Bluetooth receiver for stereo amplifier uk

Best Bluetooth Audio Receivers of March 2020 Our list of the best Bluetooth Audio Receivers is currently celebrating its fifth year of delivering updated prices and specifications of the best Bluetooth receivers on the market. If you're looking for a high-quality Bluetooth audio adapter, we're sure you'll find it here. Bluetooth 5.0 is available on most flagship phones, including Apple iPhones. This was an impressive leap in terms of stability and performance across the previous Bluetooth versions, so any Bluetooth receiver in 2020 that doesn't have Bluetooth 5.0 has a serious handicap over those who do. There are, of course, other factors to consider, such as apt-X Low Latency codecs from Qualcomm. Apt-X LL Bluetooth streaming technology guarantees that audio syncs perfectly with video. This is an important consideration if you're looking for a Bluetooth transmitter receiver for a home entertainment system. A dedicated Bluetooth audio receiver with Bluetooth 5.0 replaces Bluetooth 5.0 transmitter receivers in our list of the best Bluetooth receivers in 2019. That said, standalone Bluetooth receivers have been a little slow to adopt Bluetooth 5.0 compared to hybrid Bluetooth transmitter receivers (those that can switch between sending and receiving audio). Although I am reluctant to include these types of devices in this list, I think in some cases, they are a better option compared to older versions of dedicated audio receivers. I've separated the dedicated Bluetooth 5.0 music receivers from the hybrids. In addition, I have also included some tried and tested Bluetooth 4.2 audio receivers at the bottom of this list. These will be fine for those with no intentions of upgrading their smartphones for the foreseeable future. As always, our list of the best Bluetooth receivers in 2020 will continue to evolve as existing Bluetooth receivers update the technology and as new models are released. #1 – Audioengine B1 Premium Bluetooth Receiver Audioengine B1 is an Audiophile quality Bluetooth receiver with aptX codecs, 24-bit up sampling and DAC. The build quality is made of aluminium and high-end sound quality components, and is as precise as the sound performance. It has recently been upgraded to Bluetooth 5.0 as described on the technical specifications page on their website. Audioengine B1 is in our opinion the best audio Bluetooth receiver on the market today. – more info. *Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are accurate from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #2 – BluDento Bluetooth Music Receiver BluDento Bluetooth Reciever is a serious contender as the best Bluetooth audio receiver, especially when to the price of audioengine B1. It features aptX HD and low-waiting time codecs, the latest Bluetooth 5.0, an optimized antenna for a range of up to 100 ft and comes with a 3-year warranty. – more info. Receiver Model Bluetooth aptX Codecs Range BluDento BLT-HD 5.0 aptX, HD, LL AAC, SBC 100ft (30m) Profiles Outputs Technical Features A2DP, EDR RCA, Digital Optical, Coaxial Built-in DAC: TI/Burr-Brown PCM5102A. Price: \$99.00 | \$149.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #3 – Auris Blume HD Bluetooth Audio Receiver Auris Blume HD Bluetooth Audio Reciever features a precision tuned high-gain 30m antenna for long-range Bluetooth streaming and multi-room coverage. It has the latest Bluetooth 5.0 technology for a reliable signal and can support 24-bit audio streaming directly from your phone or tablet. – more info. Receiver Model Bluetooth aptX Codecs Range Auris Blume HD 5.0 aptX, HD, LL AAC, SBC 100ft (30m) Profiles Outputs Technical Features A2DP, AVRCP RCA, Digital Optical (SPIDF) Best in class genuine Hi-Fi 384kHz/32bit upsampling audiophile DAC - PCM5102A by TI which has a high SNR at 112d Price: \$119.00 | \$199.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #4 – Besign BE-RCA Long-range Bluetooth audio receiver Besign BE-RCA Bluetooth Audio Receiver has a long-range antenna that supports a streaming distance of 30 meters. It runs on Bluetooth 5.0, has the latest AptX Low Latency codecs and is good value for money. – more info. Receiver Model Bluetooth aptX Codecs Range Besign BE-RCA 5.0 aptX, Aptx LL SBC 100ft (30m) Profiles Outputs Technical Features A2DP, AVRCP RCA, 3.5mm AUX A very affordable Long Distance Bluetooth Audio Receiver with later technology. Price: \$23.99| Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. The Bluetooth Audio receivers above are the only high-end Bluetooth 5.0 music adapters specifically designed to be receivers. There are a number of Bluetooth 5.0 audio adapters that will transmit as well as receive. Even if they are not of the same like Audioengine B1 or BluDento BLT-HD, they can be ideal for those on a budget. In Bluetooth transmitter mode, these will allow you to use a home stereo, TV or etrainment system to wirelessly power to a set of headphones. You may not intend to use this feature. But the fact that they also receive, and include the latest Bluetooth 5.0 and aptX codecs, makes them a viable option over older dedicated Bluetooth audio receivers. #5 – TaoTronics Long Range with Bluetooth receiver, TaoTronics Bluetooth receiver transmitter sends incredible value for money. It has Bluetooth 5.0 and aptX Low Latency codecs. This audio adapter has an integrated battery with up to 25 hours of play time, but you can leave it plugged into a power source via the USB charging cable. – more info. Receiver Model Bluetooth aptX Codecs Range TaoTronics TT-BA09 5.0 aptX, LL SBC AAC TX 164ft (50m) Profiles Outputs Technical features A2DP, ACRCP 3.5mm AUX, RCA, Digital Optical, (TOSLINK) Has an internal battery with 25 hour play time and charges from USB. Price: \$46.99 | \$49.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #6 – Mpow 2-in-1 Bluetooth receiver transmitter The Mpow Bluetooth receiver transmitter features the latest CSR8675 chipset that offers apt-X HD and Low Latency ideal for listening to audio along with the video without sync problems. This Bluetooth receiver supports both SBC and AAC codecs and has an impressive range for an audio adapter without an external antenna. – more info. Receiver Model Bluetooth aptX Codecs Range Mpow 2-in-1 5.0 aptX, HD, LL AAC, SBC 50ft (15m) Profiles Outputs Technical Features A2DP, ACRCP 3.5mm AUX, RCA, Digital Optical, (SPDIF) Has an LED indicator to tell you which codec is used. Price: \$31.99 | \$39.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #7 – Mpow 2-in-1 Bluetooth receiver transmitter The Blitzwolf Bluetooth receiver transmitter has the largest range of a Bluetooth audio receiver currently on the market. The whole 100m! – I suppose this is subject to the use of a Bluetooth 5.0 compatible phone and a completely unobstructed display of the adapter. The BW-BR4 Bluetooth music adapter comes with an optical cable included. – more info. Receiver Model Bluetooth aptX Range Blitzwolf BW-BR4 5.0 aptX, HD, LL AAC, SBC 328ft (100m) Profiles Outputs Technical Features A2DP, ACRCP, 3.5mm AUX, RCA, Optical Dual Stream - can connect to two devices simultaneously. Price: \$32.99 | \$49.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #8 – Avantree Oasis Plus Bluetooth Audio Receiver Avantree Oasis Plus Bluetooth receiver has aptX Low Latency codecs to eliminate audio delays when watching movies or playing video games. It has a convenient display that makes it easy to identify which mode the Bluetooth adapter is pouring in. Owning two of these will allow you to use True Wireless Stereo mode (TWS) that sends left and right channels to separate speakers. – more info. Receiver Model Bluetooth aptX Codecs Range Oasis Plus 5.0 aptX, LL SBC 164ft (50m) Profiles Outputs Technical Features A2DP, AVRCP 3.5mm AUX, RCA, Optical Toslink Has Pass-Through Support and Independent Device Volume Control Price: \$79.99 | \$109.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. The Bluetooth stereo adapters below were once contenders on our list of the best Bluetooth audio receivers in 2019. With hope, many of these will take a leaf out of Audioengine's book and update to Bluetooth 5.0, as they did with audioengine B1. Meanwhile, these Bluetooth receivers are still doing a decent job and are absolutely good options for those with dated smartphones or iPhones older than the iPhone8. #9 -1Mii B06 Plus Bluetooth receiver 1Mii B06 Plus Bluetooth audio receiver is one of our favorite Bluetooth adapters still running on Bluetooth 4.2. The range and reliability are impressive, and it benefits from the CSR aptX Low Latency codecs. 1Mii B06 has a unique 3D setting that gives more space to the soundscape. – more info. Receiver Model Bluetooth aptX Codecs Range 1Mii B06 Plus 4.2 aptX, LL SBC 164ft (50m) Profiles Outputs Technical features A2DP, AVRCP 3.5mm AUX, RCA Includes a 3D Surround Sound Mode - the blue led ring will turn green when active. Price: \$27.99 | \$29.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. #10 – Besign Bluetooth Audio Receiver Besign BE-RX is a long-range Bluetooth audio adapter with aptX and Bluetooth 4.2. It operates with a DC5V supply and comes with an AC adapter. This Bluetooth receiver is designed to require manual transmitter before use. A feature that helps prevent accidental pairing to your phone. – more info. Receiver Model Bluetooth aptX Codecs Range Besign BE-RX 4.2 aptX SBC 100ft (30m) Profiles Outputs Technical features A2DP, AVRCP 3.5mm AUX, Optical, Coaxial Must be manually turned on every time you use it - Useful to prevent accidental pairing. Price: \$29.99 | \$49.99 | Check price on your local Amazon Marketplace * Price last updated on October 6, 2020 at 09:00 GMT Product prices and availability are exactly from the date/time specified and subject to change. All pricing and availability information displayed on Amazon at the time of purchase applies to this product. We are constantly looking for the latest Bluetooth Audio Receiver models and checking the prices of our existing choices.
