Breve introducción licenses a very well designed chest tracker, probably the most beautiful of them all. This application specializes in crates and it is best to do so. There are two ways to track: old school, manually registering crates and statistics that predict 100% correct upcoming crates. It only defines the player member found in the game. Exactly, user-friendly, the best of the domain. Download now! Crates aren't random! Features: === • 6 languages (English, German, Spanish, Italian, French, Romanian) • Tutorial included • Easy tracking system. • Check the cycle of the default bins. • How many crates until giant/magic/super magic/legendary/epic. • Show the next 6 cases. • You can view the contents of each chest. • Floating widget (allows you to track chests in the game) • Easy player management interface == If you want to be the fastest way, select statistics. The tour has all the necessary information. If you select cycle, you will be asked if you know your current chest position. If you are at the beginning of the game, enter 0 positions. If not, just press do not know and the tool will find out for you several times register the crates you win. To access the floating widget, go to the settings and enable it. You can change the size and transparency as you like. OPTIONAL: ○ You can restore the app by pressing the reset on the tracker page. ○ You can click on the crates inside the history panel on the tracker page for content. ○ Swipe to the right to access the menu. ○ You can click on the crates inside the shooting page of the

content. == This application is unofficial and is not approved by Supercell.
