Northside high school tuscaloosa county

Schools come in a variety of forms - from traditional K-12 education to university and the pursuit of advanced degree. Learn all about school here. August 4, 2009 2-minute reading Bring you by touring and tasting Brutocao Cellars Hopland, California Shortly after the Brutocao family released their first wine in 1980, they chose Lion of St. Mark, modeled after the lion on top of St. Mark's Cathedral in Venice, Italy, as a symbol of family tradition and quality. Today, the family blends their Italian heritage with 400 acres of vineyards in southern Mendocino County. Winemaker David Brutocao after the glorified period, minimally invasive method for producing complex and memorable wines. Taste is of critical importance to brutocaos who believe in winemaking with food in mind. Their restaurant, right next to the Hopland tasting room, proves this. Crushed grape grille provides a palette full of exquisite dishes to enjoy. From wood-burning pizza to freshly made pasta, Crushed Grape features excellent Italian cooking and nightly specials. Guests can dine inside or on the outdoor deck, overlooking the winery's 6 main bocce courtyards. The restaurant and tasting room cover only part of the seven-a-a.m. Brutocao Cellars Schoolhouse Plaza, originally Hopland High School from 1922 to 1963. Historic photographs are on display in the tasting room in memory of the school, which was turned into a complex dedicated to wine and food by Leonard Brutocao. Special events take place regularly here. The old high school gym has been converted into a Bliss room, a banquet/conference center room for up to 200 guests. A popular venue for spring and summer weddings and fall and winter conferences, the venue recently hosted the California Sustainable Wine Growing Alliance Conference presented by UC-Davis. The building now has specialty shops and offices on the first floor, and two rooms for conferences and special events on the second floor. From a table in Italy, to the many tables found at Brutocao Cellars today, the Brutocao family tradition of good friends, delicious food and excellent wine remains. It is a tradition they warmly share with all those who visit the Brutocao Cellar. What to buy: Quadriga Classic Italian blend of Sangiovese/Primitivo/Barbera/Dolcetto \$24 Coro Mendocino blended by Zinfandel, Sangiovese, Barbera, Syrah \$37 Anderson Valley Pinot Noir Black Cherry, Fresh Earth, Smoky Oak \$26 Zinfandel Port Black Cherries, Grapes, Chocolate Spices \$34 Contact: 800,433,3689; Fax: 707.744.1046 www.brutocaocellars.com 13500 S. Anderson Valley Tasting Room Located on Hwy 128 just west of Philo; 707.895.2152. the biggest cost to many middle classes is the cost of learning for their children. Many parents pay thousands of dollars a year to send their children to private schools - especially those living in areas where public schools are of poor quality. A 2014 comparison by real estate website Trulia showed that in ZIP codes with top public schools, only 4% of children went to private schools, compared to 19% of children with ZIP codes with low-ranked public schools. However, that doesn't mean parents living in good school districts are spending less overall. Housing in high-performance school districts typically costs much more than other homes in the same area - about 32 percent more, according to trulia research. So for many families, the additional cost of housing amounted to more than what they would have paid for a private school. This means that parents who want the best education possible for their children have a difficult choice to make: pay directly to a private school, or pay indirectly for a home near a good public school. To figure out which is the best, they need to know just how the two costs compare, and what options they have to keep the costs down. The cost of private schools According to data from the National Center for Education Statistics (NCES), about 4.5 million American children were enrolled in private schools in 2011-2012. More than 80% of these students are in schools with some kind of religious connection. About 43% are in Catholic schools, and another 37% have gone to schools identified as Christian in general, Jewish, or a specific Christian denomination. About 68% of all private schools have a religious orientation, while 32% are non-religious. On average, the cost of private school tuition for the 2011-2012 school year was \$10,740 per child, according to NCES. It's a significant burden for a middle-class family. In 2014, the median national household income in the United States was \$53,657, according to the U.S. Bureau of Population Surveys. That means a middle-income family will have to spend about 20% of their income to send only one child to private school and 40% to two children. However, tuition fees vary significantly depending on the type of school. Tuition averages \$6,890 per year for Catholic schools, \$8,690 for other religious schools, and a whopping \$21,510 for non-denominational schools. So a middle-income family would pay less than 13% of their income to send a child to a Catholic school, but more than 40% for a non-religious school. The cost of public schools The cost of private schools is easy to determine - just a fixed figure of dollars per year. Calculating the cost of public schools is much more complex. You must know which neighborhood parents choose for their school, the cost of living in the neighborhood how much it costs, and how much it costs compared to the cost of living in surrounding areas. A good place to start is with Niche, a website that evaluates and compares U.S. school districts based on factors such as student test scores, graduation rates, health and safety ratings, and assessments from parents and students. Each year, Niche lists the 10 school districts it rates as the best in America. For 2016, niche's number one school district on

the list is the Tredyffrin-Easttown School District. Concentrated in Tredyffrin Township, Pennsylvania - a suburb of Philadelphia - the county earns A-plus ratings for academic achievement, teachers, extracurricular activities and more. According to Trulia, the median selling price for homes in the area is \$532,500. This adds up to a monthly mortgage payment of about \$2,610, based on a 30-year loan, a 20% down payment, and a 4% interest rate. For buyers who can only afford to pay down 10%, monthly payments jump to \$3,072. In nearby Paoli, by contrast, Trulia says the median house price is just \$287,000, or \$1,407 a month. That's a difference of \$14,436 a year - about 34% more than the average cost of private school tuition for a child. So a family with a child will spend less by living in Paoli and sending the child to private school. However, a family with two or more children will spend less by living in Tredyffrin Town, where the extra money paid for housing will cover the cost of studying for all of their children. A 2014 paper on the cost of monetary learning came to a similar conclusion. It compares the cost of private schools versus public schools for two fictional families living in eastern Massachusetts: One family spends \$2,120 a month on a median-priced home in the village of Auburndale, which has some of the best public schools in the country; the other spends \$998 a month on a house in a neighborhood with the average school, plus an average of \$782 a month for private school tuition. Adding these two costs together, the private school family comes out first by \$340 a month. However, mathematics changes completely if both families have two children. In that case, the public student family saved a total of \$70,000 throughout the school years of both of their children. Keeping school costs under general control, it seems that public schools - even those in expensive neighborhoods - are a better deal for families with more children, while private schools tend to be a better value for only children. However, this rule is not true for everyone. Parents who choose the right private school can reduce tuition fees to affordable rates, even with several children at school at the same time. And conversely, making smart housing choices can make life in a great school district a even if there is only one child. Choosing a private school One way to make a private school more affordable is to choose a school that has As noted above, religious schools - especially Catholic schools - tend to be much more affordable than private schools i don't discriminate. Based on NCES figures, a family can send two children to a Catholic school at an average cost of \$13,780 per year. That's a little less than the \$14,436 a year it costs to live in Tredyffrin Township rather than Paoli. Another private school option is Montessori School. These schools have an educational approach that focuses on allowing children to learn at their own pace, using all five senses. Most Montessori programs are for young children, but some extend to early a teen. According to a 2009 survey by the Montessori North American Teachers Association, the cost of a year at Montessori School varies greatly, but the average price for elementary school students is about \$8,600. That makes Montessori schools more expensive than typical Catholic schools, but on par with other religious schools. Parents can also save money by starting their children out in a public elementary school, then transferring them to a private high school. According to money articles, if their hypothetical private-schooling families did this with two children, they would only save a total of \$71,000 compared to families in expensive school districts. Private school scholarships for families who have difficulty paying for private school tuition can sometimes bring it within their financial reach through scholarships and other forms of financial assistance. Some schools have their own financial aid programs, and others participate in national, regional, or state scholarship programs. Funding includes: Children's Scholarship Fund. Originally started as the Washington Scholarship Foundation, the Children's Scholarship Fund (CSF) now offers scholarships part of the tuition to low-income families nationwide. Scholarships cover up to 75% of tuition fees, with an average amount of up to \$1,700 per child. They can be used for any type of school - religious, religious or even home schooling. To be eligible for a scholarship, families must meet having a child in elementary school and meet the income guidelines for the National School Lunch Program. In the 2015-2016 academic year, the foundation awarded scholarships to more than 24,000 students. To apply for a scholarship, parents need to contact one of CSF's partner programs in 16 states; the amount of time the process takes depends on the specific program. Run by the Jack Kent Cooke Foundation, the Young Scholars Program provides scholarships to middle and high school students with top scores. About 60 students receive scholarships each year, which they can use for boarding schools, day schools, or parochial schools In addition to financial aid, young students also receive academic counseling, access to enrichment programs, and other resources. Families with incomes of up to \$95,000 can apply, but most Young Scholars come from families with incomes below \$60,000. The application period lasts from January to April, and students know before September whether they are eligible for aid. A better chance. This program is aimed at students of color from grades 4-9 who achieve good overall grades and actively participate in extracurricular activities. The program doesn't actually offer scholarship funding, but it does mention students who qualify for more than 300 middle and high schools nationwide - both religious and religious - and help them apply for financial aid from those schools. A Better Chance says most students applying through its program receive financial aid, but it doesn't give a specific percentage. The application process begins in February for the school year beginning 18 months later. There are many other scholarship programs and scholarship vouchers that work in specific states or regions of the country. Parents can learn about programs in their area through the Private School website. In general, neighborhoods with large public schools are more expensive than other neighborhoods in the same common area. However, there are some notable exceptions to this rule. Neighborhood Scout has compiled a list of neighborhoods in the country's 20 largest metropolitan areas that combine good schools with affordable housing prices. For each neighborhood, the site lists average house prices and school district ratings on a 100-point scale, based on factors such as class sizes and state test scores. For the 10 largest metro areas in the United States, the top neighborhoods are: Metro Area Neighborhood Median House Value Public School Rating New York, NY Queens, NY \$234,924 92 Los Angeles, CA Los Alamitos, CA \$411,225 87 Chicago, IL Elmhurst, IL \$260,105 86 Dallas, TX Richardson, TX \$259,597 90 Philadelphia, PA Narberth, PA \$274,086 , TX Friendswood, TX \$218,832 94 Washington, DC Laurel, MD \$279,307 88 Miami, FL Hallandale Beach, FL\$184,819 52 Atlanta, GA Fayetteville, GA \$202,980 65 Boston, MA Brookline, MA \$390,447 98 If the area you live in - or want to live in - is not part of a large metropolitan area, Neighborhood Scout can still help you find an affordable area with good schools. You can enter your state and region into your site's advanced search engine, then choose criteria for school quality, prices, and other features that are important to you, such as crime rates or ability to travel. However, to use this feature, you need to subscribe to the site, which costs \$40 per month, \$90 per quarter or \$192 per year. Another way to buy a home in a school district is top class is deliberately choosing to live in a smaller house. For example, in Tredyffrin Township, PA, PA, three-bedroom home for as little as \$390,000. Mortgage payments on a home like this will come to about \$1,912 a month - a saving of \$698 a month, or \$8,376 a year, compared to the median house price. Last Word When choosing a place to live, the school district is not the only factor to consider. To begin with, you want to find a home near your workplace, so you don't have to face a long go to work every day - maybe even one that's close enough to allow you to walk or bike to work. Ideally, you also want to be close to friends and family. And finally, you want to live in a comfortable neighborhood for you, with access to all the amenities you care about - from local businesses to a good public library. So if the neighborhood that you like the most is not one with the best schools, don't give it up. Instead, crunch some numbers and see how much you can save by combining an affordable home with a private school. Or, on the other hand, if the place you're in love with has a great school district and high house prices in the sky, look for ways to find an affordable home in that neighborhood. Have you attended a public school or a private school? Which one would you choose for your children? Children?
