Use your blog settings to block zombies trying to attack your annoying home like crazy, right? If you want to cheat a bit of lil and take them out without getting exposed, do this - remember that zombies measure at 2 x 3 blocks, place extra blocks on the floor near your door so you have to step up over the upcoming swarm of zombies. This special blog allows you to hack zombies from the security of that special blog. Those zombies won't come inside anytime soon, which is why this is one of the most important Terraria cheats we have here.
