SIGCHI is the world's largest association of professionals working in the research and practice of computer-human interaction. What brings us together is a common understanding that designing useful and usable technology is an interdisciplinary process, and when done properly has the power to transform people's lives. SIGCHI acknowledges that presenting research at our conferences is an important aspect of a student's professional, educational and research development. The Sigchi Student Travel Grant program is intended to allow students who do not have other funding opportunities to participate in SIGCHI sponsored or co-sponsored conferences. SIGCHI sponsors or co-sponsors over 20 different specialized conferences annually, along with our pilot CHI (Human Factors in Computing Systems) conference that has been organized every year since 1983. Skip back to the main navigation We recommend that you use the latest versions of the following browsers: Chrome Firefox Safari Dear CHI 2020 community,We promised to offer you an update on the possibility of a virtual CHI 2020, following the decision not to physically own CHI 2020 in Hawai'i. In extensive consultation with the SIGCHI Executive Committee and the CHI Steering Committee, it was decided that it was best not to own a 2020 virtual CHI, given the uncertainty of the current circumstances. We are extremely grateful for the community's offers to help; however, the volunteers of our organizing committee have already invested so much effort in CHI 2020, and many of them are already facing additional workloads as a result of Covid-19. CHI aims to be a first-class event for both scientific and social interactions, and we believe that it will not be possible to achieve the expected level of quality in a virtual conference, given the limited time available between now and the conference dates. The Doctoral Consortium and Student Research Competition (but not the Student Game Competition because of the need for playability of their games) as self-contained tracks with a group of selected participants will self-organize in order to convene practically and provide feedback to their student participants. The student research contest will also determine the winners, so it was originally planned. Workshop organizers can organize themselves virtually if they want to unite their groups, so they already know their participants. GIs, panels, etc. may self-organize, but again we will not be able to provide any coordination or support from CHI 2020 for these events. We would once again like to thank everyone who has helped so much so far and we are sorry that this trip ends here. We especially like to thank who have generously donated their contributions to CHI 2020 to help offset cancellation costs, and to inform you that the sponsor links on our recruitment page will remain live for those interested in Contact. Again, we are very sorry that we can not own a FIZIC or virtual CHI 2020, so we would have liked to hang out with all of you, in some form or in some form, but we hope to see you next year at CHI 2021 in Yokohama, Japan.Thank you for all your support in these difficult times. Mahalo! General Chairs,Queen & FloydDear CHI 2020 community,In response to the decision not to physically own CHI 2020 in Honolulu, Hawai'i, we want to thank you first for the messages of support we received and how understanding everyone was. In discussions with the CHI Steering Committee, the Executive Committee of SIGCHI and ACM, we have identified the best way to repay. Because this is an unprecedented event, CHI 2020 will refund all registration costs in full, regardless of whether you are an author or participant. This includes registration costs for additional options, such as workshops, courses, commodities, carbon-offset, etc. The registration team will process refunds from now on. Please be patient as we have a large volume of records to repay (in fact, we had the second highest number of records up to that point in CHI history). The registration team will refund your registration using the same means you paid (for example, if the registration was paid by credit card, it will be refunded on the same credit card). The registration team will contact you if this is not possible, but of course they are available for any questions (chiregistration@executivevents.com) and are here to help. To be clear, you don't have to do anything to start this process. If you have already paid the $100 cancellation fee, this fee will be refunded. The authors of the works must not pay any registration for their work to appear in the Digital Library.Note that for flights and hotels you must contact the airline and/or hotel directly. Many people have asked us about the possibility of organizing a virtual CHI 2020 event. We are still discussing this and weighing the pros and cons in these uncertain times. We are also preparing a FAQ for some of the questions you may have. The works will be available in the ACM Digital Library as planned, and will be accessible free of charge for a period of one year, starting April 25, 2020 (the initial day for the beginning of CHI 2020). Thank you for all your support in these unusual times, Mahalo, General Presidents, Queen & FloydCHI 2020 community,It is with heavy heart that we need to tell you that we, together with the CHI Steering Committee, the SIGCHI Executive Committee, and the representatives of ACM have decided not to hold CHI 2020 physically in Honolulu, This was triggered by the WHO statement that the Covid-19 situation is considered a pandemic. The health of our community is the greatest asset we have. We. thoughts go to everyone affected and we want to express our sincerest sincere wishes. We are now thinking about what we can do in this situation and are currently discussing alternative formats. We'll let you know here as soon as we have more information. Of course, this is sad news, but we find that these uncertain times require hard-to-predict decisions. We understand that you may have a lot of questions and what this means for presentations, publications, etc., and we are trying to resolve them together with the CHI Steering Committee, the SIGCHI Executive Committee and the ACM. Please be patient as we figure out the best processes and communicate them here for you. Soon we will also post here to go about requesting registration refund, etc. There is unfortunately no template for a situation like this. We would like to express our appreciation for the CHI 2020 committee and for all those who have worked so tirelessly with us for so many hours in the preparation of our conference. Thank you very much for all the work you have done. We are very sad that the conference will not happen, at least in its current format, with all of us present in Hawai'i. We would have loved to have you all there to discuss THE HCI with you and have a meeting on the beach. Again, we are both very sad about this unfortunate news, and our best wishes are addressed to all those affected by the current situation. General Chairs, Queen & FloydAloha! The ACM CHI Conference on Human Factors in Computer Systems is the most important international human-computer interaction conference. CHI – pronounced kai – is a place where researchers and practitioners gather from around the world to discuss the latest interactive technologies. We are a multicultural community from extremely diverse backgrounds, which together investigate and design new and creative ways for people to interact using technology. From April 25-30, CHI will take place for the first time in beautiful Honolulu, at the Hawaiian'i Convention Center on Oahu Island, Hawai'i, USA. Mahalo! Queen Bernhaupt and Florian Floyd MuellerCHI 2020 General Chairsgeneralchairs@chi2020.acm.org Each year SIGCHI organizes our flagship CHI (Human Factors in Computing Systems) conference, together with the sponsorship or co-sponsorship of over 24 different specialized conferences. We offer cooperative support for over 30 additional conferences. You can find details about all these upcoming conferences and student travel scholarships on offer here. For those who organize one of these conferences we offer a wide range of resources and policies and details about the history of previous conferences. Go to Calendar. Conferences Learn more about upcoming CHI conferences as well as SIGCHI specialist conferences. Go to future conferences. History of the conference conference History serves as an archive for CHI and sigchi specialized conferences, and contains information including acceptance rates, procedures, locations, committees, and presence go to the History Conference. Student Travel Grant SIGCHI Student Travel Grant is a program that provides assistance to students with accepted contributions to participate in SIGCHI (co) sponsored conferences. Go to Student Travel Grant. Courses Information about educational courses offered at CHI and SIGCHI specialist conferences. Go to class. Organizer Resources If you organize a sponsored, co-sponsored, or cooperative SIGCHI conference, this page has information to help you better prepare. Go to Organizer Resources. Policies This Page describes a number of ACM SIGCHI policies regarding our conferences. Some of these policies cover all conferences, while some relate only to annual CHI conferences. Other policies are only for the schedule of specialized ACM SIGCHI conferences. Go to Policies.
