## Lost in the river of grass characters

Sarah wasn't sure what she was looking for when she signed up for a class trip to the Florida Everglades. An opportunity to finally find some friends at the new school where he is an unpopular scholarship student? The possibility to learn more from his favorite teacher? An opportunity to try his hand at photography with his father's fancy camera? No matter what she was originally looking for, Sarah finds much more bargaining than she bargains for when, in an attempt to escape her surface cabin pair, she fakes an illness and instead heads on an airboat captained by Andy, the boy she recently met. When the airboat overturns, however, Sarah must overcome her fears of snakes, spiders, crocodiles and other dangers lurking just below the surface of filthy water or hiding in the midst of a razor-sharp saw. Walking 10 miles to earth may not seem like such a big deal, but it's sure that when those 10 miles are high through knee muck, when you have food or drinking water, when mosquitoes constantly threaten you pester and thunderstorms. Andy looks like a swamp-consuming rat, skilled and confident, hiding Sarah for her city girl's fear. But as they spend more time together, Sarah realizes that she has her own skills and strengths, too—ones that may be required to keep them both alive. Some readers may be confused to discover in the final pages of the novel that the races of the main characters (who until then have only been discussed willingly and somewhat uncoordinatedly) rainfall one of the novel's great conflicts; after the kind of life or death moments Sarah and Andy have already shared, this drama seems somewhat imposing and unnecessary. Like many adventure and survival novels for teenagers, *Lost in the Grass River* is also a coming-of-age story, as Sarah gains mesothy knowledge about herself and her abilities over a short and intense period of time. In addition to this deep personal growth, author Gini Rorby also introduced readers to the exotic, almost other mundane environment of the Everglades, the place surfers may even be begging to visit—but not without one can be great from bug sprays and some sturdy waterproof shoes. I don't know if I'm crying until he looks at me. For a moment I see the look of grief in his eyes, then he blinks it and slid into the water. Think of the crocodile immediately. Still somewhere down there is a field trip in science class to everglades supposed to be fun, but the new Sarah at Glades Academy, and her fellow freshman doesn't exactly make her feel welcome. When offers the chance for an unauthorized side trip on an airboat itself, it looks like a perfect-afternoon escape without feeling like a sore thumb. But a simple oversight turns an atmospheric rid into a race for survival across the grass river. Sarah has to count on her instincts and someone who's her. He knows—if they have any hope of bringing it back to life. Main characters: Sarah-Sarah is one of the main characters in the book as she goes on an adventure she never expected and changes completely throughout the book. She first started off really shy and alone because she made so many friends but when she met Andy, another main character, and to spend long days in everglades with her. Surrounded by life-threatening things, she starts getting the hang of how she lives because she's accustomed to it, is a city girl.Andy Andy is off missing out on a river of grass a bit of hillbilly and is a bit crazy when it comes to being brave, getting into a river full of men eating crocodiles. She is really fit for this book because she helps Sarah to overcome her fears and without her in the book and then Sarah probably waited there at The Everglades, waiting for help for days maybe even weeks. But because of how brave Andy was, they were able to fight in a sort of soroy. She gets along for the story because Sarah felt bad for her because she accidentally hit her brother on an airboat and she was all alone so she decided to take care of him. Andy doesn't like teapots because he thought the duck would slow them down because they kept looting him and they had to look for him and it took a while because Sarah didn't want to leave him. Andy hated him, but that all changed when Teapot saved him by making a deflection against a snake. Then Andy got used to being around and started to like it even though the teapot is only a duck, but it also plays a big part in the story. To continue enjoying the site we ask you to confirm your identity as a human being. Thank you very much for your cooperation. A letter from Joni Colvert recently finished reading *Lost on the Grass River*. I am 55 years old and I loved this book wholeheartedly. I made the ending so emotional that as I sang, I sat on the back ion and sat in tears in my eyes. I felt like I was in Everglids with Andy and Sarah. Because I'm blind I read your book in digital audio format through the National Library service for the blind. Your descriptions of landscape and live animals were enjoyable reading and experience. I've read a lot of books, but this is one of the best I've dealt with. I feel that it is a complete book, if there is such a thing. The setting was a character in and of itself. The adventure/survival story was so compelling that I stayed up half the night reading most of the book when I was just going to sleep the first chapter before bed. The relationship between the two main characters was beautiful. I loved Andy, Sarah and Ghorri. I just had to write to define you in writing and your storytelling skills and to thank you for sharing such an extraordinary book with readers I. I also love the quote on your website:Teaching a child to step on a caterpillar is as important as the child it is to caterpillar. Bradley Millar.Joni ColvertReview by: Kimberly MillerI just finished *Lost in a River of Grass* and wanted to let you know just how much I love your writing. There is quality in what you put into paper that attracts my full attention and makes me never want to give up. I'm always a little sad when they get to the end of one of your books and I'm starting to read the last page. Your last one is no exception. Non-stop adventure, twist and spin, and emotions are fantastic stories. Thank you for sharing your work. I look forward to recommending it to anyone I see. Missing out on the grass river made me wonder if I would cope and go through nature's twisted sense of humor, crocodiles, frogs, cockroaches, spiders, ants, pond filth, mosquitoes, and water, so much water for a cute, attractive boy? come on! , yeah, I do! :D Welcome to the Everglades where a class field trip can turn into a fight to survive in the blink of an eye! Sarah is in new school and feels very excluded from her classmates on her weekend trip to the Everglades florida. So when cute, charming, local boy, Andy, smiles and invites Sarah to board the airboat and tour-Sarah jumps on the opportunity to sneak out of her band. But the couple find themselves in swamp-like, wet, claustrophobia and the deadly river of grass with no choice but to lean on each other to survive. Can these two strangers work together to get out alive? Good to admit – I was kind of hoping Sarah was eaten by a crocodile for a lot of books! He moaned, chose and acted with so degrading that there was no other choice but to dislike him at times. But it is also very realistic behavior for a swimming situation in fear and tension. I mean, how was I really reacting? After screaming and rolling up on the ball - the complaint will likely have been my next option. :D Andy, on the other hand, was a rock star! Not without his own fault, but I just loved this kid too! Her patience with Sarah, the snakes, their status and even the baby ducks was awe-inspiring and touching. As these two kids from different worlds and obstacles began to talk, open up, trust each other, and see beyond their assumptions-I really began Bring them both to my heart, the headline and the real star of this story though is the Everglades. Orglids are actually a very wide, shallow river with sawdust, cypress trees, and marshes. Andy and Sarah are able to walk, Wade and chant through the water because it's very shallow in parts. I've always been fascinated by this dangerous south Florida wonder, and this book really teaches readers a lot of wildlife and the region. In this quick reading, I learned more about snakes and crocodiles than ever before in all the science classes I combine! Ms. Roanby's words and speed makes readers in SWAT bugs, feeling the heat, darkness, hunger, and danger around every turn of Sarah and Andy's journey through the Everglades. And there are really a few places in the world where you can actually say - hope you're eaten by a crocodile -- and actually it happens. Now that's the biggest place on earth! :D A suspense-filled adventure and Andy inspire me to learn more from the Everglades and its inhabitants and realize the real responsible and power of teamwork. We never know what can happen in this world to change us, a simple class trip can change the way you look at the world and yourself. What are you doing to survive? ... More... More
