## Huffy cruiser bike accessories

Cycling is a great way to get outdoors, whether it's on a bike path tour or cycling in the mountains. Learn more about cycling in the Biking Channel. You should not go mountain biking until you get any or all of the following safety accessories: Bicycle helmets. Head injuries sustained from mountain biking can result in permanent brain damage, making helmets an important safety accessory. Ideally, your bike helmet will be a certified, snug helmet. Some helmets are fitted, while others have adjustable settings and straps. Ad Helmets are very light and surprisingly sturdy. Most helmets go from \$75-\$125, but high-end helmets are more expensive. There are two types of mountain bike helmet: open face and closed face. Helmets with open face only cover the top of the head, with the lower edge generally resting just above the ear. They have many openings or valves in the helmet surface to allow the air to dry your sweaty head. Innerliner is made of Expanded Polystyrene, a lightweight material that can absorb the shock. The liner is often reinforced with nylon, steel mesh or other materials, and then covered in a plastic shell. Closed-face helmets protect the driver's entire face from the top of his head to under his chin. These helmets have pull-down visors or eye shields, but can limit peripheral vision and range of motion. Your hands are tough and useful, but not so much when it comes to planting them at high speed in the rocky, steep ground. Mountain bike gloves generally range in price from \$20-\$50 and are loaded with protective padding. Each finger generally has its own padding, with extra for the thumbs. Your head has a helmet, your hands have gloves, but after the surfaces have hit the ground, you will roll and when you do, you will be glad you wear arm guards and leg pads. A variety of pillows are available to protect your knees, elbows, shins and forearms. You may also want to invest in upper and lower body protection. An assortment of padded pants and armored shirts will help protect you during nasty spills on the trail. These garments come with many options for padding placement, type of padding (soft foam or hard shell) and options for shirts with or without padded sleeves. If you're still riding when the sun goes down (by mistake or by design), a variety of bike lights are available. These allow you not only to see where you are going, but also to be seen by other hikers, cyclists, ATV and cars. These LED bike lights are powered by small battery packs that attach to the bike frame. Mountain bike accessories add lots of fun, comfort and safety to your riding experience. For much more information about mountain bike accessories and mountain biking in general, please see the next page. Get a Grip Y-shaped handlebar, known as riser bars, lets you sit longer, reduces the strain from Forward. A wide handlebar grip, such as ergon's bike grip (ergon-bike.com) provides a more even pressure distribution over the width of the hands. Protecting from head to toe Helmets is a necessity. A comfortable fit is also important. Choose a helmet that offers an adjustable fit with lots of padding and ventilation. Many now offer anti-concussion technology to reduce the risk of concussion in an accident. Gloves protect hands, help reduce vibrations and prevent sweaty hands from slipping. Try gloves infused with gel for maximum protection, such as Pearl's Pittard (pearlizumi.com). For feet, a lightweight, flexible hiking shoe is better cycling wear than a thin or stiff gym shoe. Feet also benefit from larger pedals, which require you to exercise fewer pounds per square inch for movement. Get a Full View A small rear view mirror, mounted on your helmet, the front of your glasses or your handlebars, can help you avoid accidents by giving you side and rear views without having to turn your head. Widening wheels wisely wider wheels absorb more of cutting from bumps and holes in the road, but narrow wheels require you to consume less energy to power the bike. A smooth medium, such as a 1-1/2 tyre, is best. Dampening the Curb Front fork and seat post suspension – like the ones shown on many mountain bikes and hybrid bikes – can significantly reduce shock from bumps, so your joints don't take the brunt of the ride. Padded bike shorts provide cushion in just the right place, as well as wick moisture and help prevent chafing. If chaff occurs, chamois lubricant slathered directly on to body parts that experience the most pressure at the seat (such as the groin) can help you prevent rubbing which can lead to an annoying, if not painful, burn. Saddle Up Choose a gender-specific, gel-padded bicycle chair, known as a saddle in bicycle circles. When trying a saddle, most of your weight should be on your sitz's legs (the ischialis tuberosities), located at the very base of the pelvis. Saddles with a notch forged in the center reduce the pressure on the branch. A seat that is too narrow makes you lie behind settling around it instead of on it, causing painful contact pressure in the crotch. This is a particular problem with upright handlebars, when most of your weight is on the seat. A saddle that is too wide with bulky padding can cause thigh chafing on longer trips and add pressure to the body against the nose of the saddle. Most seats are fully adjustable and getting the right position is critical, said David Maxwell, director of the District Hardware/The Bike Shop in Washington, D.C. Angle your nose on the seat down so part of your weight rests on the handlebar, with the pelvis on a small forward tilt, he says. Get in gear shift gears, you can pedal on the same number of turns per second, despite to maintain your speed. Make sure your bike offers plenty of gears — five or more are optimal — especially if you plan to ride hills. Hydrate Often A special attachment for your bike, known as a water bottle cage, keeps water bottles within reach. Hydration backpacks, such as a Camelbak (camelbak.com), let you carry your water and provide easy access via a hose, allowing you to drink hands-free while riding. Many hydration packs also have small load pockets to stash your car keys, spare tire pipes, a bike pump and more. The Bible is reader-supported. When you buy through links on our site, we can earn an affiliate commission. Learn more If you crave an indescribably satisfying riding experience along the coast, you can't just pick up some old bike off the rack and call it a day — such a pleasure requires one of the best cruisers, period. Includes bike fenders Dual spring bike seat to protect the coccyx and provide comfort Available in four different speed-changing options to suit your ride and destination Will not fully mounted Pedal-backward coaster brake on simple speed bike can be difficult to get the hang of single speed model can only be ridden on flat terrain There are many different considerations to be made when looking for just the right beach cruiser bike to suit your riding preferences. The size, gear setup, braking system, build material, and frame style are all aspects of a bike you will want to know about before making a choice. To help you, we have put together a comprehensive list of everything you want to know before you buy. Size The most important thing to consider when looking for beach cruisers is the size. There are usually different men's and women's frames when it comes to cruiser bikes, and once you've determined that you can then look out for wheel diameter, which is usually either 24 or 26 inches, with 24 inches suitable for people under 5ft 1 (5ft 4 for men), while the 26-inch is suitable for people between 5ft 1 and 6ft2. Gear Generally, beach cruiser bikes tend to come in different gears. The most common gears are the single-speed, three-speed, seven-speed and 21-speed gears. All these different gears are adapted for different types of riding trips. With a single-speed gear shift, your bike is perfect for cruising along the beach, neighborhoods, and anywhere with flat terrain. As speed switches increase, the bike can travel through much more difficult journeys, with 7- and 21-changing gears allowing the bike to go through bumpy roads and climb steep hills. Note that not all beach cruiser bike brands have all the different speed switches, so be sure to explore and do your research depending on what you want the types of trips you want to take. Style Personal style plays a big role in any purchasing decision, and it's no different when it comes to beach cruisers. When shopping for a beach cruiser, consider what your taste and style needs. Different types of cruisers come in a variety of colors and patterns, and so when looking for a cruiser bike, explore the different color and style options that there are so you are sure to find one that suits you. You can also consider shopping for cruiser bike accessories to give your bike a more personal feel. Frame metal With beach cruiser, its frames are either composed of steel. Steel frame bikes are typically less expensive because they tend to be heavier and of lower quality compared to aluminum and carry the risk of roasting when it constantly comes into contact with water. Aluminum frames are usually much lighter, not rust, and come with higher quality pieces, therefore they are more expensive to buy than steel frame bikes. With this, it is important to consider your budget when shopping for cruiser bikes. Types of Cruiser Bikes There are a number of different types of cruiser bikes, ranging from beach cruisers, to lowrider single speed bikes, all the way to cruisers that use coaster brakes. The options are endless, take a look. Classic/Beach Cruiser Bike This is the most popular type of cruiser bike yet. This bike has a very simple steel frame design that usually weighs around 50 pounds. The usual tire size is 26 inches, and they come with a standard balloon style deck that provides stability and cushions small bumps along the way. These types of bikes have curved, high handlebars so riders can maneuver without having to bend forward, - thus giving the rider an upright, straight riding position. It is common for these types of bikes to come with fenders, which keep the bike and rider clean when riding through dirt, water, or mud. These usually have beach design and come in a variety of colors. Lowrider Cruiser Bike With the low rider the cruiser, more emphasis is placed on the bike's design and style compared to the classic cruiser. This bike can be very showy and flashy. These types of bikes, as the name suggests, put the rider in a low riding position, much lower to the ground. A person riding this bike sits in a more laid back and relaxed position, as it is ridden more for leisure. Low riders tend to have whitewall tires smaller than the classic 26 inches, oversized cushion seats, and more pronounced fenders on the back and front deck. The designs of these bikes are usually adapted to suit the taste of the owner. Chopper Cruiser Bike Chopper cruiser bike's design is very inspired by chopper-style motorcycles. They have some of the same features prominent in lowrider bike cruisers, such as low riding position and less than 26-inch tires. But they are distinctive in that they also have some features from the helicopter motorcycle. This includes the long, high-mounted monkey handlebar, and a front that extends far in front of the handlebars. The front and rear wheels are usually different sizes from each other, and the drivetrain is usually located forward from the saddle. The chopper bike can be said to be more comfortable than the low rider, but still, this bike is much more suited for show purposes, and for shorter rides. Pricing Cruiser bikes come in at a variety of prices, for your convenience here are the best cruiser bikes categorized in their respective Points. Up to \$200 Huffy Nel Lusso Cruiser Bike From \$200 to \$300 Over \$300 Top Brands For your reference, here are the best cruiser bike manufacturers that we both know and trust. Huffy For those who love the look and feel of vintage-style cruiser bikes, and everything else bikes for that matter, you'd be hard pressed to walk past Huffy. Huffy makes some of the most affordable cruisers, electric, mountain, and road bikes available on the market. Their attention quality, ease of use, and comfort ability make Huffy bikes some of the best manufacturers currently on the market. Sixthreezero When it comes to quality beach and cruiser bikes, Sixthreezero must be your go-to manufacturer. Designed in Tarrance, California, Sixthreezero cruiser bikes are the ultimate comfort and style. Their ergonomically designed, well-positioned handlebars and uniquely low, upright frames make riding these bikes an absolute pleasure to ride. They are a super smooth ride and built to last. If you want to experience the very best bike these guys do, you can't walk past the Sixthreezero Evryjourney cruiser bike or Sixthreezero Around The Block. Firmstrong If you want to experience the ultimate in beach cruiser bikes, Firmstrong is one of the best manufacturers out there. They design and make a wide range of different styles and sizes to suit someone's riding preferences. For the boys, Firmstrong Bruiser Man is a go-to model. And for the ladies, you can't walk past the Firmstrong Urban Lady women's cruiser. Schwinn For a modern and minimalist looking cruiser bike, grab yourself a Schwinn. Schwinn's range of cruise bikes make it the perfect beach, street or commuter bike. Their Mikko 7 model is probably the cream of the crop, with a 7-speed gear range, padded saddle seat, and four colors to choose from, it will be sure to keep any cycling enthusiast happy. Kent Kent bikes are now designed and manufactured by a plant in Clarendon County, South Carolina. They make a huge range of quality mountains, road, and, of course, men's and women's beach cruisers. Their single speed beach cruiser bike, especially the Margaritaville cruiser, is a fantastic option for beachside riding. Our Top Pick As amazing as all these cruiser bikes are, our top pick has got to be the sixth reezero EVRYjourney Women's Cruiser Bike. This vehicle is not only easily cool with its modern design and wide color gamut, it also screams lightness and comfort. With its lightweight aluminum frame that gives you that frivolous feel we all love when we ride and four different speed gears that are all suited for different types of rides, there's no way you won't be able to find the right model for you. A comfortable pillow seat and upright riding position make sure you're not only cozy but you're also in a great riding posture as well. This for you and is all you may want in a beach cruiser.
