DescriptionZombie-based FPS gameLeft 4 Dead came out in 2008, earning the main points. It allows you to play in campaign or multiplayer mode with up to three other players. You can also become special zombies and fight with other people to complete your goals. Hordes of zombies pour against you in a constant stream. You never have the pressure that allows you because you have to aim for your goal. While you can go against AI, the best way to play is in multiplayer mode. You can play with up to three other players who can react flexibly. It follows the basic storyline with four characters you can play. The plot has many weapons that are suitable for different circumstances and areas. There are twenty maps that give you many options in the style of play. Special features Scenarios have a high level of playability due to the way software designers created the engine. AI is pretty good for zombies and side characters. The system responds well to every move you make. Valve, the company that designed the shooter, has implemented an intelligent engine that understands when you're having problems. It will throw fewer zombies and extra gear at you until they stabilize. Conversely, the better you have, the harder the game tries to kill you. It has a leader system that encourages competitive players to work harder. Alternatives Left 4 Dead 2 rises, where the first was interrupted by the expansion of the world. However, both games are quite similar. The newer one has more weapons, zombies and a bit more history while ending the series. World War Z may be the latter successor, so to speak, because it copies a lot of L4D yet adds a few more elements. The WWZ grants each character a class and focuses more on upgrading weapons. It has a lot of errors leading to crashes and poor connections to the server, unfortunately. Despite the age of the shooter, the L4D Valve has an outstanding place. Although he is not free to play, his multiplayer is fantastic and the gameplay keeps you coming back every time more. While the second edition is a good choice as well, the first remains an intense zombie SHOOTER FPS. Four heroes must clear the way by passing through crowds of living corpses. As before, the player has control of one of the four characters, and bots help in passing a series of cards. The second part of the Left 4 Dead series combines the best ideas of the first game also has good even by today's graphics standards and excellent optimization, while offering cool gameplay. Want to try the game? You can download Left 4 Dead 2 with all the extras from our website. At one point, Left 4 Dead was one of the best shooters, and its sequel will not disappoint fans of the original version due to the distribution of roles between AIs. The game has a cooperative, but the story mode can be completed without friends, and then the other three places will be taken over by bots. AI will always try to help the player if he is in trouble, sharing a first aid kit or telling him what to do. Your team members will occasionally tell you a few phrases and jokes to provide an atmosphere in the process of discovering places. Bots shoot quite accurately and rarely find themselves pinched in the corner, as well as following the player and adapting to it. Beginners should listen to the tips of bots, most of them help to avoid danger. Another type of AI in the game is the Director, whose duties include placing infected on the map, spawning bosses, as well as placing auxiliary items. Depending on the complexity and effectiveness of the player, the computer will slightly adjust the map, change the position of objects and some enemies. This invisible assistant will always throw a few first aid kits or defibrillator if survivors have low health. It is AI Director that helps make the game more interesting. The whole gameplay involves shooting dozens of zombies that woo around the map or in droves chasing your group. Due to the huge number of goals, it is not always possible to eliminate the threat, so it is important to constantly move and break into a more favorable position. Being outside, as well as sitting in a corner, becomes dangerous and risky, especially when attacking the Horde or Tank. Sitting in a corner and fighting enemies during a Horde invasion is no longer an option, as special infected individuals can split survivors, break formation, or hold the player in a corner, which can lead to the death of the entire group. For example, a new type of particularly infected is Spitters. They are able to kill a group of players with a single spit if they are clamped narrow space. Therefore, the only option to survive and have fun in Left 4 Dead 2 is to work together with the group. The co-op transition and the ability to play with other players on the web provide a completely different gaming experience. In competitive games, players are divided into two teams – survive and infect (4 people each). The task is trivial – to destroy the enemy team. The game remains popular for many reasons: It supports modifications; It has good optimization and normal graphics; Provides interesting and dynamic gameplay; Almost all types of infected are quite balanced. Even nowadays, L4D2 team game servers with various modifications work even though the game was released almost 10 years ago. In addition to the new four characters – Coach, Ellis, Nick and Rochelle, the game has many new things: Maps with special quests to escape or move to another location; Several types infected, including Thunder, Jockey, Spitter and Wandering Witch; A new arsenal of edging weapons. Tired of guns, want to manually crush crowds of enemies? Arm yourself with a katana, axe or chainsaw. The presence of several game modes; There are many official modifications to the game.
