Before using them, use mild dish soap and clean water to wash off all accessories, such as a bag and base tray. Wipe the appliance with a damp cloth – you don't want to immerse it in water. [1] Set the air toaster on a stable, heat-resistant surface. When choosing the location of the air fryer, put it on a tole surface, which is resistant to heat, most likely in your kitchen. Keep it away from a large amount of water, such as a sink. Make sure that the air outlet is not blocked or covered. [2] Insert the main tray and basket into the air fryer. To make your air toaster ready for use, place the pan basket in the base tray. Now push both the base tray and the bag into the air fryer. [3] 4 Connect the air toaster to a standard wall socket. Find the nearest socket and connect the air toaster. The air toaster has a 4-foot (120 cm) cord to make it easier to reach the outlet. [4] 1 Press the On/Off button to activate the air toaster. Pressing the On/Off button on the digital touchscreen will turn on the air toaster by illuminating the controls. The control panel should contain a note 0 indicating that you have not yet chosen the boiling point or time. [5] To turn off the air toaster, just press On/Off again. 2 Put the food in the base tray. Push the base tray using a knob and place the selected food in the tray. When all your food is set on the tray, push the tray back into the air fryer. [6] 3 Press Start/Pause to start cooking by default. When the food is in the air fryer, press the Start/Pause button to enable the default setting. This will start cooking at 360°F (182°C) for 10 minutes. The change of temperature and time settings manually is spoken in the next section. 4 Use the Start/Pause button to pause the brewing process. If you want to stop the air fryer instantly, press the Start/Pause button. This should pause the cooking process so that you can remove the main tray if necessary. [7] Press Press button to continue cooking. If you press Pause and do not press any other buttons within 5 minutes, the time and temperature settings will be cleared. 5 To clear all settings, use the On/Off button. If you pause the air fryer to remove food before the timer and do not want to put food again, press the On/Off button. [8] 1 Find out the temperature and time you will need to set for food. You NuWave Air Fryer should come with an instruction brochure containing several recipes. Look at the diagram to see how long to cook the selected food, as well as at what temperature. [9] For example, if you are making homemade fries, set the temperature to 360 °F (182 °C) for 18 to 30 minutes. On the Internet you can find many recipes for air toasters, which will tell you the temperature and time settings. 2 Press the Temp/Time button once to set the boiling point. Find the Temp/Time button on the digital touchscreen at the bottom left of the screen. Press the Temp/Time 1 button to activate the temperature controls. [10] The Temp button should blink and the default setting of 360 °F (182 °C) should also be displayed. 3 Adjust the temperature using the up and down arrow buttons. When the temperature settings appear, you can use the up and down arrows to set the temperature you want. Each time you press the up or down arrow, the temperature will change to 5 °F (-15 °C). [11] Hold the down arrow to adjust the temperature at 50 °F (10 °C). If you need to change the temperature while the food is ready, you can use the same process. 4 Press the Temp/Time button twice to set the cooking time. When you press the temp/time button once to change the temperature setting, double-clicking the Temp/Time button will allow you to set the timer. This should call the time settings by displaying the digital clock. [12] The time should blink and the default setting of 10 minutes should be displayed. 5 Press up and down arrows to set the time for 1 minute. The arrows on the right side of the screen allow you to set the desired cooking time. When you press the arrow, the time will increase or decrease by 1 minute. If you want to speed up your settings, you can hold down the arrow button by adjusting the time in steps of 10, 20, and 30 minutes. [13] If you are preparing from 100°F (38°C) to 345°F (174 °C), the air toaster can be cooked for up to 99 hours and 59 minutes. If you are preparing from 350°F (177°C) to 390°F (199 °C), the air toaster can cook for up to an hour. 6 Put the food in the basket immediately to start cooking. Unlike warming up, you can put your food in an air toaster immediately after you have chosen the temperature and time. Push tray and cart back to the the toaster carefully when it contains your food. [14] You don't have to wait for the air toaster to warm up – it will start cooking as soon as you hit the start. Do not fill the basket more than 4/5 full. Do not use the base tray without a basket. 7 Press Start/Pause to start the timer. When the food is in the air fryer, press the Start button. This will allow the timer to start counting, and your food will start cooking. [15] Use the Warm up button for Crispier foods 1. After warming up the air fryer before adding food, you can first get to the perfect temperature. When you use the Preheat setting, the air toaster will inform you when it is ready to put food. [16] The choice of warmed water is perfect for foods such as chicken competitions, fries or frozen snacks. 2 Preheat the air fryer with a warmer. When the air toaster is turned on, press Warm up using the On/Off button. Then press the Temp/Time button once to set the boiling point, then press the Temp/Time button again to select the right cooking time. [17] If you want to use the default setting of 360°F (182 °C) for 10 minutes, press the hot button to stop. 3 Press Start/Pause to start the process. After the temperature and time are in, press Start/Pause on the digital touchscreen. As a result, the air toaster will begin to warm up. [18] When you press Start, the current temperature will appear on the screen, so don't worry if it's not the same as the one you heat the air toaster into. 4 Wait for the beep and ready signal. When the air toaster reaches the desired temperature, it beeps and the screen should be said Ready. When the toaster beeps, the food should be put in 5 minutes. [19] The time you set for cooking will not start to run down until the air toaster is warmed up. 5 Put the food in the fryer to start cooking. When you put the basket in the air fryer after it has warmed up, the timer will automatically start counting down. There is nothing that you need to click to start the cooking process. [20] Make sure you don't fill the basket with food all the way. Do not use the base tray solely in the air toaster. 6 Press the Start button twice to add food before warming it up. If you clicked To Warm up, but you want to put food until the air toaster has reached the desired temperature, double-click the Start button. This will immediately start the timer so that your food will cook for a set time. [21] Please note that you do not need to warm up the air fryer if you have just cooked something - it will still be hot. 1 Pull the basket and base tray straight to remove. To take a basket or grill pan from the air fryer, hold on the handle and pull straight. This should remove the / grill pan and base tray. Be careful to press the removable button on the handle when you pull them out. [22] 2 Place the base tray on a heat-resistant surface. After removing the basket / grill pan and base tray, lay the base tray on the surface, which will not be damaged by heat. It can be a potholder, a silicone sole, or any other type of heat-resistant surface. [23] 3 Remove the bag from the base tray if necessary. If you want to pour food on a plate or pelvis from the basket, you can remove the basket from the base tray to get rid of unwanted weight. Lift the safety cover on the handle and press the removable button. This will allow you to lift the bag from the main tray. [24] You can repeat the same process using the grill pan attachment. 4 If necessary, swap the basket and grill pan. In the base tray you can put both a basket and a grill pan. Both accessories fit in the main tray and can be removed by pressing the removable button. The basket is best used with foods such as fries, onion rings or other snacks. A grill pan can be used to cook steak, hamburger and other meat. 5 Disconnect the air fryer to cool it. Before cleaning the air toaster, you will want to disconnect the device. Allow it to cool completely, waiting at least 15 minutes before checking that it is still hot. [25] Place the basket and base tray on a heat-resistant surface when they are removed from the air fryer to cool down faster. 6 Clean the air toaster and accessories after each use. When the air toaster has cooled down, use a damp cloth to clean the appliance, make sure it is not immersed in water. Base tray and accessories you can clean with mild soap with water, be careful to use a soft sponge so that they are not scratched. [26] Immersion of the appliance in water will cause damage. Your air toaster and accessories must be cleaned every time you use them. If the base tray contains food residues, fill it with hot water and let it soak for 10 minutes before trying to clean it. Add a new question what if my toaster doesn't work and keeps saying Open? The end of the cart does not connect to the device. Remove the basket and loosen the two screws at the back of the basket (about the thickness of the nail). The toaster should work now. If this continues to be a problem, remove the screws and add a small wasch. Question How do I get a user guide? Insert the name of the fryer and the exact serial number into an online search engine, such as DuckDuckGo, Bing, or Google. There should be a search return with a guide and photos. If not, send it directly to the manufacturer in the manual PDF. Question We received a Nuwave air toaster as a gift, but there was no user manual. How can I get it? Search the Internet using the toaster name and its serial number. will come back so that there are images that will help you. Ask To Ask Question Thank you! Thanks!
