Remote Control Header The Toshiba CT-90325 full function or Universal remote control varies devices to operate and you can program the remote control to operate most of the popular brands of audio/video equipment such as a TV, a DVD player (or VCR), or a Network Satellite Receiver. See Programming for Other Equipment on This remote control may have features not used by your recipient. This guide makes it easy to set up and use your remote control, this guide contains in-depth information to help you get the most of your remote control, including controlling other equipment such as TVs, VCRs, and DVD players. If you press power button that points to the device if it has forces mode then it is already programmed and does not need further programming. If the device is unresponsive, check the batteries in the remote it could be that batteries are depleted. TOSHIBA TV 3 Digit Remote Control Codes: 013049089105109117118120159178TOSHIBA TV 4 Digit Remote Control Codes: 02600358 03940924039809830973Use the remote controller's mode buttons to set the remote mode for the correct mode Make sure you program the remote control to operate the other equipment as described on the manual. To change the mode, press the button for the equipment you want to control. The mode button lights for three seconds to show you have set the remote to that mode. Depending on how the remote is set up, the remote controller can use UHF radio signals, IR signals, or both to control the receiver. However, only IR signals are used to control other equipment. IR signals travel short distances generally 20 feet or 7 meters they can go up to 40 feet, and cannot go through walls or other solid objects. Displays the remote control directly to the equipment you want to control, with no objects to block the signal path. This tutorial shows you how to program the remote control to run a TV. The following section uses another method to program the remote control to operate a TV or other equipment (such as a DVD player or VCR, tuner, amplifier, audio receiver, or a second TV). You can program the remote control by either following the instructions in programming using equipment remote code tables, or scanning for equipment code procedure. When the remote control programs to operate combination equipment, such as a TV/DVD or a TV/VCR, programs the remote control in one mode, and then repeats the procedure in the other mode. to program the remote control to run a TV/DVD player using code 765, follow the instructions to program the remote to run the TV using codes, and then repeat the instructions for the DVD DVD the same code. Put the remote in TV mode to use TV functions or DVD mode to use the DVD player (or VCR) functions.
