Even after Meghan Markle gave birth to the royal baby on May 6, people had tons of questions about pretty much everything the job entailed. However, Markle and her husband Prince Harry are known for being super-private, so it seemed that some details would remain secret. But for anyone who died for more information, baby Archie's birth certificate has some interesting revelations. The certificate was released Friday and lists the baby's name as Archie Harrison Mountbatten-Windsor, which Markle and Prince Harry announced on Instagram. However, exactly where Archie was born was a mystery. Rumour has it that Markle was considering giving birth at home, while others thought she was going to St Mary's Hospital in London, where Kate Middleton had her three children, Our birth at home, while others thought she was going to St Mary's Hospital in London, where Kate Middleton had her three children, Our birth at home, while others thought she was going to St Mary's Hospital in London, where Kate Middleton had her three children, Our birth certificate says Markle and Prince Harry chose Portland Hospital. told CNN in a statement, Huge congratulations to the Duke and Duchess of Sussex on the birth of baby Archie... For the sake of patient confidentiality, we are unable to provide any comment or information. In addition, the certificate shows that Prince Harry recorded the birth 11 days after it happened on May 17. He was clearly ecstatic, and had a lot to do between royal engagements and trips to other countries, but he seems to have found the time to register the certificate himself. But the coolest part of all may be what Markle's profession looks like. Most people know her as the Duchess of Sussex, but in the document, her work is officially registered as Princess of the United Kingdom. We can't get over how formal and very royal that title sounds. Still, Markle seems content enough to just be known as a mom for now. During her first postpartum interview, she shared how excited she was for Archie. It's magical. It's amazing. I have the two best in the world, so I'm very happy, he said. Keenan, who is now 55 and prefers her/her pronouns, was born with male genes, female genitalia, and mixed internal reproductive organs. But last week, Keenan's tough battle came to an exciting end: He became the first known person to receive an American birth certificate reading intersex, rather than male or female. She celebrated by sharing the news on Facebook, including a photo of a shirt that says, Intersexxy and perfect. The term intersex includes a variety of situations of male or female. The condition occurs once in every 1500-2000 births. Basically, when we're embryos, we're all genetically programmed initially to be born as females, Todd Griffin, MD, chair of the department of obstetrics, gynecology and reproductive medicine, tells SELF. Then if you have a Y chromosome, it forms testicles and produces testosterone and mullerian hormone ban. These hormones then change your growth to go from female to male. If there is any disorder of that-if the hormones are not done correctly or if the cells do not have proper receptors-you can get a disorder in this process. This disruption, he says, can cause someone to be born intersex. After Keenan was born with mixed genitals and internal reproductive organs, her parents decided to keep her intersex identity a secret from her. They initially marked her as female three weeks later. And in her teenage years, Keenan began hormone replacement therapy-to say she was a girl who can't do hormones. For Keenan, the opportunity to have her intersex identity officially recognized is more than a personal achievement. He also sees this as a way for other intersex people will choose to be legally identified as intersex, and not all parents will choose to have their intersex child identified as intersex for birth documents, he said. But for those who do, the choice must exist. While Keenan made history with her Intersex birth certificate, she wasn't the first American to officially recognised as neither male nor female. Oregon resident Jamie—who prefers only a first name—was granted permission to change his identity to non-binary on their birth certificate earlier this year, paving the way for other LGBTQ (and otherwise identifying) individuals to also report to the courts an alternative gender characterisation. This is incredibly humbling to be the first person to achieve this, Jamie said at the time. I hope the impact will be that it has opened the legal door for all those who choose to do so to follow me. We don't deserve to be labeled inappropriate against our will. Congratulations to Keenan, Jamie and the many others who will be affected by this progress in the coming years.
