Brandon Mull Interviews Raxt Dragon Raxt, a fabulous dragon, much smaller than the average winged reptile that you may encounter in the Fablehaven series. He was raised by fairies, and can become invisible by his will. Learn how he is waging war against the centaurs with the help of a young fairy named Kendra in Fablehaven: Secrets of the Dragon Sanctuary. Brandon: Thank you for agreeing to this interview. Raxt: I'm open to new experiences. Within reason. Brandon: You're not a typical dragon. Raxt: Wow! So much for a little conversation. No, much to my shame, I was incubated and raised by fairies, so I sparkle and I'm much smaller than average. Also, my breathing weapon is a joke. Among other things, it makes the flowers bloom. Enough humiliation? I can go on. Brandon: Do you feel like other dragons don't see you as equal? Raxt: I get it. My humiliation remains incomplete. No, other dragons think I'm funny. My father is really a big, important dragon that reinforces my shame and also explains why I'm still alive. Few dragons would willingly cross my father. Brandon: Unlike many dragons, you've made friends with people. Raxt: I like people. Since dragons have rejected me, I get some of my vicarage thrills by spying on human culture. I love action movies. Brandon: Can you get into the theater? Raxt: As a last resort, yes. Often I'll just find a car. They're a dying breed, but they're still close by. Not the best sound, but I like the open atmosphere. Do you want to talk about movies? I can walk for hours. Brandon: Another time. I understand that you are not limited to a specific dragon sanctuary. Raxt: That's right. I like Wyrmoost, and spend more time here than any other sanctuary, but I am free to roam the world, including many nature reserves that others cannot access. Brandon: What is the purpose of these sanctuaries? Raxt: Don't you know? Brandon: I'm just trying to communicate to the uninitiated. Raxt: Gotcha. Over the centuries, magical creatures around the world have been gathered to make secret wildlife refuges. Some remain in the wild, but most have retired to these hidden nature reserves. Dragons and some of the more powerful creatures live in special reserves called dragon sanctuaries. That will do? Brandon: Perfect. You know Kendra Sorenson. Raxt: She is a credit to humanity. And the fairy. I'm a fan. Brandon: And you met Warren. Raxt: Don't remind me. I always find new ways to embarrass myself. I turned it into an art form. Brandon: Where do you see yourself in ten years? Raxt: Ten years is a moment about a dragon. We live a long time. It's after all, that I'm asking where you see yourself in 10 hours. Brandon: Spieth. Raxt: I get it. You need an answer. I've always wanted to write, or maybe draw, or I could finally go to graduate school. I am Told you I studied people! The real answer? I'm probably still lurking around, hopefully inching inching seeming a little more draconian. Brandon: What's your favorite food? Raxt: I love food! Don't take me. So many flavors! It depends on my mood. Lately I've been in a hippo. It should be fresh. The Orchs are good. Brandon: Remind me, what are irrigated? Raxt: Kind of like giant bulls. Really meaty. Brandon: I think we'd get along. I'm talking about steak. Raxtus: I take mine very rarely. How I was breathing recently. Brandon: How do dragons view other magical creatures? Raxt: Most dragons are well aware that they are alpha predators, the pinnacle of the food chain. Sharks of the sky. We are threatened only by other dragons and perhaps the most powerful wizards. Many beings become paralyzed in our presence, including humans. Dragons usually treat other creatures as food. But dragons like to consider themselves intellectuals. If a creature can harness the dragon's intelligence, it can survive a collision. Catch? It can be difficult to have a stimulating conversation when you are paralyzed. Brandon: Some dragons have human avatars. They can take human form. Raxt: That's right. Some dragons frown at the idea. Others find great fun in the exercise. I don't have a human avatar. Which could be a good thing. If I did, I could rarely use my dragon shape. Brandon: You really love people. Raxtus: Shame as it may seem, I do. Among the dragons, I am alone in this opinion. Brandon: Dragons don't particularly like people? Raxtus: Some do, mainly because masters tend to use the human form. Many dragons give humanoids little thought, considering them parasites, if anything. Several dragons held human pets or servants, but usually not because of love for humanity. A specific person can sometimes find favor with a specific dragon. Brandon: But most dragons will just eat people. Raxt: Absolutely. Brandon: It was instructive. Any kind of thought? Raxt: Stay away from dragons. I may seem friendly, but I'm an exception to the rule. Even I sometimes enjoy the smell of people. I refrain from eating people for philosophical rather than gastronomic reasons. Brandon: Thank you for speaking to me. Raxt: Anytime. --This text refers to a hardcover publication. The horn is needed to gain access to Wyrmoost, where the key is hidden and guarded by scary creatures. Overall I probably wouldn't hand this book to a reader younger than twelve years old because I doubt they'd make it fablehvaen way through no matter how good the story is. Then be prepared to write, draw, decide and create, guided by many activities inside, including the origami Rakst Dragon. Still enjoy this series, enjoy the dragons and challenges facing the team, and that unexpected twist towards the end of the book! I even recommended it to people - people who went on to enjoy the series, in general, more than I seem to be doing. CASTELLI DI RABBIA BARICCO PDFI don't want to be able to sing too much history, so I'll just mention that there will be a betrayal and a shocking revelation about one of the characters. The ending wasn't a super cliffhanger, but it definitely left some big questions open. Brandon Mull's Trilogy Beyonders. I was just going to ho hum to read this book when low and behold!!!
