Sally hansen nail polish strips walgreens

As most regular readers probably already know, I love nail polish/treatments and I now have a new favorite in Sally Hansen's Salon Effects Real Nail Polish Strips. These little fashionable bands were on my favorite Drugstore Beauty and hair products post for All Things Chic (a fashion/beauty blog I contribute to). They sell for about \$9.99 or less and I found them at Walgreens and Walmart. What I like about them is that not only do they look cool, but they are easy to apply and they look nice (without chipping) as long as you can support your nail beds more and more (for me 7-8 days). Check out this great tutorial by the ladies at BeautyBurg on the best ways to apply them and a preview on the details: Here's another favorite, misbehaved impression. Here's what they look like after 7 days What do you think? Have you tried Sally Hansen's Salon Effects or Plan? Let me know in the comments! Valerie Rowekamp wants to live an elegant, soulful, charmed life while inspiring you to do the same. She is exceptionally resourceful, creative, passionate, and has been known for busting a movement in the aisle of the grocery store. Comments comments I have a lot to show you today, so I'll just jump right in sally Hansen Salon Effects Nail Polish Strips LE for Spring At Ulta I saw the absolutely adorable nail strips that Sally Hansen released for Easter. Sacred, these are so cute! Click to see a larger photo. I'd like to wear them all, but I'm particularly coveting on the retro pastel plaid (Mad for Plaid), the baby chick model (Not a Peep), and the green gingham (Checker Out). Vichy! I'm dying because of their adorable in person. Walgreens was a virtual mecca of new screens. I really need to move to Walgreens more often, but I'm surrounded by Rite-Aids, so I'm much more likely to go there. Yes to carrots color balm first, Yes to carrots Color dyed lip balm. These come in three colors, Peachy Keen, Rosy Bloom, and Soft Plum. They retail for \$6.49. Rimmel Rimmel has some new bronzers. Their natural bronzers are supposed to give you a natural glow without looking too made. They retail for \$6.99. Sally Hansen Go Green Sally Hansen Hard as Nails Go Green Collection is a real winner for me, because I love green varnishes. At \$2.49, this is a great choice for a St. Patrick's Day mani. Revlon Crackle Effect Next, Revlon Crackle Effect Perfectly Paired Duos. These are double-sided nail colors, one of which is a crackling varnish. Walgreens had these for \$7.99, but I saw them listed for as high as \$10.49. I don't no, maybe it's just me, but I really don't understand why Revlon would choose to jump on the crackling train so late in the game. Although I appreciate that it is a two-in-one product, the price seems a bit high for me to fall behind. I'd love to. if any of you pick these up and what you think. The rest of the screens are all sinful colors. Sinful Colors Petal Pusher Collection Sinful Colors Petal Pusher Collection comes with a small plastic or charming flower ring on each bottle. The shades on the screen are Innocent, Savage, Pink Forever, Pinky Glitter, Boom Boom, Hazard, Amethyst, and Apple Mint. Sinful Colors Shamrock Shimmers Collection Sinful Colors Shamrock Shimmers Collection is perfect for St. Patrick's Day. The varnishes include a bright green, a green flakie, and two art stripers of the nails in white and gold. I'm actually delighted to see the flakie varnish Green Ocean reissued because I wanted it for some time now, and I thought that ship had passed. I ripped it off right away. Here's a closer look (click to enlarge). Sinful Colors Green Ocean Sinful Colors Castaway Collection I've been wanting all the new Castaway color sins collection since I've seen it appear in other beauty blogs. The shades of this collection are Zeus, Neptune, Greek Islands, Greek Sun, Athens, Pandora and Olympia. They are all shades of blue and green, and are all beautiful. I picked up Zeus and Athens, shown here: Zeus (L) and Athens (R) Zeus has a beautiful pink flip that makes it look like some kind of blurry pervenche. Athens is a beautiful stormy teal. Here are samples I took last night: Zeus (L) and Athens (R) with flash that's all for what I spotted this weekend. I hope you've seen some items that you may want to grab for yourself. Good hunting! My Sally Hansen Salon Effects Manicure on day 2. When I saw an ad for Sally Hansen's new Salon Effects nail stickers, I had to have them. I loved the Minx concept, but not the price tag. For \$8.99, you can select a box of nail stickers and apply them at home. I then got a Broadway nail press release on their new Minx-y stickers, Nail Dress. They're only \$5.49. (See a variety of options after the jump.) I asked for samples of both and tested them all a few times. The app is a 10-minute breeze. Clean your nails, place the sticker, deposit the excess, done. Both manicures lasted a long time. The salon effects lasted a full 8 days before wear on the boards and the growth to the cuticle drove me crazy. The nail dress lasted a little less time. I had 5 days of good wear, before I noticed some lifting corners. The salon effects are more difficult to remove. The Polish make-up remover is required. (Well, I picked it up for fun.) Nail Dress versions can be taken off. I found that the metallic versions of seem to become sticky on top, and wear out faster. Get away from them and go for the prints. If you like sequins, head straight to the Salon Effects glitter collection. Solid colors don't look as clean after application. Find Broadway and Sally Hansen nail stickers at Walgreen's and and (They are not officially released until March, but apparently some stores are already transporting them.) Jump for more pictures. Sally Hansen's Salon Effects in Frock Star, left, after 8 days. Broadway nail dress in Tabloid, right. I borrowed this photo from Flickr, but my app looked the same. Looks like Katy Perry's Flower Power Minx, doesn't it? Less than a quarter of the price, however! Lounge effects options on the left; some nail dress options on the right. Recently Sally Hansen sent me some of their new Sally Hansen Salon Effects Nail Polish Bands kits to try, so I shipped a few to my sister, Chantal, in Chicago because she loves trendy nail polish and she is very critical and demanding when it comes to testing new beauty products. Of course, I had to give these a go myself, and I was beyond impressed with the results! Keep reading for Chantal's awesome review, and let us know if you've tried Sally Hansen Salon Effects in the reviews. Plus stay tuned for a great gift where I'll be giving away 5 Sally Hansen Salon Effects Nail Tapes Polish kits to a lucky reader. —BB by Chantal B. I love, love, love these strips of nail polish! Honestly, I had no idea what to expect from this product, but I can certainly say they are my new obsession, and I can't wait for Sally Hansen to come out with even more styles and colors (maybe some more neutral or adult colors that are suitable for the office?!) But before I get ahead of myself, let me tell you about the 24 amazing options already available. The Salon Effects nail polish strips come in a really fun array of patterns (like leopard, zebra, flowers and lace) neon colors and glittering options (though I'd hate glitter, but gold, Glitz Blitz is actually my favorite so far). Above: My Skinny Jeans nails look perfect on day 2. It's a whole new way to make your nails, so there's a bit of a learning curve the first time you put these on, but it's super easy and you get the hang of it right away. Each package contains strips of nail polish of different size (just as fake nails come in different sizes to accommodate different size nail beds) so after choosing the sizes you need, you just have to remove the tape from the protective sheet, press it to your nail and then drop the excess (and the little nail file you use comes in the kit too!). My absolute favorite part? No dry weather, and virtually no smell!!! Yay!!! Above: Cut It Out a lot and is easy to apply to short nails. The salon effects last as long as the brand says they will, 7-10 days, and I wasn't fussy with them. They really last through everything. I loved these immediately, the finish is smooth (even on the sequins) and gorgeous and it even makes my short nails look fantastic. To add the icing on the cake, I also received crazy amounts of compliments on my nails, everyone. Wondering where I got my nails done, or what kind of nail I use to get such a fantastic finish. They are so amazed when I tell them her Sally Hansen Effects Salon, and even more excited when they discover that they can buy them at their local pharmacy. Above: Day 6, and still no flaking! You'll never get this with a classic sequin polish. I wish a bit they were slightly lower priced then their price tag of \$9.99, but many stores offer a buy one get half a discount promo on these right now, and that makes it a little more affordable. Spring Break is fast approaching, it would be amazing to take along and apply on the plane (no smell and no dry weather - manicure anywhere) and the fun patterns and colors are perfect to accommodate in warmer weather! —Chantal Baros WHERE TROUVER: Sally Hansen products are available in chain pharmacies, grocery stores and mass merchants nationwide. Photo credit: TheBudgetBabe.com Accentuate your hands and protect your natural nails with strips of nail polish. The Nail Jewelry Bands of Kiss and French nail-like nail polish from the Sally Hansen salon are designed by cosmetologists to provide easy application, gorgeous style and lasting wear. These self-stick nail polish strips dry immediately and last up to 10 days - perfect for when you want to look your best, but don't have time to go to the salon. Whether you're coordinating your nails with a particular outfit or you want the look of a classic French manicure, you can find the right nail strips for any occasion. Applying your new stripsPress-on nails to a trusted brand like Sally Hansen are quick and easy to apply, and these nails are just as easy to remove when you're done. For application, simply peel the back of each nail strip and apply it firmly to your nail. Then shape the nail, cut it and you are ready to go. When you are ready to remove your nails, remove them gently and use a solvent to remove adhesive residue. Residues.
