## The yellow book alien pdf

Edit Comments Share Yellow Book, nicknamed the Eben Bible, is a mythological holographic device that reconstructs the past. Some claim to have seen the last days of Jesus Christ from this device. A yellow book can be synonymous with another mythological device – a chronovist. Description[edit | edit source] according to Serpo.org publications The Yellow Book is standard paper format 8 x 11, but it is 2-1/2 thick. It is made of a transparent material block that resembles fiberglass. The edge of the device is bright yellow. When the viewer looks at the transparent surface of the device, pictures and language symbols appear. It's an endless series of historical knowledge and media depicting the universe. It contains a historical narrative with various accounts of Earth's history and distant past. [1] Mythology[edit | edit source] In Ufology, the Yellow Book is considered an alien device. Serpo.org, the Yellow Book gives the Ebens a perspective on the history of the universe in relation to their own interactions and participation in Earth's evolution/evolution. In urban legend, the EBE introduced it to U.S. officials at the Holloman AFB in April 1964. To use a yellow book, you must be named Briefing Control in Access Roster. [1] When the viewer places his or her eyes close to the screen, the words and images begin to flash until it determines the language the viewer thinks; then this particular language will appear. 80 different languages are known to occur. The Yellow Book can also reconstruct past events, such as looking at the life of Jesus Christ. Serpo.org that the EBE had founded Christianity and that Jesus Christ was the first alien ambassador on earth. It was brought to Earth and presented to the U.S. government at the famous Holloman Air Force Base in April 1964 with a female extraterrestic (EBE 2), which she also translates. Yes, it's not a book. It is a material block about 2.5 inches thick, which is actually a transparent exterior. The reader looks at the transparent surface and suddenly the words and pictures appear. It is an endless series of historical stories and photographs of our universe, the planet from which these aliens will call EBEN, their native homeland, and other interesting stories about the universe. It also contains historical accounts and various reports on the earth's history and its distant past. They say reading it takes all human life and another life to understand it. The yellow book is × 8.11-inch and about 2.5-inch thick object built of clean, heavy material such as optical fibers. The curve of the book is pale yellow – hence the Yellow Book. When you place the book close to your eyes, you start to see great words and pictures in front of you. It depends on a certain speech that you think about, then you see that language. So far, the U.S. government has identified 80 types of speech. The Yellow Book tells the story of EBEN's life, the exploration of space on their planet, social life and other aspects, including long-term relationships with Earth. Describes their first visit to Earth about 2,000 years ago. It describes Earth as it was at the time. It shows a certain being (EBEN) shaped like man (Jesus Christ). According to the Yellow Book, he built this earthly land on religion (Christianity) and became the first alien ambassador on earth. The yellow book continues and the person who: it says: ... I spent 12 hours a day for three days continuously and went to page 564 (pages called events) and still haven't finished. I don't think anyone knows exactly how long it is or that someone has come to the end. There's no end to the Yellow Book. I understand that the record is about 22 consecutive hours, this is the conclusion reached by the president's scientific advisor during the XXXXXX administration. There is also no way to stop reading on a particular page, postpone the book and then read it again in the same place. When you postpone the Yellow Book and return to it later, the book starts all over again. Although the book may somehow know the language of the person reading it, it does not recognize the uniqueness of the person. In other words, the problem with this book is that you have to start over when you leave it for a while. You get to page 564 like me, you postpone it, and then your book just returns you to the beginning of the first word and you have to read the whole 12 hours in a row before you get any new information. As has been said, the Yellow Book dates back to 2000 BC. The whistleblower says in this context: But I didn't look around the whole yellow book, and I don't think anyone's done it. Maybe he has some examples/pictures/history that go back over 2,000 years BC. The Yellow Book is a reference to your universe. As for space, according to EBEN, it was created after a second, just like our big bang theory, and spread over a billion years. EBEN doesn't refer to years like ours. It talks about time, but in the terms of the event clock, so to help us understand it better, EBEN has described our years in detail as benchmarks. They say your universe is expanding to 25 billion years. Then he pulls himself into his original form. As the universe shrinks, it expands again by repeating the whole process. EBEN says it is the lifespan of the universe (infusion theory).
