Celtic heroes rogue guide

BATTLEBORN greet fellow heroes, currently, hellforged brace farming, will want help from fellow heroes in other servers, is a ra Thu Dec 17, 2020 8:23 Rogues are one of five character classes that players can choose to register. Rogue attacks are based on powerful rapid attacks and stealth attacks. Currently, there are no long-range rogue attacks and they use Daggers? or Spears? as their weapon of choice, however, spears are generally passed by most classes in favor of the exclusive weapon each class. Some more exotic builds include Fist Build, Knuckle-Blade build and rare Poisoner build. This class competes with magi for the class with the most damage per second (or Dps), with magi being traditional hard hitters. Rogues are the most DPS oriented class in Celtic heroes, a rogue's roll is doing a lot of damage quickly A traditional rogue build will be heavy power, medium vitality, low mid dexterity, and low focus A rogue needs to avoid being hit by bosses as much as possible, they don't have enough armor to act as a tank Rogues are my heaviest class to play solo because they have dropped (melee) armor and low heals, however, playing a rogue is one of the most rewarding melee classes To easily level a rogue, I recommend a fire mag, or, if you have survival problems, a druid. When leveling with Casters, Rogues should not be able to take damage, so having a good amount of points in Quick Reflexes for defense, and vitality for health. Alternatively, philosophy, if you don't get hit, you don't need health working. This involves having as much defense and dexterity as possible. This is rare, and most rogues choose a more conventional build. Rogue Guides: Rogue skills are following: Poison Weapon - add dmg poison to the weap. Quick reflex - add defense, increase the chance to dodge. Quick strike - dmg. Render - dmg + short damage over time (DoT). Sneaky attack - use when you don't have aggro's mob, a lot of dmg. Assassination - use when the mob is 30% health or lower, a lot of dmg. Life steal - dmg and heal yourself by the amount of dmg done. Hide - hide from mobs, like an invisible short-term potion, x level mobs below can not see you, increase skill to increase x, enter the fight cancels. Play Dead - pretend you're dead, mobs x level below will assume you're dead, increase skill to increase x, when your under the effect you have 0 armor. Distraction - aggro transfer to another player when you have it. Shadowstrike - teleport to mob and dmg. Expose weakness - reduce the evasion of the mob's skill. Bomb - decrease in mafia defense, increase the chance of hitting. Riposte - counter an enemy attack for 6 seconds. This table shows the energy consumption for each Rogue skill at each skill level.
