I'm having a hard time trying an incendiary lead storm and making beams. He's gonna kill me so fast, I think I should try to get an incendiary bone from the old monuments to help preserve wildlife farming to no avail. Sometimes no dwarf spawns at all. I also have trouble tearing him up, he's only staying a second or two, any suggestions on how to keep him sagged, any mod grenades especially thst better? Maybe cross fire? Page 2 16
