Android 4.0.3 and above Watch movies and TV series online, HD, and even subtitled directly torrentfilesPopcorn Time is a program for those who like to watch movies and TV series online on your computer. From torrents spread across the internet, it offers a great catalog of feature films and SERIALS that can be controlled at high resolution. With this, you do not have to look for a file or download a special program such as uTorrent or BitTorrent: just choose the desired production, pop popcorn and start the session. Search works in two ways: searching for terms or genres. In the first, just type in the snippet title to see if the desired movie or serial number is in the directory. Time to open the popcorn! Another resource is for those who like to look more until they find the right production. In it, you can use the left menu and choose your favorite genre, such as action, comedy, or horror. The list of films and other works that appear is in the order in which it is added. By clicking once on the desired movie poster, you will still have the option to choose subtitles (if any) and quality (usually 720p or 1080p), all in the right corner of the screen. It is also possible to check some technical information on the forecast, such as overview, and an asterisk rating. All this created, just put the video to play full screen or reduce it, choose that playback will take place in HD quality – if that's your desire – wait for a piece of it to download in advance and enjoy the hobby. There are many film and television productions to amuse you during your downtime. Watching movies and series online and streaming is in vogue, thanks to on-demand TELEVISION platforms like Netflix or HBO, which offer extensive movie catalogs and television productions of all kinds. What happens is... yes, you have to pay. What things, huh? However, there are alternatives that allow you to enjoy all this audiovisual content for free and one of them is Popcorn Time. The service is based on torrent connections Unlike the above mentioned payment platforms, which use their closed video compression system to show it through web access or desktop client pc, Mac or smartphone, Popcorn offers its service through torrent file connections that download video from temporary folder, which starts recording from the beginning. This is, you can start watching a movie or series episode from the beginning, while the rest of the video is downloaded. Good video quality and excellent catalog. And you don't think it's a low quality app or anything. On the contrary, if you install the APK on your phone or tablet, you can access a carefully designed and very well organized interface where you can browse all of its content. Main features of Streaming playback of movies and series. Integrated search engine. hd quality playback if possible. Last news. Movies and series original version with subtitles. Evaluate the results by evaluation, gender or year of issue. Download the video to watch it offline. As you may already know, this is a service that appeared on desktop versions of Windows, Mac and Linux, although it may also be enjoyed (as in this case) Android smartphones and tablets and even iOS devices like iPhone and iPad (through jailbreak, of course). But it's nice, isn't it? Of course, man (or woman): hundreds of episodes of series, movies, anime, all for free, to watch them, if and wherever you want, without paying a penny ... Anyway, it's not cool, as you can imagine. First, it depends on the laws of your country and then on how you do it under these laws. It's not in vain before that the service has been banned and this is why it offers the ability to browse a VPN to maintain your identity. Why is that? when everything was in accordance with the law? Every time you watch a movie about Popcorn Time, God kills a kitten. Well, if you're a rat and are going to open a wallet to pay for a high-quality video-on-demand service, technical support includes that offers peace of mind that the FBI doesn't enter your home four in the morning breaking the door and you think that those who are involved in the production of audiovisual content have no right to earn a living and need to entertain you for free, here's a searchable app (no, movies and series viewing are not included in the app in the right way).
