Text slang wasn't always the norm, but now it is. It's been about 20 years since this short form of communication, known as text messages, entered everyday life. Sending messages involves using your phone or other device to send a text message to another mobile device. Explore the language of text that will help you decipher SMS messages and other types of text-based instant messages. Sending text messages using texting emojis is basically instant messaging for your phone. When messaging was first invented, people typically didn't have a full keyboard on mobile devices. Instead, you had to inaute a message with numbers on your phone, each of which is linked to one or more letters. To save time and energy and avoid the thumb tunnel, hundreds of different text slang, or internet slang, words and abbreviations for sending messages came into play. The problem is, if you don't know them all, you might think someone's speaking a foreign language! Texting slang includes both symbols and special abbreviations that mean certain things.
