Active Last Checked page: 12 days ago, with a completely distant new semester, the church was fully adapted to the online program Maria Wayne News Editor September 4, 2020AM/The Great Outbreak of Coronavirus, Biola's first long-term semester kicked off on August 31, 2020. Of the church and worship, Mike Ahn must be quick on his feet. The original church team had three options for the semester, which included having a hybrid church with 100 students in the Sutherland Auditorium, while the rest would be live-streamed, live-streamed churches and pre-recorded churches. He explained that his team began a pilot project in June of this year where they asked Biola students to sit through pre-recorded churches, answer questions and give feedback on the content. The idea is to allow students access to the church whenever they can. However, when President Barry Cordy fully announced the online semester, Ahn and his team had to scratch everything with students on campus. A different approach, instead of the church internship team and his staff, has worked with the marketing and communication registration team by creating pre-recorded sermons and interviews. The church will be uploaded every week on Monday through canvas, and students will be able to complete it by Saturday time. 23.m:59 p.m., according to an email sent earlier in the semester by Vice President of Student Development Andre Stephens, despite all changes, dean of spiritual development and campus pastor Todd Pickett noted that participation increased with more than 340 prayer requests submitted during the first week of school. Students: If an instructor needs to use the Respondus LockDown browser to increase security when taking the test, you need to download and install the

Responseus LockDown browser before you can start testing. The Responseus Lockdown browser download link is available when you access the desired quiz. Click Install Now. This will download the file .zip the archive that contains the .pkg (Mac) or .exe (Windows) file.zip. Take a quiz with Respondus LockDown's LockDown browser, run the LockDown browser from your desktop (PC) or from your Applications (Mac) folder. Click Kill these applications so that the LockDown browser does this for you, and then you'll be prompted to log in to the Canvas with your Internet ID and password. Once you're logged into your Canvas, you'll see your dashboard. Click on your course to go to the website. Find and click the link for the quiz. Click Do quiz when you enter. And ready to submit a quiz, click Send Quiz out of Canvas.Click X at the top left. When you see whether you want to exit the Responseus LockDown browser, click Quit.Your quiz is sent and you are returned to your computer. If you need further assistance, please contact 1-Help, 612-301-4357 or open 24 hours a day, 7 days a week. Respondus Technical Support: Frequently asked questions about student support These recommendations are for Biola instructors who want to use canvas for their classes. When they assign an instructor or enroll a student in a class, the enrollment will automatically appear on the Canvas. These updates occur four times a day: 12:00 p.m. .m, 6:00 p.m.m, 12:00 p.m. .m and 6.m pm students: If you lack a course, check your list on My The Registrar's Office must add you to the class before you can access it. If the class is gray on the canvas, that means the teacher must publish. For new teachers, there are several steps that need to take place in this particular order before you can log on to your class on canvas. Next, I.T. needs to create a NetID account and password, biola.edu, the email address for you. When the registrar's office assigns you an official class, the automated process will allow you to reach on the canvas within six hours. Unfortunately for a long process, however, due to FERPA regulations, only Biola employees have access to student information, so you need to be formally hired and assigned to the class before you can access it. Setting up your course and getting help is the basic step for setting up your course: organize content. Upload a file or write a content page See Content storage, organize content. There are two places to put content: create a module, then attach the content to the module (recommended), create a content page and link them together, create an assignment for the student to open. It also sets the Navigation Menu Gradebook. Maybe set up a discussion, collaboration, meeting for online student interaction. Publish courses so students can see them. For each of these steps, you can Please see the canvas instructions here. In addition, the Department of Digital Learning will have workshops throughout the semester - see the training schedule or contact us. Finally, don't forget that sometimes a simple Google search can be answered. For example, to search for information about adding additional credit assignments, perform a search. Adding TAs and students to CourseBecause, your roster on the canvas is associated with the registrar's official banner roster. Unfortunately, this means that instructors cannot add TAs to their Canvas courses. By the end of autumn 2022, we hope there will be more automation in place that will allow instructors to add any student staff (cleared by H.R.) as TA in TA classes, not being students in the same class. Adding TAs: For now: Email Matthew Weathers to ask them to get access to TA in class (it would be helpful to add a Biola email address or biola and CRN id number for the class (this is the list) - but we can find out if you don't have it. Students who review educators can't access canvas, those who aren't officially students in the class can't access canvas.Combineing Sections on canvas. If you want to include matthew weathers email section (it would be helpful if you included a CRN number, of course). Finally, we hope to have more automation so you can do this yourself. For more details on working with a set course like this, please refer to: The total course publishes your course to StudentsOnce, your course on canvas is ready for students to see it must be published - once the student has accessed, then you can't unpublish. the course. To publish a course, click the Publish button Gray on the home page page
