

Kagan cooperative learning strategies ppt

Cooperative learning is an educational approach aimed at organizing classroom activities as a positive independent structure. Unlike individual learning, which can compete in nature, students who learn together can take advantage of each other's resources and skills (ask each other for information, evaluate each other's thoughts, monitor each other's work. In addition, the role of the teacher will change from providing information, evaluate each other's work. In addition, the role of the teacher will change from providing information, as an intellectual desire, creativity, open ends and involves a higher order thinking job. Cooperative learning is also linked to an increased level of student satisfaction.
