Other Xbox map file mirrors: Xbox DB (currently offline) and Galaxy Debug (currently offline) clean. BlastDepot (currently offline) terms. Privacy. The content includes a Crimson, Majestic and Castle map pack, two in-game helmets and an emblem of special value, if you own this map pass, you can access the map pack through the Halo 4 in-game store. Do not download from the Xbox LIVE Marketplace or You will be charged twice. Halo 4 games, 4GB storage, and Xbox LIVE Gold membership (sold separately for each file) are required to use the content. (Map pass included in Halo 4 Limited Edition) If the link doesn't work, try using the right mouse button to save the link destination. You can only log in once at a time from the download server. If you want to download files faster at the same time.,) use. Important: If you want this file URL to connect to this download, you should use: halo 3 days back you can download forged maps using bungie website and play with our friends. This feature is available in the MCC in the next update. It would be better if we could download the map and do it like in Halo 5 where we can have a server browser to participate in games that are played on counterfeits maps. 343i you recently smashed it with updates and brought tons of new things for us to enjoy. If you can download maps and use a server browser, I think the MCC, which implements the ability to play between platforms (which can be turned on and off) and input-based matchmaking, would be better. But the last two are on another topic. Being able to see and play other people's work is a great feature, and I bet many of us remember the work of playing some absolute crazy maps on casting. Infected people are infected people who have tried to catch us along the top of the tower. Or race tracks on sand trapping. Plus more loads. Counterfeiting is nowhere near good if you can't download and play other people's work. Especially if you're like me and if you're very creative. What do you all think? Do you want to forge maps online with other players and allow them to choose which games to play in the server browser? Can you allow others to edit the map and add their own
