## Adventures in babysitting disney full movie online free

If you've exhausted all your at-home date options, then it's official time to plan an adventurous date inspired by your favorite movies. Because even though social distancing is still important, you can still have fun. Here a few ideas that will help you break from routine. Source: Thinkstock You probably already know that DVDs and Blu-ray discs are slowly but surely going the way of the VHS tape as people increasingly switch to online services to buy, rent and watch movies. While some may mourn the loss of the tangible in our everyday lives, online-based movie-watching eliminates problems with losing or damaging fragile discs and makes movies available on a variety of platforms so you can watch movies you own anywhere, anytime, without having to remember to grab your DVDs. Of course illegal download and streaming is very popular, but it deprives the many people who worked to make a movie of the compensation they deserve for their blood, sweat and tears. Plus the available options can often be low quality and you risk infecting your computer or mobile device with a virus if you don't know what you're doing. Here's a guide to the variety of legal ways to watch movies online for those familiar with the process who yearn to break free from scratched-DVD hell. Yes, it will cost you a little bit of money, but there are many advantages over both traditional DVDs and illegal downloading. Streaming services There are a wide range of options for viewing content online. One of the more popular methods is to use an online streaming service like Netflix, Hulu Plus, or Amazon's Prime Instant Video. These services charge either a monthly or annual fee and give you access to tons of content, although there's always a chance that a particular movie you're looking for won't be on whatever streaming service you have. The content these services have access to always changes when they make new offers, so you don't have the same options month after month. The aforementioned services are also great for TV watching and are starting to make their own original shows to compete in the TV market. Many of these shows, like Netflix's House of Cards and Orange is the New Black, have received glowing reviews. There are some limited options for streaming online that are both legal and free. Crackle is a website that offers movies and TV shows to stream for free, but it's ad-supported and you'll end up watching about as many commercials as you'd watch programming on cable. The amount of content Crackle offers are also slimmer pickings than subscription services, as the site doesn't have the financial muscle to make huge content purchases like the larger sites, so it can be harder to find your favorite movies. The downside of an online streaming service is that you are at the mercy of the content the company available to offer; You can't just choose a movie under the sun and be guaranteed to be able to watch it. You don't own the movies either, so if Netflix gets rid of your favorite movie, you won't be able to watch it. Downloading One way to own movies and watch them online is to download them. Whether you're a Google or Apple fan, both iTunes and the Google Play Store offer movies that you can buy through the accounts that become yours. New releases cost about \$20; about the same price a DVD would cost even if a digital copy cannot be lost or damaged. Of course, buying individual titles to own is more expensive than paying the small fee for a

streaming service and accessing oodles of content. Both iTunes and Google Play also offer movies for rent at a lower price. Rent allows you to watch the movie once in a 30-day period and 24 hours to finish it once you clicked play. These options are also great for switching between devices, as iTunes and Google Play will remember where you are in a movie if you get disconnected and want to switch from your TV to your tablet or smartphone. Amazon offers movies to buy or rent at similar price points like Apple and Google, and you don't need a Prime membership to access this service. Whether you prefer to own or stream movies, watching movies online is if you're tired of handling DVDs and Blu-ray discs. There are plenty of secure, legal options that don't cost too much and allow you to look at all your devices at your convenience. Check out the Entertainment Cheat Sheet on Facebook! More from the Entertainment Cheat Sheet: We're all firmly inside - or at least we should be - in search of entertainment as we continue to socially distance ourselves. Sure, you can binge watch a show or take one deep on YouTube. But there's something about watching a classic that warms the heart, and it's something we could all use at the moment. And who makes classics better than Disney? With Disney's streaming service, Disney+, up and running, suddenly there's a big catalog of Disney movies in one place. We've done the heavy lifting and rounded up the 13 best Disney movies available right now. A caveat: With Disney owning so many different properties these days, we've had to narrow our focus to exclude devices like the Star Wars and Marvel franchises. Sorry to all the Wookies and Asgardians out there. Pinocchio (1940) You have to start with the classics. The story of a wooden doll on a journey to become a real boy, the story of Pinocchio really stands the test of time. It's an exciting adventure, though having revisited it as an adult makes you realize that it gets pretty damn real in a second there. If you can't remember - and don't worry, we also not in the first place - part of this film takes place an amusement park where bad behavior causes boys to turn into donkeys. Yes, it's going to be bleak for a minute. We don't want to ruin the 80-year-old movie for you, but believe us, it's going to get better. Now watch The Lion King (1994) Disney had been incorporating tear-jerking scenes at the beginning of movies long before 1994, but it's hard to find a more emotional moment near a film's debut than in The Lion King. You know the one we're talking about. The good news is that you are able to gather yourself just in time for a wonderful coming-of-age story filled with lovable, quotable characters and more than one song that will be stuck in your head for the next week. Now watch Snow White and the Seven Dwarfs (1937) Try not to get stuck on the optics here. By 2020, a man kissing a sleeping woman is admittedly not the best look. Just try and remember that this is an 83-year-old movie, enjoy the funny antics of the Seven Dwarfs, and wonder what was the first Disney feature film ever. It's great in itself, and paved the way for the many Disney flicks that came after it. Now watch Moana (2016) It may be one of the newer movies on this list, but Moana has all the traits for a successful Disney movie. There is a solid story, characters that you can easily invest in, humor throughout, and powerful meaning embedded in the image itself. Plus, watching Dwayne Johnson sing one of the movie's hit songs in real life almost never gets old. Now look at Aladdin (1992) If you're like us, this just reminds you how much we all miss Robin Williams. Sure, at its core, Aladdin is an incredible story of forbidden love and what this love will lead you to overcome. But has there been a more amusing animated character in Disney history than Williams' Genie? There's probably an argument to make somewhere, but the big blue wish-granter definitely stole the show. Now look at The Little Mermaid (1989) Before Frozen came, The Little Mermaid may have played the catchy Disney song. Do you know how we know? We don't even have to mention it, and you already sing in your head. That's not to mention this movie had a final-boss-level villain in Ursula who managed to make you love to cheer on her. Now Watch Frozen (2013) Speaking of Frozen, it was only a matter of time before this blockbuster appeared on the list. It sure seemed not so long ago that the world was caught in a frozen frenzy, and the song that appeared literally everywhere. Now that Disney has brought Frozen II to its platform early, you can get lost in this animated world long enough to take your mind off the real. Now watch Bambi (1942) The original painful moment in animated cinema? We think so. Disney's fifth animated feature film hit us with a real gut punch, then whisked us along for a compelling story about an orphan So compelling, in fact, that nearly 80 years after its release, Disney is rumored to be developing a live-action version of the timeless classic. Now Watch Find Nemo (2003) Can you name a better pairing of animated character and voice actor than Dory the Forgetful Fish and Ellen DeGeneres? Neither can we. With Dory serving up the right comedy at the right time, Finding Nemo brings us on an extraordinary adventure by a father swimming across the ocean in search of his son. If you're in the mood for a solid sequel, Finding Dory is streaming on Disney+, too. Now Watch Toy Story (1995) Probably the most quotable animated Disney film, Toy Story helped a new generation of kids imagine what their toys are doing in their spare time. As it turns out, they do quite a bit. Like, four surprisingly solid movies worth of stuff in their spare time. All four Toy Story movies can be streamed on Disney+ in its own time. Now look Coco (2017) Coco was a huge hit in 2017, and if you missed then, it's just as good three years later. It's a story about a boy chasing his passion and searching for answers, told in an incredibly unique way and filled with emotion. It delves into legacy not often represented in Disney movies, and resonates with viewers young and old. Now Watch Up (2009) We mentioned one of the more classic emotional moments in Disney movies. Now, Up brings us one of the more modern examples of Disney breaking our hearts before slowly repairing it in a feature-length film. Plus, it has one of the weirder duos in a Disney movie in recent times. And it seems so, as flawlessly as we follow the story of a grumpy old man and a boy scout. Now watch Pirates of the Caribbean (2003) It sticks out as the only non-animated film on the list, at least so far. But for good reason. What Disney was able to do with the original Pirates of the Caribbean - transforming an amusement park ride into an intriguing universe set on the high seas, starring Johnny Depp in what is likely the defining role of his career - was nothing short of spectacular. That's also why we're getting a Jungle Cruise movie with The Rock and Emily Blunt. Let's just not discuss the rest of pirates movies. See editors' recommendations now
