However, one of the reasons I watch live TV is to watch shows like Family Fued, Judge Judy and The Today Show on NBC. When I first got the app, I was able to watch NBC (which I can still) as well as Family Fued on GSN. One I woke up and GSN. Gsn. He was gone. Now I only use the app for NBC, and it's only for about an hour in the morning. I'm probably switching to another app that can offer me everything I'm looking for. Great IPTV app I have tried many free IPTV apps on iOS, including Perfect TV, Smarters TV and GSE. This application IP Television is the best app to date and also offers free m3u links! The developer constantly takes feedback and releases new updates and unlike other TV apps where errors keep crashing into the app: this doesn't happen with an IP TV. Very excellent Quang H Le (Pcmac user) This is a good app that can get many channels for us, the UK, international or even add more if you want and have a link. I particularly like it because it has Vietnamese channels. I really recommend this app to people who want to get an IPTV app.
