Solar 2175 wire feed welder manual

I found a local autobody shop that has a close sale. I was interested in their solar 2175 wire Fed Gas Mig Welder. It comes with all the accessories, a great 80cfm tank, and it allows you to choose a cool timer function for the ect welding spot. Here's a description: SOL-2175 SOLAR 130-AMP AUTO BODY MIG WELDER, designed specifically for use in auto workshops. Accurately calibrated controls allow you to quickly reset with minimal twisting of the handle. The finishing design easily fits into the hard work compartments. The basket allows you to take a welder, gas cylinder and materials where you need them. The thickness of welding steel from 26 gauge to 1/4 in one aisle, welded seams to 1/4 of aluminum without expensive attachments. Welds in all positions - vertical, horizontal, overhead or flat. The unique wire feeder mechanism holds 0.024, 0.030 and 0.035 inches of wire. Wire feed is endlessly adjustable from 50 to 700 inches per minute. Nine position heat selector, spot welded selector duration, switch welding duration and interval selector give you exactly the type of welding you need. Sold with a trolley, a cannon, a wall vessel, a ground cable, contact tips, 3 nozzles, 2 disk rollers, steel and Teflon liners. Does anyone know anything about these cars? Are they worth it? Finding them is about \$1500-2500 new. Why would you spend that kind of money on a ized from a brand, you could get a new Miller 201 for around this or less not including a bottle and it has twice as much energy. A similar 2160 sells for as little as \$967 at a source tool. Designed specifically for use in car repair shops for body repair... If you really believe that you'll be much better off buying swamps I'm selling in Arizona... Like Carey said, get an MM210 - he'll eat sunny for lunch and have a place for the desert. About \$1,300 of these stores are on eBay. Barry Milton and HTP Invertig 201 HTP MIG2400 Miller Trailblazer 302, Spoolmatic 30A, Suitcase 12RC Clark Hotshot Swampland in Arizona? What a concept! LOL Well, I forgot to mention these retail prices brand new. It's used and I can get it for \$500. Don't you think that might make a small difference? Okay, its still to go, only paying off the value of the bottle in the whole deal and lets you just say its worth 250 tops if its full that leaves 250 for a machine that will make it about the retail value of the new in-store discount so it's still to pass. I would throw another 250 on this deal and get a new 140. You'll have something that works a long time instead of one of those dust collectors that no one is quite sure is it me or is it this welder? Your experience will be less satisfactory. There are a few cheap machines that work but you pay your money and takes your I had a piece of shit eater that worked forever, hey this happens, we tried to wear it. I got 3 or 4 others that had 10 or 20 hours of service. Since then I have bought the premium award lasts a long time with abuse, the same with a chainsaw, one with enough power lasts and does the job. Welder is that way too, that doesn't mean you can't use pos, but chances are it won't work as well and the amenclod guy AVG life. Originally published as Sberry View Post don't you think that might make a small difference? Okay, its still to go, only paying off the value of the bottle in the whole deal and lets you just say its worth 250 tops if its full that leaves 250 for a machine that will make it about the retail value of the new in-store discount so it's still to pass. Welder is that way too, that doesn't mean you can't use pos, but chances are it won't work as well and the amenclod guy AVG life. I agree, it would be better to have HH140, MM140, Lincoln 140, thermal arc (regardless of the name of the model 120V), or maybe used 135 of any of the listed brands IMHO. Respectfully, George Hobart Handler 210 w/DP3035 - Great 240V small Mig Hobart Handler 140 - Great 120V Mig Hobart EQUALISER Handler 125 - IMO Best 120V Flux Core only Miller Dynasty machine 200DX with cooler my design, works for me Miller Spectrum 375 - Nice Cutter Well My Teague is a thermal arc 185 I like. Powerful, as for such a small package and such a good price. It's a great car. So even if I get this whole deal, could I make some money by reselling it, and I could get 210, maybe used to under grand? I know the cost of a bottle is worth it in itself. I'm going to check the welder before I buy anyway. I know someone will buy a thing for what I paid minus the tank. The funny thing is, my present moment died last summer. It's a cheap \$100 Chicago Electrician. It works on and off. The guy's interested in that. I hope it will knock down \$100, so it will be \$400 for the entire installation. Hey, kill two birds with one stone. So even if I get this whole thing, I could make some money reselling it... To whom this welder is a 130 amplifier unit made by Century Electric ... not exactly a household name like As Sandown said, it looks roughly equal to HH140 - those selling for \$450, tax-free, free shipping. You'd be very lucky to sell a non-name, used, 130 MiG for \$200 if that's the case. You can lose money by reselling it. This thing is a dog. Barry Milton and HTP Invertig Invertig HTP MIG2400 Miller Trailblazer 302, Spoolmatic 30A, Suitcase 12RC Clark Hotshot Miller, Hobart and Lincoln quickly come to mind. Barry Milton and HTP 201 HTP MIG2400 Miller Trailblazer 302, Spoolmatic 30A, Suitcase 12RC Clark Hotshot Solar 2175 I have one, they are good machines. But solar and century welding machines are no longer done. The companies were bought by Lincoln, who stopped producing parts for them. They still make the Chargers. The insides are hard to find. If it was me, if everything works well on it and you can get it for about 100 dollars. I'd like to pass it on. Yes, good luck, I agree, it's worth about a hundred used to the right person. What someone claims is that its retail value is new doesn't matter. My neighbor has his sense of what things are worth, something is wrong with his car,... buttttt it's 30K Jimmy, no, it's not like one new as it would be 30 retailers, but its 10 years old, it's a \$5,000 car.
