This is not the typical internet marketing video. I'm not riding in a Ferrari and showing my money. Instead, I'm just a normal guy here relaxing in my living room. So who am I? You're smart to ask that question. Then let me explain. I'm not one of those so-called money-making experts telling people they can make money. That's why you've never seen or heard of me before. See, for the past few years I've been backstage. When I started in the '90s, the internet was like the wild west. Back then, online marketing was new. Facebook didn't exist. And MySpace was still one thing. Google was barely introducing its new AdWords platform. If you're not aware, Google is what you use to place ads on Google. Nowadays you always see ads when searching on Google. But in the early days... This was an innovative change on the internet. Because of the inside information I had from a source of mine on Google... I was one of the first to start advertising using AdWords! Old ads like me have made fortunes. Because it was common to earn a return of 100-200x for every dollar spent on advertising. That's an extra \$100 to \$200 for every \$1 note. Insane, right? Like I said, people like me were killing. You could predictably climb your income day after day. You didn't even have to be super smart to make money back then either. I sure as hell wasn't! All this sounds great, I know, but the reality is it wasn't perfect. Because of all the money being made, the scammers have left. These rich wizards sold their lifestyle and promised the world... However, it failed to deliver any value. It disgusts me to see these dishonest people. Some of these guys are still around today. You may have seen them before. If you've been deceived by someone very promising and ill-delivered... It's not your fault. These digital snake oil vendors are masters of disappointment. They will use all the tricks of the book to get your money. But when it comes to really helping him? That's when they you. And put it back where you started. Trapped, lost and even more confused. My goal today is to end this vicious cycle. And make it my mission to help the little guys down there. I've decided that's enough! The they shouldn't be stripped of their sweaty money... Just because they're eager to live a better life. As you can imagine, this video will upset a lot of people. But I don't care. I'm not doing doing to increase my status or ego. I couldn't care less about becoming an internet celebrity. This isn't about me. I'm making this video to help you! Once I tell you my secret, it is possible for you to finally live the laptop lifestyle you have read about. So what's my secret? And why are you so powerful? More importantly, why am I the only person from whom you can get it? I'm about to answer all these questions (and more). Let me share it with you... My review of the secret advertising platform Lead Gen Like any established marketing company when you sponsor a person in the business you get paid in the package of products they buy. Personally, I love recruiting, but it's one of the factors of failure in business and I'll get into it later, just pay attention and keep reading... My secret lead gen compensation plan The My Lead Gen Secret compensation plan is as follows: Member Commission Payment – My Lead Gen Secret members can earn commissions on all direct sales, and also a 5-level sales percentage. To qualify, you must personally enroll someone through your affiliate link (via a banner ad, text ad, blog, video review etc.) Cost to join my leading gender secret It's only \$60 to join My Lead Gen Secret (first month) followed by a monthly fee of \$30 also, an OTO for a 30 email series written in person by Jim Harmon. My main gender secret is a scam, isn't it true! Many of you will find My Lead Gen Secret to be just another network marketing or advertising opportunity and from what I've seen many people are doing very well with it. It's not much different than anything else out there. I don't think my main secret is a scam. People who call any company a scam should be a red flag for you... it really tells you something about themselves. If they've had time to tap into another leading company or a product do you think they're really that successful? (cough rich people affiliated) Most of these people failed to make a living online or just want to turn it into another offering. They make a quick buck and move on to the next thing. I see a very big problem with people tap into a program like My Lead Gen Secret just to recruit your own business opportunity. They are taking one of the toughest, if not the toughest routes imaginable! With this approach you will get a lot more no (or ignores) than you will have yes. The way I other successful people do this is to have a blog! And this blog needs to be independent of any offer you are trying to promote. That's by far the simplest way I've found to have your long-term business that you can trust! I even wrote down the simple 4-step process you need to follow if you want to start the smart way! 2 stages of starting my leading genre secret, the right one! 1) Have your own product or blog So, as I've said this many times in the past, you need to have your own website or blog platform! Although it may seem like a big deal and a lot of work, believe me, it's not! Creating a blog, for example, is super easy now for days and there are hosting companies that will even do it for you! Once you have a blog or a website to promote, you now have a platform that you can start with marketing! 2) Send good emails You simply need to start writing and deliver good content to your followers. If your content is really good, informative and insightful, people will start to feel attracted to you and start looking at you as an authority to follow in your field! If you're smart, you've picked up the Series Swipe OTO email that gives you 30 high conversion calls and beautifully written to action emails, which each of your subscribed optins will read daily. These aren't just generic scams. These take your reader down an ever-hard rabbit trail to resist compelling stories that hungry opp biz seekers simply can't ignore. I hope my honest criticism of my Lead Gen Secret has helped you! Need help setting up my main gender secret?
