Lacc summer 2019 apply

Copyright Â© Los Angeles City College Expansion Program All Rights Reserved | 855 N Vermont Ave Los Angeles, California 90029 | 323.953.4000 e.g. lacitycollege.edu | Email: Webmaster ApplicationsCan you want to get a taste of college life? Yes!! LACC is for you. Deadline: Applications are closed for 2019.Options: We have selected 26 students from 18 different schools for LACC-2019. More details: You can contact Sandeep Singh Sandha (LACC-19 coordinator)Modules taught by instructors (School & Ph.D. Students from UCLA) who are experts in their areas. Last year's content and material are available here. We do not charge fees from program participants, but we are also not able to provide financial assistance for travel, accommodation and other personal expenses that you may incur for your lacc membership. The orientation of LACC-2019 will take place on 12 June, from 15:00 to 17:30. The location of the event is engineering building VI. The meeting place for students is in front of the Engineering VI building at 2:55 p.m. The event will be hosted by the Association of Postgraduate Computer Science Students. The event will consist of food, live music performances and informal interactions between selected students and the UCLA community. ProgramThe LACC 2019 program will be four weeks, consisting of eight modules. The programme will take place from 8 July 2019 to 2 August 2019. Activities are in four days (Monday - Thursday). The class schedules are from 9 a.m. to 5 p.m. The schedule for LACC-2019 is as follows:Teaching AssistantsWe have 4 teaching assistants for the program. Prabhjot Singh: prince112592@yahoo.comKaren Quadros: karenquadros@cs.ucla.eduXin Zhang: fayland@cs.ucla.eduLocals of classesThe program will take place on the UCLA campus in the Engineering IV building. Room number is 44-110. First Reference DayOn the first day they arrive at 8:40 a.m. The Tt's will meet you all at the Bruin Bear sculpture. Then everyone will walk to classes with his TA. From the next day, you'll all arrive directly at classes at 8:55 a.m. We advise you to bring a laptop if you have one. The program will be taught using presentations. You can bring accessories to take notes. Move In addition to the first day, get directly to your class (Room 44-110, Engine Room 4.) at least 5 minutes in front, i.e. until 8:55 a.m. Food; Students will have a 1-hour lunch break from 12:30 p.m. to 1:30 p.m. There are many dining places on the UCLA campus. Some of the very close places are in the Southern Campus Student Center and the Ackerman Association. Students will have to pay for their lunch. Prices at all UCLA restaurants are very reasonable. The meal can cost an average of \$6-\$10, depending on the restaurant. Any questions? Approach sandha@cs.ucla.edu for any clarification and List LACC-2019 in the subject line for a quick response. General Program InfoGiven the nature of the LACC program that requires laboratory and postgraduate resources of students, we are able to accept only a limited number of participants. To be considered for participation in the LACC, you need to be in 10th, 11th, or 12th grades (or will be entering these grades next fall), have a GPA of at least 3.0, and have an excellent record in science and mathematics. LACC challenges students beyond what most high schools offer and is not a rehabilitation program. Applicants should have a strong interest in science, technology, engineering and mathematics (STEM), especially computer science, in order to benefit from LACC. Some previous experience in programming and/or electronics is beneficial, but is not required. The program is open to all eligible students. We particularly encourage the participation of students from LAUSD schools, students and ethnicities under-represented in STEM. We do not charge fees from program participants, but we are also not able to provide financial assistance for travel, accommodation and other prsonal expenses that you may incur for your participation in LACC. Beyond courses like AP CS found in a typical high school curriculum and exposes students to advanced subjects in computing, and shows how algorithms and programming come together to create real systems and applications. LACC participants go from learning basic programming principles all the way to developing advanced applications. The program is organized as a set of modules, each with a lecture and hands-on software workshop. Section DetailsFontics, meet me, Sandip Singh. You can find more details about me here. Here.
