# How to make guyabano tea from fresh leaves

Home » Health » How to make Soursop tea and how to use leaves to kill cancer cells (1000 times stronger than Chemo Directions: Boil 1 liter of water, then take 15 soursop dry leaves (fresh or dried ones have the same value) and 1 small stem, cut into small pieces and put in boiling water.  Fresh green tea with tea leaves in water Do not close the container and continue boiling the water on a small flame for 30 minutes until the water evaporates to 500 ml . Now the soursop tea is ready to drink. Drink 1 cup (165 ml) filtered sour tea hot or warm or cold , 3 times a day, morning, afternoon and night. For better taste, you can add 1/2 tablespoon of lime juice, 2 pudding leaves and add some honey (not sugar). After drinking, the body may feel the effects of heat, but no side effects. To cool the body, drink 3 glasses of fresh watermelon juice and drink 3 glasses of goat's milk every day. In 2 weeks you can feel the benefits of soursop yourself, and in 4 weeks time improvement can be clearly felt. Note: Drink soursop tea 30 minutes before meals. Graviola (soursop) is used to treat infections caused by bacteria and parasites, including leishmaniasis, a disease caused by parasites transmitted by bites of sand fleas; herpes; cough; and cancer, according to WebMD. It is also used to induce vomiting and empty the intestines. Some people use graviola to help them relax. Cancer prevention Leaves of the graviola tree have strong anti-cancer properties originating from phytochemistics in the plant. The journal Cancer Letters published a study looking at the impact of graviola on pancreatic cancer. The addition of graviola stopped the replication of cancerous pancreatic cancer cells and caused their death. Scientists suggest that this natural remedy can prevent and cure cancer. Leaves can also be useful for treating skin cancer when applied topically. Treatment of viral infections Traditional drugs use graviola leaves as a treatment for viral infections. An article published in the Journal of Ethnopharmacology in May 1998 found that leaf extracts suppressed the herpes simplex virus. Herpes virus is spread through bodily fluids and is often transmitted during kissing or through sexual contact. According to the University of Maryland Medical Center, up to 90 percent of the U.S. population has been exposed to one form of the virus and there is no cure. Some antiviral drugs can reduce the number of outbreaks or relieve symptoms. More research is needed to determine what role graviola may play in the treatment or prevention of herpes. Pain reduction When it comes to pain management, many sufferers choose to visit the CBD Oil UK site and order some CBD oil to help manage their pain because it can act as pain relief, reduce swelling and relieve nausea, which is a common side effect of cancer treatment. Supplements with graviola leaves can reduce swelling and pain, according to a study published in May 2010 in the International Journal of Molecular Sciences. Scientists gave mice with burned paws extracts from a graviol leaf and observed their behavior. Those given the supplement had less swelling and showed fewer signs of pain. However, more research is needed to determine the safety and efficacy of this use in humans. Dosage The appropriate dose of graviola depends on several factors such as the age of the user, health, and several other conditions. There is currently insufficient scientific information to determine the appropriate dose range for graviola. Before use, make sure that you follow the appropriate instructions on the product labels and consult your pharmacist, doctor or other healthcare professional. Possible side effects of not eating fruit: Eating fruit could lead to movement disorders similar to Parkinson's disease, according to a case control study in the French West Indies. No established human dose for graviola leaf exists yet. Long-term or high doses of supplementation can cause damage to myelin sutures, disrupting normal nervous function. Movement disorders can also occur due to compounds called alkaloids present in the plant. The symptoms of these conditions are similar to those of Parkinson's disease. Talk to your doctor before taking a graviola leaf supplement or making/drinking soursop tea. Soursop has very great advantages in the prevention and fight against cancer. For prevention, it is advisable to eat fruits or drink its juice. For effective treatment and fight against cancer, always take Soursop Tea. Step 1. Boil 1 liter of water, then take 15 dried leaves (fresh or dried both have the same value) and 1 small stem, cut into small pieces and put in boiling water. Step 2. Do not wind the container and continue boiling the water on a small flame for 30 minutes until the water evaporates to 500 ml . Now the soursop tea is ready to drink. Drink 1 cup (165 ml) filtered sour tea hot or warm or cold , 3 times a day, morning, afternoon and night. For better taste you can add 1/2 lime juice, 2 custard leaves and add some honey (not sugar). After drinking, the body may feel the effects of heat, but no side effects. To cool the body drink 3 glasses of fruit juice, such as sweet lime or pinapple or eat watermelon, and drink 3 glasses of buttermily every day. In 2 weeks you can feel the benefits of soursop yourself, and in 4 weeks time improvement can be clearly felt. After 2 months, you can go for a medical examination. Note: Take Soursop tea for 30 minutes. before meals to always be more effective. Soursop Leaves, which are organically grown, are now available in India.The other name soursop is Graviola, which are not grown in India, we import the best quality soursop fruits and leaves from other countries. We will deliver Sousop fruits and leaves to your home anywhere in India.For details and reservations Contact: No: 53, Castle Hills, cell.no. : 099599 20555 ,Masab Tank, Hyderabad-57.  e-mail : ravisuragani1@gmail.com Contraindications: • Graviola has demonstrated the stimulating activity of the uterus in animal (rat) studies and should therefore not be used during pregnancy.• Graviola has demonstrated hypotensive, vasodic and cardiopressive activities in animal studies and is contraindicated in people with low blood pressure. People taking antihypertensive drugs should consult their doctors before taking graviola and monitor their blood pressure accordingly (as medicines may need to be adjusted).• Graviola has demonstrated significant antimicrobial properties in vitro. Chronic, long-term use of this plant can lead to dying friendly bacteria in the digestive tract due to its antimicrobial properties. It is recommended to supplement the diet with probiotics and digestive enzymes• Graviola has demonstrated emetic properties in one study in animals with pigs. Large single doses can cause nausea or vomiting. Reduce use accordingly if this occurs.• One study with rats due to stem bark extract intragastric acid (at 100 mg/kg) reported an increase in dopamine, norepinephrine, and monomine oxidase activity, as well as inhibition of serotonin release in stress-induced rats.• Alcohol extracts from graviola leaf showed no toxic or side effects in mice at 100 mg/kg; however, at a dose of 300 mg/kg, a decrease in exploratory behavior and a slight abdominal narrowing has been observed. If there is sedation or drowsiness, reduce the amount used.  While research confirms that these anticancer acetogenines also occur in high amounts in fruit seeds and graviola roots, various alkaloid chemicals in seeds and roots have shown some preliminary neurotoxic effects in vitro. Scientists have suggested that these alkaloids may be associated with atypical Parkinson's disease in countries where They are used as a common herbal parasite remedy. Therefore, the use of seeds and graviola root is not recommended at this time suggested supplements/uses with soursop tea : Take a supplement with for biotic such as yogurt or probiotic supplements. Do not combine with coenzyme q10(used in usa). Reduce dossage after consulting a doctor if you have low blood pressure. Pregnent women should not take Soursop.Disclaimer: The information provided on this website should not be interpreted as personal medical advice or instruction.
