Create a new google account page

English (United Kingdom) English (United States) Español (Latinoamérica) English (United Kingdom) English (United States) Español (Latinoamérica) If your company already has a Google Development Account, you can skip this section. Otherwise, please read it. It is recommended that you set up one company email address that you would use when signing up for internet services (instead of using your own email address). In this way, other employees in the company can access the account as needed. You can start creating an account by navigating to the following URL: [instructions for creating an account](#). Click on [I prefer to use your current email address](#) link so you can enter your business email address (instead of having to create a new Gmail account). For more information about creating a Google Account, travel to: [Next: Signing in to Google Developers Console /en/googleaccount/getting-to-know-google/content/](#) Introduction Creating and Google Account is pretty simple. You'll need to provide some basic information, such as your name, age, and location. Once you've created and verified your account, you'll be able to use Gmail, Google Docs, Google Calendar, and many other services. In this lesson, we will show you how to create an account. Create an account To create a Google Account, you'll need to enter some information, such as name, date of birth, and location. Creating a Google Account will automatically create a Gmail email address. If you have a Gmail address, you already have a Google Account so you won't have to create an account. You can easily sign in to Google using Gmail data. To create a Google Account, go to [www.google.com](#). Locate and select the Sign in button in the upper-right corner of the page. Click Create Account. The application form appears. Follow the instructions by entering the necessary information, such as name, date of birth, and gender. Review Google's terms of service and privacy policy, click the control box, and then click Next Step. The Create Your Profile page appears. Click Add Photo if you want to add a photo to your profile. If you don't want to set up a profile photo at this time, click Next Step. Your account will be created, and a Google Welcome page will appear. Just like with any online service, it's important to choose a strong password — in other words, one that's hard to guess someone else. For more information, review this lesson of creating strong passwords from our Internet security guide. [/en/googleaccount/understanding-google-privacy/content/](#) Google Account gives you access to many Google products. With a Google Account, you can do things like: Send and receive email using Gmail Find your new favorite YouTube video Download a Google Google Step 1: Choose a Google Account type for yourself To manage your business Important: When you create a Google Account for your business, you can turn on business personalization. Your business account also makes it easy to set up Google My Business, which helps improve the visibility of your business and manage your online data. When creating a Google Account, we ask for some personal information. By providing accurate information, you can help keep your account secure and make our services more useful. Tip: You don't need a Gmail account to create a Google Account. You can use your non-Gmail email address to create one. Go to the Sign in to Google Account page. Click Create Account. Enter your name. In the User Name field, enter a user name. Enter and verify your password. Click Next. Optional: Add and verify the phone number for your account. Click Next. Use your existing email address Go to the Sign in to Google Account page. Click Create Account. Enter your name. Click Use my current email address instead. Enter your current e-mail address. Click Next. Verify your email address with code sent to an existing email. Click confirm. Step 2: Protect your account with recovery information If you forget your password or someone uses your account without your permission, updated recovery information makes it much more likely that you get your account back. Add a recovery phone number Add a recovery email address Learn how to avoid being locked out of your account. Make sure you have a Google Account if you've signed in to any Google product before, such as Gmail, Maps, or YouTube, you already have a Google Account. You can use the same user name and password that you created to sign in to any other Google products. If you can't remember signed in and want to make sure you have an account, enter your email address. You'll find the message if there isn't a Google Account associated with your email address. You can sign in to your existing Google Account. Check where email notifications are sent By default, notifications associated with your account are sent to your new Gmail address or to your non-Google email if you signed in with another email address. To change where you were notified, edit the contact email. Tip: You can also create a Google Account with a non-Google email you already own. If email is already used to sign in to Gmail, create a Google Account. You can use your username and password to sign in to Gmail and other Google products like YouTube, Google Play, and Google Drive. Go to the Google Account creation page. Follow the steps on the screen to set up your account. Use the account you created to sign in to Gmail. Create the UserName account I want Taken You won't be able to get a specific Gmail address if the username you requested: It's already in use. Very similar to an existing username (for example, if [example@gmail.com](#) already you cannot use [examp1e@gmail.com](#)). The same as a username that someone has used in the past and then deleted. Google has booked to prevent spam or abuse. Someone impersonates me If you believe someone created a Gmail address to try to impersonate your identity, you can: Unfortunately, Gmail can't participate in mediation involving third parties regarding impersonation. Learn more about gmail terms of use. Use Gmail for your business If you want to use Gmail for your business, your Google Workspace account might be better for you than your personal Google Account. Google Workspace starts at \$6 per user per month and includes the following: A professional, ad-free Gmail account that uses your business's domain name, such as [susan@example.com](#). Ownership of employee accounts so you always have control over your company's accounts, email, and files. 24/7 phone, email and chat support from a real person. Increased storage of Gmail and Google Drive. Manage mobile devices to keep your data safe, such as the ability to remotely delete lost devices. Advanced security and administrative controls. Learn more about Google Workspace or start a free trial. You're never more than a touch with data and settings. Just tap your profile picture and follow the link to Manage your Google Account. You can easily sign in, sign out, or turn incognito mode on your profile picture. When it comes to privacy, we know that one size doesn't fit all. That's why every Google Account comes with simple controls and tools like Privacy Checker so you can choose the privacy settings that are right for you. You can also control what data is stored in your account with simple on/off controls and even delete your data by date, product, and topic. Your Google Account gives you a safe and central place to store your personal information, such as credit cards, passwords, and contacts, so it's always available to you online when you need it. Tiller Money works with Google Sheets because it's powerful, collaborative, and secure. Once you've created a new Google Account, you'll be able to authenticate securely and create a Tiller Money account. Create a new Google --Or, click to see if you already have a Google Account or recover your account information. How to create a new Google Account Making new Google Account is a quick and easy process. You won't even need a photo ID or mailing address. However, as Google notes: By providing accurate information, you can help keep your account secure and make our services more useful. Provide some basic information When you create a new Google Account, you will need to provide some basic information: First name Desired Gmail address Password Birthdate Your gender is also technical although one of your options is rather not to say. Other options are female, male and will ask you for both a phone number and a recovery email. Neither is required to create a new Google Account. Agree to Google's Terms of Service and Privacy Policy. Once you have provided your information, you will be asked to agree to Google's Terms of Service and Privacy Policy. You'll need to read both of these documents carefully, but here are three big takeaways: Everything you do on Google can be used for marketing and product development. Every time you upload, submit, store, send, or receive content, you give Google the right to use, host, store, play, modify, create derivative works... communicate, publish, publicly perform, publicly display and distribute, but only if they use it to work, promote and improve our services and develop new ones. Any act you take with your new Google Account will be saved. Even ones you might assume are private, like emails. You can manage your own data. Google will store videos you've watched, device IDs, IP addresses, cookie information, and location. If you don't like the idea of all this information associated with your name, you can control what data is stored on [myaccount.google.com](#). Access your new Google account After you've agreed to the Terms of Service & Privacy Policy, you will be brought to the account page. From here, you'll be able to access other software and online apps that Google offers, such as: Google Drive Google Docs Google Sheets Google Hangouts Gmail YouTube Google Calendar Google Slides Google Play These are just a sample of programs you can use with your new Google Account. If you use Google for work, you can upgrade to the G Suite, which is a paid service but gives you more cloud storage and more opportunities to collaborate with your employees or coworkers. The following services require Google Account Tiller Money - Personal Finance Software that automatically updates Google sheets with your daily spending, account balances and transactions, with simple budget templates, debt payments, spending tracking, and more. Free 3-day trial time. Trumba - A calendar system for event organizers and promoters built to work with Google Calendar. 24me - Built for personal use, 24me is an app that brings all your different calendars together into one and encourages you to set up task/task lists.
