Just use Digimon with any powerful or finisher move. Master Tyrannon: Like pharaoh, but harder. Bulbmon1: Uses a crazy pump. You might want Digimon to know the move with a few punches. You can't beat him at first. Go to the Shaman smoking (Calm Swamp) and go to the snag and talk to Gatomon. You can do the rest here. 2nd fight, it uses a hunting knife that can KO your Digimon instantly. Wait until you level 30 before facing it. HiAndromon: Atomic beam is another KO step (I think anyway). Use Digimon, who knows Kyukimon, who knows Blade Twister. Beware. It uses a heart attack and it reduces your strength. Use Kyukimon again, or Kabuterimon with Hammer Rush. Amaterasu: BK MegaGargomon: Beware of its giant rocket! Use a shock rush, shock rush or drive twister. BK Imperialdramon: Not much of a threat. Kick Ryush or Blade Twister good moves here! BK Serapymon: It uses Giga Heal when its HP is crucial. Make sure your speed is high enough and use a few bumps to move. BK WarGrowlmon: uses an atomic blaster and Power. Use impact Rush here. HC KingNumemon: Much harder than his Asuka amatraz amtras Colleagues. His attack will freeze you. Gunslinger: Megadeath: Has 3 Digimon: Fujinmon, Suijinmon and Raijinmon. Everyone has a ridiculously tall HP. Suijinmon real #@! %^*** here as its attack strikes 3 times. Galaxies: Tail: Resist its attacks. DO NOT USE ANY MP MOVEMENTS, otherwise the head will know what to move, even if it is your own finishing move! Body: Just comes out, uses a Ragnarok cannon (which weakens you to 1HP) and retreats. Head: Real pain in ... It has an extremely high HP level, and it resists your movements a lot (you can say, because it will block it). When he makes his weak position, be prepared for his attack charge. It uses ?????, which will take the form of the gait you used on the tail. Once he's down, enjoy the film of his destruction. Destruction.
