Pokemon diamond ar codes wild pokemon modifier

This is my favorite section, I love the codes Action Replay has to offer for Pokemon and I love Pokemon in general! I use all the following codes, they are tested and work, so if they don't for you, I made a mistake by posting or typing them. If in any way your original codes with which Action Replay arrived have been deleted, go to this website. You can manually copy the codes or perform an update to the AR-supplied disk. 20DS_17826135-3____.aspxlf don't know what an Action Replay is, it's a product made for hacking games and cheating. This is what codes allow you to do. That's about \$20 in a game store, Target, Wal-Mart, etc. The codes I list are for Diamond, but most will also work for Pearl, and maybe platinum too. You can use the 100% capture rate, shiny modifier code and pokemon all at the same time is what I do. A level 100 code will not work in addition to these three codes. Level 100 and glossy code cancel each other out, so choose one or the other. Oh, and I'll take it back I've added some other codes that aren't tested. Let me know if the codes are wrong and don't work. Wild Shiny Pokemon-Go to the trainer card press R+A alternately. To deactivate press L+A.02064ec8 47104a0002064ecc 0200003194000130 fcte020002066db8 4708490002066dbc 0200001d200000 000000094000130 fcte010002066db8 9501900002066dbc 90022000d200000 000000062000000 95019000e200000 0000004c95019000 900220001c28b40d f06849071c01f04d 2901bc0d4902d101 4902470800004708 02066dc102066d9f 000000095019000 69384a0498046010 4b019a0900004718 02064ed10200002c 0000000d2000000 00000000Wild Pokemon Modifier94000130 FFFF0000B21C4D28 00000000 B0000004 00000000 94000130 FFFF0000 00000890 01ED0001 D0000000 00000000 DA000000 00000892 DC000000 00024620 C0000000 0000000B D7000000 00000000 DC000000 00000006 D2000000 0000000PPress L+R while playingit will give you 493 masterballs in your items pocket.
