## Streamlight stinger charger manual

1 2 3 4 5 6 ESTONIAN STINGER ® F C AST HARGER Fits All Stingers (Stinger ®, Stinger HP Stinger XT HP, PolyStinger, UltraStinger ® ® • 4 times faster than standard charger • Charges only 2.5 hours • LED flashes, when the light is fully charged. • The state-of-the-art digital switchsto converts the power supply voltage into a safe and efficient power transfer flashlight. • Negative, delta voltage decharging function prevents overcharging and prolongs battery life. • The backup timer ensures additional supercharge. reduces the drain of the vehicle's batteries in mobile devices (DC devices). • The battery diagnostic circuit shows a bad battery. USE THE STREAMLIGHT STINGER FAST CHARGER USER GUIDE, SAVE THESE INSTRUCTIONS. This guide contains important safety ®, Stinger XT ®, ) ® charger loads the fully exhausted Stinger in good condition within 2.5 hours. When the Stinger is placed in the quick charger, the red LED lights up continuously indicating that the speed of charging is applied. Special switching sensations when the battery has received full charge, switches to lower service charging speed and causes the LED to flash, indicating that the service speed is being applied and that the Stinger has been fully charged. The secondary safety circuit interrupts the fast speed immediately after about 2.5 hours, unless, for some reason, the primary circuit stops the express charge. 1. WARNING! On mobile devices, do not connect the Quick Charger to a switchable power source. The quick charger must be connected directly to the vehicle battery or to the unconsoling side of the ignition by means of a 2 amp-protector. Use a lighter plug only if the lighter jack of the vehicle is not switched off with the ignition switch and only if the plug fits firmly with the lighter. There is a risk of battery damage or explosion if the power supply of the fast charger is repeatedly switched off and on. If the charger gives a service speed, the vehicle's battery is low. 2. Do not charge the battery if the temperature is below 32°F (0°C) or above 105°F (40°C). Battery life is affected by ® charging temperature at extreme temperatures. 3. Keep the flashlight and charger contacts clean at all times. Poor contacts may cause the charger to malfunction. Abrasive pencil eraser works well to clean contacts. ® battery 4. Observe the LED: A. If it does not flash quickly and continuously indicating full charging within 2.75 hours of insertion of the flashlight, check the charger and install the AC wiring that may reset the speed of charge. If no obvious external error is found, return the system to Streamlight for the service. B. If you notice that the LED flashing always takes more than 2.5 hours, especially if the flashlight is not completely deflated, return the system for maintenance. C. If the light bulb does not come stable when the flashlight is inserted, return the system for maintenance. D. The proper operation of the fast charging closure circuit can be tested as follows: insert the flashlight into the charger for at least 5 minutes. Without removing the charger, switch it on briefly for about ten (10) seconds, the LED should switch to flash mode. 5. The high-speed charging system requires a wall transformer #22665-120V, #22664-230V or DC power cord to charge UltraStinger or SuperStinger. Three brightness levels, an emergency strobe and a strong aluminum housing with a comfortable rubberized grip make the Streamlight Stinger DS rechargeable LED flashlight a solid choice for law enforcement, industrial and recreational use under demanding conditions. The C4 LED offers 85, 175 and 350 lumens with a duration of 7.3, 3.8 and 2 hours, respectively, fully charged. Dual, independent push-button switches, one back basket and one in the head, make light easy to use no matter how you hold it. The Strobe device can disorient the attacker or signal for help. The Stinger's 6000 series treated aluminum body has a rubberized handle with a secure, comfortable grip. The scratch-resistant polycarbonate lens is closed with o-rings and the light has an IPX4 water resistance rating and a impact resistance of 3,3' . The light comes with a 120/100 VAC smart charger that can charge light for 3-4.5 hours.
