## Unr math center hours

I wanted to spread the word to students because our website is not yet updated. The University Mathematics Center provides Drop-in tutoring via Zoom. Students must use the UNR Zoom portal: , connect with their NETID, and use the following meeting ID: 163-238-689 to access the Mathematics Center. The hours of operation for remote tutoring will be the same as our normal operating hours: Mon-thur: 8am-8pm, Fri: 8am-4pm, Sun: 1pm-8pm. The exam sessions will also take place via Zoom, with class students receiving an email informing them when the exam session takes place and the corresponding meeting ID. Help us spread the word! A free 50-minute one-on-one appointment for undergraduate students. Plan an appointment for math, science, business, foreign languages and more! The Mathematics Centre offers a number of services to students. In the fall of 2020, students can access the Mathematics Centre in person or remotely during our business hours. Access the Mathematics Centre via Zoom Our tutors, their specific hours and skill level can be found on our people page and our schedule. What We Offer The Mathematics Center offers free mathematics and walk-in tutoring statistics for students enrolled at the University of Nevada, Reno. If there is no limit to the number of times students can visit the lab during the semester or how long they stay. Our 40-station computer lab is equipped to help students with traditional questions as well as online homework. The Mathematics Centre also offers exam sessions for exams in Math095 courses at Math330. Typically, these sessions last 90 minutes and take place the day before and on the day of the exam. The tutors who lead the session review the examination materials provided by the instructors. Students are expected to have passed the material in advance and come and ask questions. At the end of the semester, the Math Center organizes its popular Final Examination Rally. The Rally takes place on Wednesday before the finals (Prep Day) and on Sunday between the finals. The final exam sessions are two hours long and provide an overview of the course. Make the most of your visit on your first visit to the Mathematics Centre, let the front desk know; they will allow you to set yourself up and give you more information. Don't wait just before the test for help. Come early. Come here a lot. Sit down with the others in your class. You will learn better by working together and will have more waiting time Tutors can help students more quickly when people sit down together. Prepare. Tutors will be more effective if you have your text and take good class notes. Each semester, students are required to sign our student policy form (listed below) on their first visit to the Mathematics Centre. Mathematics Centre Student Policies: Tutors anticipate that students who use the Mathematics Centre will perform the following operations: attend the class and take notes. If they miss a class, they are responsible for getting notes and reviewing the material before before In. Try the problems on their own before asking for help. Prepare specific questions about their course materials. Review exam documents before exam sessions at the mathematics centre. Try each problem before you ask for help so you can ask a specific question. Bring the necessary documents to the Mathematics Centre: notes, text, assignments, exam sheets, etc. Students who use the Mathematics Center can expect that the tutors will be: Be patient and respectful. Listen carefully and carefully to their questions and concerns. Help them become independent problem solvers. Help them identify barriers to learning and develop strategies to address them. Encourage them to work independently during the session. Help them learn successful study and testing strategies. Ask unprepared students to review specific documents before returning to help. Students who use the Mathematics Centre should be aware that: a student card is required for each visit to the Mathematics Centre. Knowing your NSHE ID is not a substitute. Tutors are required to rotate between students when the lab is busy. The tutors do not have all the answers, because they are also students and not professors. Occasionally, a tutor may ask another tutor to take over if they are unable to answer your question. Students may be invited to work in groups if they work on similar documents. No open food or drink is allowed in the laboratory. Talking on the cell phone is not allowed in the lab. Students are expected to leave the Mathematics Centre to make/accept calls.
