Therefore, it is important as a first step to identify the specific statement or thesis that you are going to write. In this way, you will therefore be able to use the right format and language. Step ii: Determine the points to cover Move a step below to determine the specific points to cover according to the topics you have already identified. Needless to say, the points must be relevant to the subject you have already selected. They advance the theme of the topic that you will be set on. Step iii: Order sequentially and logically Order these points sequentially and logically. As you do this, match each point with the main subject. Stay in the topic of discussion, too, so you would do so. This is to ensure that you give on the main idea without possibly straying from the main idea. Step IV: The transition of paragraphs properly Transitions are key. They are the ones who connect one point to another. As they do so, they also support the uninterrupted flow of ideas. The transitions you use must be relevant and consistent as well. This is to maintain the main ideas without any wayin in any form or form. Tips for writing a clear outline Place a title page. Kick off exercise by placing a title page. It is the title that demonstrates the main arguments or theses of the discussions altogether. As such, it must clearly be in accordance with the main premise or argument of the whole article. Highlight significant points. After placing a title page, you should go further to highlight the important points. These points must certainly be directly relevant to the main arguments of the write-up. They must also be consistent and, to the point of avoiding any unnecessary ambiguities. Leave some blanks for later editing. Do not leave some blank spaces between for the sake of easier editing later. You will need to edit the article extensively to rhyme with the general theme of the article. Such editing is also necessary to provide additional information and make write as late as possible. Use clues and spaces throughout your content. Along you should use the spaces and clues on a large scale. This way, it will be possible for you to generate meaningful content. Be careful, though don't overuse them. You may end up taking a whole context of the discussions. This document was created for use with AP students on how to take notes using the book structure.
