On February 10, Asians and the Asian diaspora welcomed the Lunar New Year, marking the Year of the Serpent. As I watched the Vietnamese phrase for Happy New Year — Chúc mừng năm mới — I was struck by the fact that all four of its riveting odds are for the English tongue. A descendant of the Austro-Asian language family, Vietnamese took much of its vocabulary out of Chinese and was written in Chinese and founded the Latin alphabet there. Vietnamese is a tonal language: its sonic terrain is hilly with rises and falls of pitch, craggy with tighter of the throat. It is also monosyllabic, and yet it manages to pack a great deal of variety into its short words, thanks to the existence of eleven separate vowels. Here's a quick look at all eleven and how to say them — plus some music videos to help you practice.
