REG # : Ciit-FA10-MBA-059- 15 Feb 20176, Issue 7, (Part -1) July 2016, pp.11-16 www.ijera.com. 11 | Page. A study over guided and unguided transmission media and a. Proposed idea to expand telecommunications connections can be broadly divided into two categories, namely guided media (wired) and unguided media (wireless). Both media are used for Guided transmission media, waves are directed along a physical path; examples of guided media are telephone lines, twisted pair cables, coaxial cables and optical fibers. Unguided transmission media are which allow data to be transmitted without the use of physical means to define the path it takes. April 23, 2018 Compare Compare and UnGuided Transmission Media. Unguided/ Unlimited communication is wireless transmission. Cables such as twisted pair, coaxial, etc are of no use for wireless transmission. It is part of the Guided/Bounded/ Wired Transmission Media. In telecommunications, transmission media can be divided into two broad categories: guided media include twisted-pair cable, coaxial cable, and fiber optics. Also in guided media, the signals are limited in the wire and not propagate All unguided media transmission are classified as wireless transmission. May 1, 2016 Transmission Media and its types, Guided and unguided transmission media with examples (guided = (i) Twisted pair cable (ii) Coaxial cable Created by tqtpsmk Scoop.it!
