## Lego harry potter 2 trophy guide

Lego Harry Potter is a big deal, and that's not really surprising. JK Rowling's series of books has a special place in the hearts of everyone growing up in the Nineties and early 2000s, and continues to be embraced by new generations of fans every year. The first Lego Harry Potter sets appeared in 2001, to coincide with the release of the first film, Harry Potter and the Philosopher's Stone. Additional sets were released in tandem with each subsequent film, and then came more in 2010-11. It went a little after, but since 2018, Lego Harry Potter has returned in style with a run of excellent sets that improve significantly on their predecessors in terms of complexity, design and ingenuity. Lego has gone on leaps and bounds in recent years, evident in our round up of the best Lego sets for adults. And Lego Harry Potter is no exception. In this article we collect what we consider to be the best Lego Harry Potter set of the modern era. We will explain exactly what is good about each one, as well as some of the errors, to help you make an informed decision. Whether you're buying for yourself, your kids or the Hogwarts fanatic in your life, you can read on to discover the very best Lego Harry Potter sets available today. You'll need plenty of space and plenty of patience to build this large and complex Lego Harry Potter castle (Image credit: Lego)Age: 16+| Number of pieces: 6020 | Weight: 699g | Minifigures: 4 (+27 microfigures) | Model number: 71043Complex and detailedGet many movie moments throughout the castleVery expensiveIf you are a truly passionate Lego Harry Potter fan, and time and money are no object, then there is no real doubt about it: You want Lego Harry Potter Castle. We say time because it's going to take a long time for you to build this complex set, with over 6,000 pieces. And we say money because, well, it's certainly not cheap. But if you are prepared to invest both, then you get a lot back in return. Because this brilliant set, which measures about 60 x 75cm once constructed, really packs a lot of classic Harry Potter moments into its many rooms and passages. It would take a long time to list every single location and scene represented in this Lego Harry Potter castle, but suffice to say The Great Hall is beautifully realised, with neatly designed stained glass windows, flaming torches, and seating capable of housing a variety of students and staff. Elsewhere, you'll find the Chamber of Secrets, Moaning Myrtle's bathroom, Dumbledore's office, Umbridge's office, the Transfiguration classroom, and more. Given the huge number of scenes represented, many of these rooms are quite minuscule, and so instead of minifigures (of which there are only four), the set is centered around 27 microfigures, which are small enough to make up multiple locations. They are well designed and for it but of course they are not nearly as detailed, or satisfactory, as minifigures. Almost everywhere here, Lego made brilliant use of space, from the devil's snare behind a rock to the moving stairs that can actually be turned. And that's not all: outside the building you also get a Whotod Willow and Hagrid's Hut to increase value. Note, however, that this model does not actually replicate the entire Hogwarts as seen in the film: it's basically just the front of it. Lego's goal here has been more about repeating the big scenes than anything like an exact architectural representation of the castle as it appears on screen. Also note that there is a great reliance on stickers to add many of the most important details, such as the door to the room of requirements, and that these can be quite fiddly to apply. In addition to these little niggles, though, this Lego Harry Potter set will give you endless pleasure, in terms of both the original construction and the inevitable series of changes you want to make when you're done. This Lego Harry Potter train and platform set is full of well observed small details (Picture credit: Lego)Age: 8 + | Number of pieces: 801 | Weight: 1,32 kg | Minifigures : 5 (+ Numbers from Dementor and Scabbers) | Model number: 75955Removal pages & doorLovely platform designNo track includedOnet a passenger carriageBook-ending beginning and end of each academic year, Hogwarts Express chuntering through the landscape is one of the most iconic elements of Harry Potter movies. And so we're thrilled that the latest Lego Harry Potter set to represent it is really, really good. The train itself is much more accurate than its predecessors, with much more representative wheels and a good selection of interior details including fireplace, dials and valves. The cart is also great; we love that you can remove both page and tag, making it very easy to get your minifigures placed in there. And the platform design is the crowning glory, nicely divided as it is between muggle and magical portions, with a swinging door to move your characters from platform 9 to platform 93/4.Do be aware, however, that the headlights don't actually light up as it portrayed on the box (naughty, Lego!). And that although the train fits perfectly on any Lego tracks, there are actually no tracks that come with this set. Otherwise, however, this is an brilliantly designed Lego Harry Potter set that ticks all the boxes, and offers truly excellent value for the price. You can actually play Quidditch with this Lego Harry Potter set, after a fashion (Image credit: Lego)Age: 7 +| Number of pieces: 500 | Weight: 680g | Minifigures : 6 | Model number: 75956Let are you playing QuidditchVery affordableLacks second goalLacks stadium structureA lot of Lego Harry Potter sets are more about display than but this excellent Quidditch set scores on both points. That's because the player characters can actually fire Quaffle pieces, and the goalkeeper (who flies on some sort of stakes piece) can maneuvered to protect them from the three target mouths. The kit also comes with four towers representing Gryffindor, Ravenclaw, Slytherin and Hufflepuff, respectively, with room to fit one of the six minifigures at the top. The Hufflepuff tower also serves as a workable scoreboard. And that, along with some accessories such as a very nice Golden Snitch, is basically your lot. You don't get a full stadium back then, or even another goal piece, but given the very affordable price, it's a compromise we feel is worth making. This small but perfectly formed set of packages in a lot of cool detail (Picture credit: Lego)Age: 8 + | Number of pieces: 496 | Weight: 721g | Minifigures included: 6 | Model number: 75947Grek design choiceGlobbering fireplaceCulture for what it isBatteries not includedYou might think that grittier, rougher sides to the Harry Potter world might not mesh as well with the clean, polished and precise nature of Lego... but this amazing set will go a long way to changing your mind. Thoughtful design and colour selection means that Lego has brought a real sense of the earthy and rustic to this depiction of Hagrid's hut, in the scene from the Prisoner of Azkaban, where Buckbeak is to be executed. This set makes great use of space too. The two sections of the hut, which open at the back, are filled with fascinating objects that are easy to both move and remove. And the inner highlight is the fireplace, which contains a dragon egg; a battery-powered lightbrick that brings the fire to life very effectively. Outside the cabins you also get two sections of pumpkinin patch, a rod and tether to Buckbeak, and the hippogriff itself, with a head and neck that can be rotated, wings that can move up and down, and rivets on the back to place minifigures. All in all, this set can be a bit pricey considering its relatively small size, but it is beautifully put together and really add up to more than the sum of its parts. This dark and brooding cemetery scene is a big budget buy. (Image credit: Lego) Age: 7+ | Number of pieces: 184 | Weight: 277g | Minifigures: 4 | Model number: 75965CheapVoldemort-rises action featureSimple lookNot many piecesThe rise of Voldemort in the Beech of Flames is one of the most central scenes in the Harry Potter saga, so it's great that this very affordable set does such a good job of depicting it. Given the price it is not surprising quite basic: no buildings as such and a very small number of pieces. But there are some lovely touches, including a Grim Reaper that can be made to understand Harry in his claws, a cool mini version of the TriWizard Cup, and both a baby and an adult version of the lead villain. A cool handling handling Allows you to make Voldemort rise from the dead with the pull of a lever. And best of all, unlike other Lego Harry Potter sets, box art doesn't mislead you by suggesting features that aren't there: in this case, what you see really is what you get. All in all, this is a big budget purchase for anyone who wants to recreate one of Harry's darkest hours. There is a real fairy tale feel to this beautifully depicted Lego Harry Potter scene (Picture credit: Lego)Age: 8 + | Number of pieces: 184 | Weight: 430g | Minifigures: 4 | Model number: 75958Lovely adventurous-looking Clever wagon design Cart sealed on the one handA little overpricedIf the grimness of Voldemort cemetery scene isn't your thing, maybe you prefer to recreate one of the franchise's most uplifting and adventurous-esque sequences? This beautifully designed set recalls the scene from the World of Flames, where a flying carriage from Beauxbaton's Academy of Magic arrives at Hogwarts. And it's all pretty beautiful, from the ornate carriage, seasoned with attractive little details, to the enchanted horses with their posable wings. This set is cleverly designed too, especially the trolley, which opens up on top to offer what is essentially a second floor, complete with beds and furniture. Our favorite part, though, is the very dapper version of Hagrid, dressed in his Yule Ball costume and ready to win over Madame Maxime.On the negative side, it's little wonder that one of the carriage doors doesn't open, the front harness piece seems a little unfinished and it can be considered a bit pricey given the number of pieces. But overall, this is a lovely set that pays homage to one of the show's lighter and more uplifting moments. We love the idiosyncratic detail of this Lego Harry Potter set (Picture credit: Lego)Age: 7 +| Number of pieces: 257 | Weight: 485g | Minifigures included: 3 (plus shrouded head & Hedwig) | Model number: 294868Meetically designed elementsCan remove the top floorOutpersiveQuite smallThere are not many particularly memorable vehicles from the Harry Potter series, but the crazy Knight Bus from the Prisoner of Azkaban is very much the exception. And this Lego set does a great job of bringing the surreal three-story contraption and its associated characters to life (see our full Lego Knight Bus review). At 12 x 15cm, it's not as big as you'd expect from the surprisingly high price. But it's cleverly designed to fit in a lot, from the shrunken head and chandelier that actually swings as you glide the bus about, to the rocking chair and bed, both of which fit minifigures. It's cool, too, that the side of the bus is removable, aiding access, plus you can remove the top layer of the bus completely. This design is not flawless by any means: a gripe is that while the conductor fits on the side of the bus, he will not fit through the bus door itself. And in general, is pretty darned expensive for what it is. But as a Lego recreation of one of Harry Potter's craziest scenes, it's doing a very good job indeed. Relive one of the show's most powerful scenes with this nicely affordable Lego Harry Potter set (Picture credit: Lego)Age : 8+| Number of pieces : 430 | Weight: 200g | Minifigures : 4 | Model number: 75958Very affordablePatronus piece is beautifulNot many piecesShoreline is too smallWe will be honest, here: the scene in the Prisoner of Azkaban, where Harry summons his Patronus is one that hits us square in feel. So we were immediately attracted to this set, and what we love most is the Patronus piece itself. In a (very un-Lego like) translucent light blue and speckled with glitter, it really stands out and effectively conveys the magical nature of both apparition and the moment itselfIt stands in nice contrast to the (again, very un-Lego like) weird and creepy roofs on trees, bringing a vivid sense of darkness and despair into the scene. And so while the shoreline piece is, in our opinion, a little too small, we think Lego should be commended for trying something else here that really works. And overall, given the low price, we believe this set offers excellent value. This selection of Lego Harry Potter accessories and minifigures is a bargain at any time of year (Image credit: Lego)Age: 7 +| Number of pieces: 305 | Weight: 399g | Minifigures: 7 | Model number: 75964Includes rare piecesIncludes exclusive piecesRandom feel that some itemsSome pieces hard to construct The Lego Harry Potter advent calendar contains 24 free mini-bags containing Lego pieces that you can use to collect Christmas scenes. So to begin with there are a lot of accessories including seating, a Christmas tree, cult, food, snowman, fireplace and gifts. There are also minifigures, a statue pedestal, a Hedwig figure and a micro Hogwarts Express train. Some of the pieces are very small and hard to put together, which can be seen as an error or a function, depending on how much you like a challenge. Meanwhile, some collectors may want this set just for the exclusive (at the time of writing) items, such as Hermione in her winter outfit and Harry's acceptance letter to Hogwarts. There is even an exclusive character in the form of a gold figure by Hogwarts architect. Or maybe you just want something to open every day of the festive season, it's not a disappointing little square of chocolate. Whatever your reasoning, this is a nice and cheap buy for Lego Harry Potter fans. Lego Harry Potter minifigures... gotta catch 'em all. (Image credit: Lego) Age: 6+ | Number of pieces: 8 | Weight: 259 | Minifigures: 22 | Model number: 71022Lots of great characters! invisibility watch Too much packagingOuty this set offers exactly what it promises: 16 minifigures from Harry Potter and six from Fantastic Beasts Each comes in a sealed 'mystery' bag along with one or more accessory items, plus a collector's brochure and a unique display bottom plate. Unfortunately, this creates a lot of unnecessary packaging, which is not entirely linked to Lego's general focus on environmental liability. The Lego Harry Potter minifigures themselves, however, are all very nice, and our favorite inclusion must be Harry's invisibility Cloak, which has an iridescent treatment that really shines, both literally and metaphorically. Be warned, though: the set as a whole is very expensive, and so how you feel about the Fantastic Beasts series will probably make a big impact on whether you think it's worth the price. Costs.
