The notable Basic Economy can be a difficult ticket purchase for some flyers that may or may not know what is included or not. There are many restrictions on American Airlines' Basic Economy fare classes introduced for fighting low-cost airlines, and it is important to have a good experience on board to know them. Here's what we're trying to explore: What is the basic economy? There are many limitations that tempt a lot of flyers to avoid this option. In the U.S., basic economy books are in the B fare class, so it's pretty easy to remember. However, B fares are not offered on all single itineraries, so Basic Economy may not be available on certain flights. American airlines look at prices, destinations and demand on a daily basis to determine when and where basic economy fares are offered. Some routes (especially routes to domestic leisure destinations) have a basic economy in most cases. Some routes are never done, and some routes have limited B fare tickets. In some cases, you can find Basic Economy fares at the last minute, even on the same day of departure. If you book with AA.com or an online travel agency (such as Orbitz or Kayak), you will receive a notification of your ticket restrictions before payment. This warning is important and is subject to: We encourage travelers to book basic fares and book regular economy tickets with more benefits and benefits. If you find a Basic Economy ticket, the price difference in the normal economy may fluctuate (surprising): you may see a difference of 10 dollars or a difference of

several hundred dollars! It is to encourage flyers to charge fares to the normal economy. However, such a high fare mismatch will be difficult for many travelers. We leave this strange pricing decision to the airline! If you find a Basic Economy ticket, please understand the cost limitations and differences between normal economies. Why the basic economy was introduced Most low-cost airlines split their ticket offers to lower publicly available ticket prices, such as seat allocation, checked baggage, in-flight services, and upgrades. By removing these products from economy fares, passengers can be added appropriately, resulting in lower prices when prospects search for fares. Many travelers may not want to pay extra for the supplemental services offered and may stick to the most no-frills options to save some money. If you need additional services or products, they will pay for them and create additional revenue for the airline. Americans followed Delta Air Lines and United Airlines, which had already introduced their own basic economy products. Americans were in the midst of a merger, so it wasn't realistic to introduce basic products earlier than they did. Bottom line: Basic Economy offers passengers more pricing options while creating more revenue opportunities for airlines. What are the limitations of the American Basic Economy? Baggage Allowance First, In American Airlines Basic Economy, carry-on baggage is allowed on board: one in the top bin and one under the seat in front of you. This is the same as all other economy class fares. As long as you continue what you think is a normal bag that fits in the sizer, you'll be fine. However, as read below, since you are boarding Group 9 on a Basic Economy ticket, the possibility of empty rooms on the plane will be dramatically reduced, so available conditions may be determined while you have the ability to carry your bag on board. Second, flight change requests and refunds are not allowed. You can't change it on the day, and you can't wait for a flight at a later date or earlier. When you book a Basic Economy fare, we book a completely inflexible ticket so you can choose your flight exactly and at the right time. This is especially important for business travelers who rely on ticket changes to survive on business trips (although the lack of changeability will probably be okay for most leisure travelers). Main cabin (economy). Image Credit: American Airlines Boarding & Priority Access Priority Access is not available for Basic Economy passengers, even if they are willing to pay separately. However, Group 2 Executive Platinum, Group 3 Platinum and Platinum, and Group 4 Gold AAdvantage Elite will continue to participate in each group. And AAdvantage credit card holders will continue to board Group 5 after all elites. Basic Economy passengers will receive Group 9 boarding, the last group to board the aircraft. At this point, the overhead bin space is likely to fill up and you will be forced to gate check your baggage to your final destination (it will not cost anything other than the time you will get it on arrival). There is no way to avoid this other than outside of elite status or holding a designated AAdvantage credit card. Group 9 boarding is not really for the faint of mind - when you board an airplane, you are forced to wait around the gate area until the last minute, there is simply no storage space for any bag. Seat selection seats for Basic Economy guests are based on available space and will be allocated upon check-in. Many basic customers are more likely to sit in unwanted left behind economy seats that others don't choose. Hot Tip: Basic passengers will be given the opportunity to purchase some seats 48 hours before departure, but this does not include the option of Preferred or the main cabin extra section. Some passengers have reported success in waiting until the last minute to check in after all the economy seats in the back have been filled. Because of this, they are allocated pretty decent seats at the front desk - even in some cases even the main cabin extra seats are simply because there is a lack of available space elsewhere. However, if you wait for check-in without a seat assignment and do not have a seat to assign you, you may be denied boarding if the aircraft is overbooked. Don't wait if you really need to travel! This includes upgrade awards, free (or discounted) seats, including priority seats and additional seats in the main cabin, and the day of the event. Flight Benefits. For a comfortable international business class flight, visit American Airlines' 777-300ER. Image Credits: For more information about American Airlines upgrades, see our complete guide to how to upgrade on American Airlines flights. Re-booking If your plane experiences abnormal operation (including weather and mechanical issues), it can only be re-accommodated by American Airlines or partner airlines. If you're an AAdvantage elite, you'll get additional protection or re-booking options, including other alliance members (or other airlines in extreme cases). When booking a basic ticket, the re-booking option may be limited depending on the flight load and the city of departure/destination, but other passengers will take precedence. For example, in the event of severe mechanical disruption, Americans may decide to place qualified passengers on United Airlines and arrive at their final destination. Basic Economy customers are not allowed to use this option. The elite miles/segment final limit is a reduction in Elite Qualifying Miles (EQM) and Elite Qualifying Segment (EQS) rates. Basic Economy passengers will only receive 0.5 miles per mile flown, half of the segment. If you're trying to earn AAdvantage Elite status, it will take twice as long to complete your status requirements because you'll earn half of your miles and segments. Imagine flying thousands of miles to Europe and receiving half of the miles eligible for status. What does the normal economy of American Airlines include? Baggage Regular Economy fares include carry-on baggage in the top bin and personal items stored under the same seat in front of Basic Economy. Both basic and regular passengers who do not have a status or AAdvantage credit card must pay for checked baggage. (For more information, we cover AA baggage charges in detail.) However, regular economy fares include the option of changing your flight on the same day (usually for a fee) and changing your trip completely for a fee of 200 dollars. This 200 dollar fee is flexible even if the plan is interrupted - generally, businessmen or large business accounts book regular fares to have this option. If you have minor schedule irregularities or are seeking fee exemptions, you will almost certainly need regular fares to ensure any changes. Bottom line: What's the change on the day? Basic Economy fares are not available for regular Economy fares. Economy Boarding & Priority Access Priority Access is available for purchase with regular economy tickets, and all elite levels are available for Group 2 Executive Platinum, Group 3 Platinum Pro and Platinum, and Group 4 Gold groups. AAdvantage credit card holders will board Group 5 after all elites. Image Credit: Shutterstock.com Economy Seat Selection Seats are free for regular economy guests, but some priority seats or additional seats in the main cabin may be subject to additional charges - in any case, all seats on the aircraft can be selected/purchased at any time. Elites can choose priority or main cabin extra seats at any time, unlike Basic Economy passengers who are not available at all (without any additional charge). In my opinion, having access to these better seats is one of the reasons why you don't buy basic economy fares, especially on long flights that would be really uncomfortable sitting in the middle seat. Your assignment depends on the full of the flight, but 1 person waiting to receive an auto seat assignment will receive an undesirable intermediate seat (mainly the rear of the cabin). Regardless of the ticket purchased, the actual seat type is the same, but the physical seat does not change, but some seats are definitely preferred, depending on the location of the plane and the size of the feet. There is no seat selection column for Basic Economy. Upgrades Free domestic upgrades, miles and copy upgrades, system-wide upgrades, load rate-based upgrades (for elites and non-elites), and other paid and free upgrades are available in normal economies. You can also pay without any additional change fees to upgrade your fare from a regular economy ticket to a first class ticket. However, there are some reports that if you don't realize you're booking a basic economy (or the restrictions associated with it), you'll be upferking a basic ticket to a regular economy after you buy it. In this scenario, if you need to change the ticket from Basic to normal, you can call the U.S. reservation to assist with the process. In the case of irregular operations, there are several options available to regular economy or business/first passengers and elites with elite status if the delay exceeds a few hours: long-haul first class and transcontinental first class passengers can board all non-partner airlines if they arrive at their destination faster than other options. Concierge keys, Executive Platinum, OneWorld Emerald and Platinum Pro in all cabins can also be boarded by non-partner airlines if they arrive at their destination faster than other options. Business and short-haul first class passengers can be Americans and, in their case, put on non-partner airlines You will not be able to travel to your destination within 5 hours of the original schedule. If an American and his or her partner are unable to reach their destination within five hours of their original schedule, they can take platinum, oneworld sapphire, gold and oneworld ruby from all cabins to a non-partner airline. If you don't have status and are in the economy, you can't use a partner airline, but Americans work to re-book you on their flights. As you can see, basic economy fares are severely restricted in this situation because the priority of re-booking is already a little behind regular tickets. Elite Miles/Segments Regular Economy tickets earn the full amount of Elite Qualifying Miles (EQM) and Elite Qualifying Segments (EQSs) instead of half the price earned by the base customer. I've often seen a few dollars more regular fares than the base fare, but in that case it's better to buy normally just for full revenue capacity. Bottom Line: If you want to earn Elite status, you can easily get it with regular Economy and Basic Economy fares. What about the basic economy of other carriers? The three airlines offer the option of bringing in carry-on baggage and restrictions on changing tickets, upgrading, or allocating advance seats free of charge. In most cases, no airline wants to make the Basic Economy experience worse than other airlines because basic customers are afraid to book elsewhere. This is because restricted carry-on baggage in the United States has occurred in 2018. Customers started selecting United and Delta instead because they could see the difference when booking through an online travel agency. Now, their flights appear in all search results for these no-frill passengers because the airline essentially matches their interests (or lack thereof). Let's make a quick comparison and make a decision: If you're worried about seat selection, both American and United will automatically assign seats at check-in, and Delta will be able to select your seat at that time. If you are concerned about elite qualifying credits, both the United States and Delta will award this credit, but United will not receive them. All carriers offer award miles. No carry offers upgrades or ticket changes. After all, there really isn't a better basic economy experience, so if you're buying a no-frills ticket, buy the one that best meets your needs. The final idea America's Basic Economy experience shouldn't scare you - it's certainly a great product for people who don't care about perks and amenities and are really price conscious. If this sounds like you, the basic fare is probably suitable for you. However, if the business person is worth additional additional, such as traveling or upgrading in a corporate environment, Seat selection should avoid the basic experience of supporting the normal economy. Economic.
