## Ti 84 plus instruction manual

By Jeff McCalla, C.C. Edwards TI-84 Plus Graph Calculator, the most popular calculator in the world, has just received a makeover! Learn important keystrokes that you'll need to know to use the TI-84 Plus and learn the math features and constants that the TI-84 Plus provides to you. Discover the basics of ti-84 Plus charts, as well as how to use calculator zoom commands and special menus. The TI-84 Plus C Graph Calculator offers some very advanced features, but in order to get into these advanced features, you need to know the key keys to press. The keys you usually press displayed in the following list: Your TI-84 Plus C graph calculator is quite capable of helping you with math problems and actually comes equipped with ways to add constants and enter standard items such as  $\pi$ . This list shows some of the more common and useful math features: you bought a TI-84 Plus C graphic design calculator to help you complete the charts and help you do so. The dots in this list will help you take the steps you need to take to keep your TI-84 Plus C graph: TI-84 Plus C graph not only helps you make charts, but also zooms in commands also help you highlight specific chart areas, overwrite graphs in certain relationships, and otherwise change charts to suit your needs. The following list shows what each Scale: ZBox: Draws a field around a part of a chart and overwrites a chart in a preview window that contains field dimensions. Zoom in: Zooms the chart in the cursor location. Zoom in: Zooms in on the chart in the cursor location. ZDecimal: Draws a chart of  $6.6 \leq x \leq \text{window } 6.6$  and  $-4.1 \leq y \leq \text{window } 4.1$ . When the graph is traced, the x-coordinate of the tracer is equal to the built-in multiple of 0.1. ZSquare: Rewrites a graph in a window that makes circles look like circles rather than ellipses. ZStandard: Draws schedule  $\leq x \leq 10$ ,  $-10 \leq y \leq \text{window } 10$ . ZTrig: Draws a chart of  $-11\pi/4 \leq x \leq 11\pi/4$  and  $-4 \leq y \leq 4$ . When the graph is traced, the x coordinate of the tracer is equal to the integrated multiple  $\pi/24$ . ZInteger: Overwrites the graph so that when traced, the x coordinates of the tracer are equal to the integer. ZoomStat: Finds the right review window for stats sites. ZoomFit: Finds the right preview window for graphics features, parameter equations, polar equations, or sequences. ZQuadrant1: This command charts your feature in the pre-preview window, where  $0 \leq x \leq 13.2$  and  $0 \leq y \leq 13.2$ . When you track a function that is drawn in this window, the x coordinate of the tracer will be 0.1 multiple. ZFrac1/2: This command charts your function to preset the view window where  $-66/2 \leq x \leq 66/2$  and  $-41/2 \leq y \leq 41/2$ . When you follow the function shown in this window, the x coordinate of the tracking marker will be 1/2 multiple. ZFrac1/3, ZFrac 1/4, ZFrac1/5, ZFrac 1/8, ZFrac1/10: This command schedules your function to pre-view the window and work in the same way as ZFrac1/2 does not. If you think d is the denominator of the fraction, the preview window is  $-66/d \leq x \leq 66/d$  and  $-41/d \leq y \leq 41/d$ . Tracking using these commands allows you to track x coordinates in multiples of 1/d. The TI-84 Plus C Graph Calculator not only helps you schedule, but it also offers special menus you can use to look at distribution, probability, and even finances. The following list shows all the special menus you can access on the TI-84 Plus C: 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50 51 52 53 54 55 56 57 58 59 60 61 62 63 64 65 66 67 68 69 70 71 72 73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95 96 97 98 99 100 101 102 103 104 105 106 107 108 109 110 111 112 113 114 115 116 117 118 119 120 121 122 123 124 125 126 127 128 129 130 131 132 133 134 135 136 137 138 139 140 141 142 143 144 145 146 147 148 149 150 151 152 153 154 155 156 157 158 159 160 161 162 163 164 165 166 167 168 169 170 171 172 173 174 175 176 177 178 179 180 181 182 183 184 185 186 187 188 189 190 191 192 193 194 195 196 197 198 199 200 201 202 203 204 205 206 207 208 209 210 211 212 213 214 215 216 217 218 219 220 221 222 223 224 225 226 227 228 229 230 231 232 233 234 235 236 237 238 239 240 241 242 243 244 245 246 247 248 249 250 251 252 253 254 255 256 257 258 259 260 261 262 263 264 265 266 267 268 269 270 271 272 273 274 275 276 277 278 279 280 281 282 283 284 285 286 287 288 289 290 291 292 293 294 295 296 297 298 299 300 301 302 303 304 305 306 307 308 309 310 311 312 313 314 315 316 317 318 319 320 321 322 323 324 325 326 327 328 329 330 331 332 333 334 335 336 337 338 339 340 341 342 343 344 345 346 347 348 349 350 351 352 353 354 355 356 357 358 359 360 361 362 363 364 365 366 367 368 369 370 371 372 373 374 375 376 377 378 379 380 381 382 383 384 385 386 387 388 389 390 391 392 393 394 395 396 397 398 399 400 401 402 403 404 405 406 407 408 409 410 411 412 413 414 415 416 417 418 419 420 421 422 423 424 425 426 427 428 429 430 431 432 433 434 435 436 437 438 439 440 441 442 443 444 445 446 447 448 449 450 451 452 453 454 455 456 457 458 459 460 461 462 463 464 465 466 467 468 469 470 471 472 473 474 475 476 477 478 479 480 481 482 483 484 485 486 487 488 489 490 491 492 493 494 495 496 497 498 499 500 501 502 503 504 505 506 507 508 509 510 511 512 513 514 515 516 517 518 519 520 521 522 523 524 525 526 527 528 529 530 531 532 533 534 535 536 537 538 539 540 541 542 543 544 545 546 547 548 549 550 551 552 553 554 555 556 557 558 559 560 561 562 563 564 565 566 567 568 569 570 571 572 573 574 575 576 577 578 579 580 582 583 584 585 586 587 588 589 590 591 592 593 594 595 596 597 598 599 600 601 602 603 604 605 606 607 608 609 610 611 612 613 614 615 616 617 618 619 620 621 622 623 624 625 626 627 628 629 630 631 632 633 634 635 636 637 638 639 640 641 642 643 644 645 646 647 648 649 650 651 652 653 654 655 656 657 658 659 660 661 662 663 664 665 666 667 668 669 670 671 672 673 674 675 676 677 678 679 680 681 682 683 684 685 686 687 688 689 690 691 692 693 694 695 696 Content 697 697
