Whitney had left the set to have some rest, so Kevin Costner decided to shoot the picture with her double. He only told her to keep her face hidden, so he could show the fear that the character was going through. Costner himself chose the definitive photo that was later used in the poster of the film. Co-star Kevin Costner, then one of the most bankable male leads in Hollywood, stopped production for over two years in order to convince her to star as superstar Rachel Marron in the romantic drama. (In fact, the script was originally written for Diana Ross and Steve McQueen back in the mid-1970s.) The 1992 film marked Houston's screen debut, and she was nervous. I thought, 'I'll just take this little place somewhere, and I'll work my way up,' she told Rolling Stone in 1993. And all of a sudden I get this script, and I said, I don't know. That's kind of... That's how I was scared. It didn't have to be. The film was a blockbuster success, pumping \$411 million worldwide on a budget of \$25 million, the second highest-rated film of 1992. And that doesn't even count the overwhelming success of the soundtrack, which remains one of the most popular movie albums of all time. The cover of Dolly Parton's I Will Always Love You dominated the No 1 spot for 14 consecutive weeks, and the soundtrack won the Grammy Award for Album of the Year. In hindsight, it's almost hilarious to imagine Houston taking a small part of nothing. By the time she was cast in The Bodyguard, she was already a superstar with three hit albums, Whitney Houston (1985), Whitney (1987), and I'm Your Baby Tonight (1990), and two Grammys. But beyond fame, her mere presence as a performer is so magnetic, so charismatic, that she would automatically steal the show in everything she did. In fact, without Houston, the Musketeer would surely have been forgotten. (No offense to Costner, but that grit-your-teeth as you grumble masculinity endearments can remain constant in the 90s.) Direction Jackson from a screenplay by Lawrence Kasdan, the plot is pretty simple: Frank Farmer (Costner), a former secret service agent with a chip on his shoulder, is reluctantly hired to protect Rachel Marron (Houston), a mega-star singer and Oscar-nominated actor plagued with death threats from a murderous stalker. Stalker. he hesitates on his advice, sees her stubbornness, and of course they fall in love. In many ways, she's the anti-A star born: Instead of a woman who was distracted from obscurity by a much more famous man, Rachel - and by extension Houston - is the undeniable center of attention in every scene she's in. The Bodyguard was the perfect vehicle for her star appeal. Rachel's success reflected hers, often in disturbing ways. Houston admitted in the aftermath of the film that she, too, had received death threats, and of course, the narrative of a star battling the terrible and harmful consequences of fame would later become an indelible part of her tragic story. Filming was packed for the star, who told Barbra Walters she miscarried her first pregnancy because of the stress of production. But while there are a million ways to tie Houston's eventual downfall to the film, that's not what this particular piece is about. No, as we prepare for a rewatch of The Bodyguard for R29 Movie Club, it's time to celebrate what makes the movie a cult classic. The bodyguard was an undeniable cultural milestone, not only for Houston's career, but also more generally as a Hollywood phenomenon. Critics may have panned the film, but no one lost the importance of an interracial on-screen romance - and more importantly, one that wasn't the film's central clash - between two of the world's most A-list stars. The film is about a relationship between two people, and it would be a failure if it became a film about interracial relationships. Costner told Ebony in 1993. Some of my choices are very simple, and it's very easy to fall in love with Whitney. Well, about this romance... say what you will about the so-so chemistry and the sometimes absurdly clunky dialogue, but the bodyguard is a blast. His melodramatic plot points and cheesy encounters, lambasted by critics, are the very qualities that now make it both memorable and rewatchable. The way Frank literally runs after a threatening car! The fact that he takes Rachel on a date features not only Akira Kurosawa's Yojimbo (which translates from Japanese, literally means bodyguard), but also swings to country music at his favorite dive bar. The dramatic finale of the Oscars! And let's not forget the costumes: From Rachel's glorious suit of armor - complete with a headdress - during the Queen of the Night's Club performance, to Frank's enviable knitted cabin core, it covers a whole range of fantasy attire. Again, that doesn't mean there's no real feeling here. You want to shed every tear you have left? Play Jesus loves me, the Gospel duet between Rachel and her jealous sister Nikki (Michele Lamar Richards), and just listen. Less obvious than I'll Always Love You, it's a moment that conveys the real emotional of the film. And the face of Houston, as she loses herself to the melody out there on a quiet terrace in the woods, is a reminder of everything she gave to this role, and this movie - and why it's always worth rewatching.
