this is the best mana source in the game, otherwise the giants (of course keep good runes). Try not to replenish much here, but not replenish energy. Kill all our rivals in the arena Always use our arena wings (but never replenish) 3 daily dimensional slots For TOA Why will we do it all? For the following reason: Buy 3 elemental scrolls + mystical scroll per week with Glory Points (And devilmon if you can afford) Buy 3 Elemental Scrolls + Mystical Scroll weekly from Guild Points (and legendary piece, if you can afford) Save as much mana (300k per day if you're doing only dragons is realistic) on Sunday night, you should have 2m mana if you follow the above shop to make up until you buy 14-15 scrolls depending on the price. In this way, you will receive every week about 20 scrolls (plus any random drops from dragons / giants, but don't include that) You'll be able to do it with weekly crystals from arena rivals, at least a winner of 1, and mothly toa crystals (assuming 1k Crystals a month combined) Total monster calls 20 weekly scrolls = 80 month 6 per month with TOA (reaching 80 normal 50 hard) could be more if you have L&A; D and the legendary scroll with clearing 3? From monthly login rewards. Total = 90 + any that Com2Us gives from any event Hold these scrolls until you have them all and do them on a monthly rune removal so you can run whatever you pull on the same day, and also because you'll be more excited about opening 100+ instead of 1 at a time. As you can see, this is very achievable. By comparison, the \$100 package includes 3k crystals and 1 legendary crystal, which is equal to 45 calls. So you will get the equivalent of nearly \$200 a call per month. Repeat this for 3 months and i hope that from 300 calls you will get something that will improve your gaming experience. I bet if you count now what you do (F2P) that you are not doing more than maybe 20 -25 per month if you do not purchase premium packages.. it does this within 3 months more than the number of calls you would make in the whole year following this formula. TL;DR Forget everything else in the game, buy weekly guild point scrolls, buy weekly glory coils, don't buy premium packs, just buy giants/dragons, refresh your shop. Earn 2 million mana per week. Get 90 to 100 scrolls per month of F2P. Repeat. 5 starguidemonsterssummoners war The most prized items in the magic shop are mystical scrolls. These are quite rare and the quality of store items will increase with your level. Sometimes you'll also be lucky enough to see some good runes in the store that are worth the money. There are also some monsters worth buying, such as: Ramagos, wind warbear, which is a good monster Shannon, a pixie wind who is also a very good monster Coleen, a fire harp who is also a good fire imp monster (Cogma), which is a fusion material wind harp (Seal), which is also a fusion material recently patch also added legendary pieces and light and dark pieces. Don't recommend using mana on it at first because you need a lot of pieces before about the coil. Chloe's Magic Shop is now open! Collect magic points and exchange for various gifts in the Magic Shop! ■ Event: February 25, 18:00 PST – March 11, 7:59AM PDT Prizes available until March 12, 7:59AM PDT Collect and redeem points for various rewards during the event!
