The gillingham manual

Orton-Gillingham approach is the most important and important reading intervention which is specifically designed for students with dyslexia and other reading difficulties. The Gillingham manual is the backbone of this approach. Orton-Gillingham approach is extremely flexible and can be used with individuals or small groups. This multisensory phone technology first learns the sound of letters to students, and then builds them into letter sound words. They advance to higher structural elements such as letters, roots and affaas. Students use auditory, visual and concrete associations to remember the concepts. The Gillingham manual covers reading and spelling (including a history of English language that helps explain some of its curious spelling and interpretation), large Training for age students, to get familiar with sound symptoms, writing, spelling pattern, and general, manual writing, and dictionary technology.
