Open Up and Bleed: WILD images of Iggy & The Stooges performing '1970' in 1970! There are many urban legends in rock 'n' roll. One is that Stooges bassist Dave Alexander was fired in 1970 after attending a utterly shitty show for a concert at the great Goose Lake rock festival. He claimed Alexander was too fucked up to stand, let alone play his instrument, so Iggy fired him. Wow, this guy even got so messed up for sidestepping the issue ... Stooges? Is that really what happened? Well, perhaps not, the heroic Third Man Records label soon saw an exciting new finding coming to you: the stooges performance apocryphal story at goose lake festival has been told countless times over the past five years. Bassist Dave Alexander certainly gaps in front of 200,000 attendees, because of nerves or over-fondness or preference to fill it empty no matter what. He wouldn't play a single note on stage. He was fired by Iggy Pop immediately after the concert. Here begins the beginning of the end of the Stooges. But what if it's just ... Isn't that the case? What if you could prove other way? The sudden, crime scene of folk people booing Dylan's electric set in Newport in 1965 could be the equivalent of proto-punk. I can't deny what really happened. Other delicious analogue artifacts of the same era were found buried in the basement of a Michigan farmhouse, where the 1/4 Stereo two-piece band was Rosetta Stone for fans of this seminal band performing full performance of the Stooges at Goose Lake on August 8, 1970. Not only is this original godhead Stooges line-up performing at the last time, but this line-up is just a well-known soundboard recording. Their canonical 1970 masterpiece Fun House, sound, performance, is the revelation that they play everything about this recording in its entirety. Can you believe this... Is Alexander actually stealing bass on this occasion? Or, despite heavy failures in some songs, how solid Alexander was with others? Especially dirt and fun house? Does Iggy provoke the crowd to break down festival barriers? The powers that pull the plug on the Stooges? So many questions are answered just to reveal more. It's the 50th anniversary of the performance. Dave Alexander, a heavy drinker, died in 1975 at the age of 27. A few years later, Iggy's verbal introduction to The Idiot's Dum Dum Boys was name-checked: How's Dave?? Od' d in the need for alcohol. The Stooges: Live at Goose Lake: August 8, 1970 will be released on August 7. Pre-order here from the Third Man online store. Alexander attended Pioneer High School in Ann Arbor after his family moved from Whitmore Lake, Michigan, to Ann Arbor, Michigan, and met brothers Ron and Scott Asheton. Zander (known as Alexander) left to win a bet after forty-five minutes on the first day of the last year in 1965. Then, in 1965, Ron sold his motorcycle[2] and they went to England to see The Who and try to find The Beatles. Alexander and the Asheton brothers met Iggy Pop shortly afterwards and founded The Stooges in 1967. Although Alexander was a complete novice in his instrument, he was a fast student and later had a hand in editing, composing and performing all the songs featured on the band's first two albums, The Stooges and Fun House. He was famous by the late Ron Asheton as the main composer of music for the Stooges' We Will Fall,[3] Little Doll (both The Stooges), Dirt and 1970 (both at Fun House). Alexander was fired from the band in August 1970 after attending the Goose Lake International Music Festival very drunk. [3] Death Alexander died of pulmonary edema in 1975[4] at the age of 27 in Ann Arbor, after being hospitalized for pancreatitis linked to alcoholism. [5] She mentions Alexander in Mike Watt's song The Angel's Gate on 2004's The Secondman's Middle Stand, and watt replaces Alexander in the newly named Stooges. In tribute to Watt's first performance with the Stooges at the Coachella Valley Music and Arts Festival in May 2003, he wore a Dave Alexander T-shirt. External links Lost Stooge: Dave Alexander Chasing Dave Alexander's Ghost Open Up and Bleed site The Stooges Live at Goose Lake: August 8, 1970 THIRD MAN RECORDS 9/10 Proto-punk fiftieth anniversary, pre-No Wave noise at a time celebrated by Rhino with a set of fifteen vinyl boxes at Totem Fun House (this is worth the expensive entrance fee), third man's original Stooges artist's final set is all down holiday with single live recording. Sure, Iggy Pop, the Ashetons, and avant-garde saxophonist/guest Steve Mackay (bassist Dave Alexander was dismissed from their set below) are still focused on the fresh Fun House at the time, but really manic, panicked, a group of raw power centers tearing at his tethers, and this Goose Lake concert makes a primitive treatment unleashed by strange chemicals-and legendary stuff (see Jim Jarmusch's Gimme Danger for this account). Much superior to the recorded Metallic K.O., but clinging to the rough, brutal thwack of The Stooges, Live at Lake captures the band in full, along with the frenzied death-fainting, horse-tranquilizer-laced mess of a festival (Goose Lake International Music Festival, less), fellow Michiganders Bob Seger and MC5. From Mackay's free string solo in the elastic enchanting Fun House to curt, the (strangely) voluptuous Stooges cutting through the buzzsaw of the T.V. Eye, Iggy's-their howling frontman, a singer's slimy rag-i was at best, in the most menacing form. Each short Ron Asheton guitar solo pokes with the intense mix of Goose concerts like a machete in a candy cane area. From punching the first pieces of the set like Loose to the gloomy blues of Down on the Streetin and finally the lamentations of L.A. Bluesun, the group is drowning in melted lava flames from wear as a whole (as if a black lace dress was a stitch). 1970 (I Feel Alright) has a tribal funk. Bass-bin-driven Dirt, quite frankly, titled aptly, swollen in a groove (not until- apparently cut off from his ampere) and just grumpy enough to get the iggy cause Alexander to fire after this show. And before this concert, as usual, Iggy believes it's front and center, think again: better and worse-mostly better-this volume-up shows how the live moment And as a unit of the unique Stooges, a candle at the same time burning both ends, but doing it together. The organizer behind the 1970 Goose Lake International Music Festival near Jackson promised Michigan a good time. Announcing the three-day event, the newspaper ad wished peace to jethro Tull, Chicago, Faces, Bob Seger, MC5 and all the brothers who wanted to see a dozen other bands for \$15. It wasn't exactly a nightmare that Altamont was the year before, but government officials in Michigan condemned it as a shit show. 200,000 spectators tripled the expected capacity, and they were all banned from leaving the garden's barbed wire fence enclosure. Sketchy drugs were everywhere, which caused more than 500 people to be treated for bad journeys on the first day only; It was revealed that he had horse tranquilizers, people digesting cocaine or PCP, multiple reports emerged. The governor later gave a speech condemning the deplorable Goose Lake issue, and the organizer was accused of encouraging the sale of drugs. This was the appropriately chaotic scene in which the original cast of the Stooges revealed what was his last show. The band's Goose Lake set took place a month after Fun House was released, and they performed their brand new masterpiece in their entirety all summer, building the Iggy Pop legend as a deranged artist in front of larger and larger crowds. Earlier that summer in Cincinnati, a dog should be pulled out with peanut butter on his chest with a dog's wearing a cane and long silver gloves. Think about what it felt like to see the Stooges perform 1970 at a sweaty outdoor music festival in 1970— when Iggy dives into the front row, move forward with a stream of crowds, with Ron Asheton constantly shouting I feel good when he's tearing up one of his best hooks. Then, with adrenaline sky high, Steve Mackay's freeform saxophone solo band can feel Scott Asheton's bass drum kicking in your chest as the hypnotic Fun House twists through the groove. Psychedelic music that threatens the wild, and they're all anchored by a small Michigan cini that swings unpredictably near the front of the stage. It certainly makes perfect sense why Third Man has expressed hesitation about extinguishing a live Stooges album from this period, and at the same time, iggy has officially expressed hesitation about the newly unearthed Goose Lake sound sanction. It's a lousy night at stooges lore. Jim Jarmusch documentary Gimme Danger, for example, mostly beats two different stories into this event disting: Iggy set and bassist Dave Alexander took bad drugs just before the fire. Legend has it that Iggy walked into a tent with some wild people. it was cocaine and he suffered temporary amnesia just before he took the stage. He looked, but alexander, who pulled together, apparently sucked to play a lot. Iggy said Alexander froze and didn't play a note. Scott said someone pulled the plug on Alexander's amphin. In any case, Iggy fired the bassist immediately after the show and closed the book on the cast that made The Stooges and Fun House. Live at Goose Lake's biggest surprise is that the Stooges' performance has surpassed the long-awaited narrative that this is not a great show for them. If you've ever loved a Ron Asheton guitar solo or hook, I know this album is full of this. If your love for Fun House is partly defined by Mackay's saxophone performance, definitely buy this album and listen to his work on the B side first. Meanwhile, Iggy offers all the nuances needed to make music from Fun House. He sings slowly, he shouts with authority, and-why not-he even provokes a little rebellion. Iggy briefly flouts the real lyrics of TV Eye, and the obvious frustration about festival security doesn't allow her to dive into the stage, she starts singing about big ol' wall and screams RAM IT. A security guard, interviewed by Creem's Jaan Uhelszki for goose lake liner notes, confirmed why this large crowd was the moment when people started tearing plates in front of the stage. As for Alexander, his presence on the album is a major selling point of Third Man's Live at Goose Lake LP. Late bassist so-called non-performance biographies, documentaries and Iggy interviews have been gospel for years, but through this newly released audio you can hear all of Alexander's bass. I mean, yes, he was playing and he's stuck, but no, he didn't play a perfect set. It clearly extends loose with palpabl gaps that should be bass, and Alexander has other parts either behind the rhythm or playing completely the wrong notes. And to his credit, he often reveals the most important time. Dirt depends entirely on climbing Alexander's bassline, trudging, and he's definitely there, doing the work of building the foundation of the song. But then it was tainted for important parts of two important issues: 1970 and TV Eye. This gap is confusing and distracting- especially besides fun house work this stack of performances. Goose Lake is not the careful work of the Stooges in Elektra's L.A. studio, and most '70s live albums don't have the luxury of standard net production quality (like Bob Seger's Live Bullet and Neil Young's Live Rust). Goose Lake tapes were recently found in the basement of a festival sound engineer. When it's sound In greatly good condition, the vocals delete each instrument as soon as Iggy screams (which happens quite often here) and there are several brief moments during the closing fun house and the L.A. Blues freakout where the sound drops completely. Goose Lake's impressionist and imperfect sound quality feels appropriate for an album that captures the band's less performing and more human moments. Flubs, stage joke, audience chatter and interstic atox all feel like a breath of historical document in a way that can't even catch stooges' studio albums. Turn up the volume for everything that's going on between feathers and screams - in the moments when everyone on stage catches their breath-and you can imagine what it's like to watch this incredible band somewhere on Michigan summer night in a sea of corpses and drugs.
