Sutters advised that sutlers, or suppliers, listed on this page have equipped the men of Massachusetts' 28th Volunteer Infantry over the years. They have generally provided solids in our ranks with quality, reliable service and fairness in all relationships. When shopping online or by post, be careful: most of these suppliers are small clothes, and it's not uncommon for some items to take weeks, if not months, to get to your door. We recommend that you ask for an estimated delivery time at the time of ordering. If you need something right away, you can probably get it at an event, but merchants on Sutler Row in general tend to sell less authentic goods at higher prices than you'll find online or by mail order. A good rule of thumb is to plan ahead, shop carefully, order from recommended sources, and be willing to wait for delivery. You will be rewarded for your patience with authentic and durable equipment that will serve you well for many years. When ordering items, always be sure to tell the supplier that you are a member of 28th Massachusetts and that your impression is Mid War. This can sometimes make a difference in what the supplier provides you with. Veteran members of 28th Massachusetts are generally your most reliable source of information about which items to buy and by whom. They know from experience which suppliers offer the best combination of authenticity, durability, service and value. Many of the listed providers, although their answers to your questions can sometimes be selfish, can also offer you useful advice. Good deals on used items can sometimes be found in the Classified Ads forum for military items on CWRReenactors.com and occasionally even on eBay. Before buying or bidding, however, it's always a good idea to make your potential purchase by a veteran member of the 28th. This way, you won't be stuck with an item that isn't right for your impression or won't be satisfactory in the long run. It is even better to see the goods in person than to buy them by post. Page 2 The 28th Massachusetts Today ased in New England, the 28th Massachusetts Volunteer Infantry recreated is a non-profit living history organization founded in 1984 with the aim of accurately portraying the life of the common soldier in the Union Army. With nearly three decades of service, it is one of the largest and longest-running civil war reenactment units in the northeast. Members equipment themselves with authentic federal uniforms and mid-war equipment, carry reproduced black powder weapons, and camp in period emission tents. Together, they participate in battle reenactments and living history events from early spring to late autumn. In short, A Long History During the summer of 1983, a number of New England-area Revolutionary War reenactors began discussing the possibility of forming a Civil War unit. Everyone quickly warmed to the idea, but deciding on a regiment to be portrayed presented a rather thorny problem, since the members group came from different states. Eventually, they settled on the 28th Massachusetts Volunteer Infantry of the Irish Brigade, as research indicated that the original regiment attracted volunteers from all over the In addition, they were all fond of Irish characters who always seemed to play central roles in John Ford's westerns. When the 28th recreated the camp in the spring of 1984, its founders aimed to portray the regiment as it appeared on the march during gettysburg's crucial campaign in the summer of 1863. They must have done well, because their unit attracted the interest of numerous recruits. When 28th Massachusetts began its second decade of service, it was becoming one of the largest Civil War reenactment units in the Northeast. In the late 1990s, he was regularly fielding two solid companies in most events. Marching in the 21st century While the unit has undergone a number of changes over the years, it remains the basically solid military organization modeled after Major Steven Eames, one of the founders of the 28th and its original commanding officer. A history professor recognized throughout the hobby for his knowledge of battlefield tactics, Major Eames stepped out of retirement a few years ago to lead the regiment again. Thanks to his insistence on field discipline and long hours of practice, the 28th Massachusetts has earned a reputation as a well-trained combat unit. 28th Massachusetts currently consists of more than 70 military members from eight states - including five of the six New England states - and a Canadian province. With a strong core of experienced reenactors in the ranks, ours is a unit where new recruits can learn a lot about civil war history and army life - and even about themselves. The 28th hopes to recruit enough men to portray the regiment as it appeared in mid-1863, with about 224 men and officers enlisted. Although the 28th often takes the field as an autonomous unit, it also joins other federal reenactors in large-scale regional and national battle events. The regiment is nationally affiliated with the Mifflin Guard and regionally with the New England Brigade. Brigade.
