thermostat receiver box requires no receiver box binding data stored in NO BOX receiver communications no communication with the receiver box, move the thermostat closer to the RF of THERECEIVER LOW BOX Move thermostat closer to the XX boiler failure Reporting the failure of the XX number What my thermostat will not connect to Apple's HomeKit™? , use the following steps to connect your Apple HomeKit thermostat:Check the model number of your thermostat to make sure it is available in HomeKit.Check and your thermostat wiring. If the thermostat does not have a C cable, contact your installer. Make sure your Lyric app has been updated to the latest version. Make sure your smartphone is connected to Wi-Fi or is using your smartphone data. If Apple HomeKit still doesn't work with your Wi-Fi Lyric T6 Pro thermostat, call our customer support 1-800-633-3991.Why don't my Apple HomeKit commands no longer respond? If your commands aren't responding, it means there's a disconnect between the app and Apple HomeKit. To resolve this, use the following steps: Go to Settings on your smartphone and select wi-fi, then scroll down to see the thermostat name with the last six digits of MAC ID.Turn off home data. Uninstall and reinstall the Lyric app. Go back to Settings and turn home data back on. Make sure the iOS version is up to date. Does Apple HomeKit work with a wire-shredding module? Yes, the Lyric T6 Wi-Fi Wi-Fi thermostat can be powered by the Honeywell Wire Keeper module. Will Apple HomeKit run without installing C wire? No, a lyrical T6 Pro thermostat requires A-wire (common wire) to work with Apple HomeKit.How do I control T6 Pro lyrical with Siri®? To control the thermostat with Siri, please use the examples of guidelines below:Siri, set 'Location Name' to 'XX' degrees. Siri, what's the internal temperature? Siri, set a thermostat for home settings. If Siri can't make changes and set 'I don't see anything connected' or 'I'm not sure I understand', verify your HomeKit settings below:Make sure your Lyric app is up to date. Make sure your home data is checked. Within the 'privacy' of an iOS device, make sure the T5 is 'HomeKit' enabled. If necessary, in iOS Device Privacy, select Reset HomeKit Configuration, Delete HomeKit-related Apps, Reinstall, and Set HomeKit Devices. How do I set up and configure my thermostat to work with Apple HomeKit? Make sure the thermostat and device are compatible with HomeKit (requires shared 'C' wire and iOS version 9.0 or higher). Open the Lyric app. Select the Global Drawer icon. Select Add New Device. When Thermostat, connect to the accessory network (T6 thermostat) within the app. When connecting the thermostat to a network, enter the home network password (if WAC Mode is turned on the thermostat will automatically connect the home Wi-Fi network). At the end of the device connection, the T6 thermostat will display a number. Use your smartphone to take a photo of the number that will be recorded, or enter the number manually. The thermostat should now be an installation for use with Apple HomeKit.Will the Wi-Fi thermostat T6 Pro Lyric still work if a Wi-Fi connection is lost? Yes, the temperature can be adjusted directly to the thermostat. However, some features, including geo-fencing, are managed only through the Lyric app and won't work when the connection doesn't work. The thermostat will automatically reconnect to Wi-Fi after network recovery. Why can't my Wi-Fi Lyric T6 Pro thermostat find my home Wi-Fi network? A lyrical thermostat runs within 2.4 GHz. This may be why the Lyric thermostat doesn't see the network but the smartphone, which operates in both the range of 2.4 and 5.0 GHz, sees the network. Most routers will broadcast two networks, one SSID on 5.0 GHz radio and one SSID on 2.4 GHz radio. There may be a short delay after you make changes to the temperature and set them up in the app. What is geographic fencing? Geogeo-geographic fence is a virtual perimeter for a geographic region. This is a feature in the program that uses the global positioning system or radio frequency detection to define geographic boundaries. Geogeo-geographic fence is a virtual perimeter for a geographic region. Once you've set up your geofence radius, your smartphone will determine if you've crossed from one side of the geo-fence boundary to the other. Apple and Android have unique, proprietary methods of determining when it happens. When you're signed in to the Lyric app, the Lyric service is notified by your smartphone that your phone has crossed the line. Lyric doesn't know your location, except you crossed the line. Often, the geographical transition occurs at a predictable point in your travels or while you're out and about. The exact point, however, depends on a variety of conditions such as mobile sea locations, other apps that you have open on your smartphone, etc.). Can there be multiple users for geo-fencing? Yes, there could be multiple users. Geo-fencing will be activated based on the last person to leave and the first person to return. To properly use geofencing with multiple users: Each user needs to create their own lyrical account. Each user should use their login ID and password on their devices, including smartphones and tablets. No two users share the same account. How are multiple users configured with lyric T6 Pro's Wi-Fi thermostat? You can give access to anyone or everyone Locations through the Lyric app. Start by touching the three-line menu icon in the upper-right corner of the home screen. Select Manage users and touch Add a user located at the bottom of the screen. Type the e-mail address of the person to invite. If they have a Lyric account set up, the location will be automatically added to their account. If they don't have an account, they'll receive an email invitation asking them to download the app and create their own. NOTE: All people with access to the thermostat share the same user permissions. Added users will be able to change the thermostat settings, as well as add or delete other users. Is there any way to expand the signal strength? The range or distance of the Wi-Fi signal is determined by the router. See the router user guide for more information. There's an alert that says a lost Wi-Fi signal. What does that mean? This means that the Wi-Fi signal to the thermostat has been lost. Wait for the thermostat to reconnect or select a new network within the Lyric app configuration menu. If the thermostat can't reconnect, troubleshoot the router to determine the cause. Why does the thermostat appear offline (Wi-Fi strike icon) above the right corner of the thermostat display? If the thermostat displays a Wi-Fi icon from a touch-through on its screen or appears offline in the Lyric app, it has lost the network connection. Make sure the router is turned on and transmitting. Your home Wi-Fi network may need to be reset by cycling on a router. Refer to the router's instruction manual for directions to cycling. After network restore, the thermostat will automatically reconnect. Session message not received. An e-mail message will be sent from connected-Home@alarmnet.com.Why haven't I received activation email yet to complete the Lyric account setup? If a session e-mail message is not received after five minutes, check the stacked mail folder of the e-mail account. If you find it in the Junk E-mail folder, click the Resend button and the activation e-mail message will be resentful. If you still receive your activation message, contact the Lyric 1-800-633-3991 customer support team for help. How do I remove wires from the UWP assembly system? Click the drop button on the console side. While holding the button down, gently pull the wire out. When are the 'U' contacts used in the UWP assembly system? Only the TH6320WF2003/U (Wi-Fi) (trade model) model uses these consoles. TH6320WF2003/U can be configured to control an all-house ventilator or eard fresh air suppressor for ventilation. What is change and how do I change defined points? The T6 Pro lye thermostat includes an automatic replacement. This allows the thermostat to vary between heating and cooling as needed based on room temperature and prescribed heating and cooling points. If your thermostat Not to display Auto as one of the options, it is not configured for automatic change. Your setup program can check the installation instructions on how to configure the thermostat for automatic transit. What can I use to clear the screen on my thermostat? To clean the screen, use a home glass cleaner, but do not spray it directly on the screen. The cleaner can be placed on a soft cloth and used to wipe the screen. When there is a loss of power, will the thermostat hold the specified point temperature and schedule settings? Yes, the thermostat stores the set point and schedule. What is a smart response? When you turn from an energy-saving temperature to a comfort temperature, the intelligent response feature allows the heating or cooling equipment to turn on earlier than the comfort plan's temperature setting, ensuring that the indoor temperature adjusts to the setting point in the scheduled time. What are the minimum cool set point limits?40-90 degrees Fahrenheit (4.5 – 32.0 degrees Celsius). This is an adjustable setting on the configuration menu. What are the maximum heat point limits?50-99 degrees Fahrenheit (10.0 to 37.0 degrees Celsius). This is an adjustable setting on the Configuration menu. How can I schedule my thermostat? Location-based timing: The Lyric thermostat uses your smartphone location to know when you're not around, saving you energy. Using geofence technology, it senses your return and helps you feel comfortable upon arrival. You can always manually change the predefined home and away temperature in a thermostat or app. Smart timing: Use a combination of geo-fencing and time scheduling to suit your active, busy lifestyle. Time-based scheduling: Program your thermostat for one week; Every day (each day is a different schedule); Monday through Friday, Saturday, Sunday; Or Monday-Friday, Saturday-Sunday. All days with four adjustable periods a day. No timing: Control your comfort manually by adjusting only set temperature points. If we haven't been able to answer your question, contact our support team or use our live chat service. Service.
