## Darth vader dark lord of the sith vol 2

Even as Anakin and Amidala's love develops, there are dark storm clouds gathering. Haunted by her mother's terrible nightmare, Anakin decides to return to her home world of Tatooine to save her mother from a life of bondage. Upon arrival, she met her mother Cliegg's new husband Lars and half-brother Owen Lars. She also learned that her mother had been taken by Sand People. Intending to save her, the brave young Jedi goes in search of his mother. Unfortunately, he learned his mother had been tortured and seriously wounded by the savage Tusken robbers. Dotted with grief, Anakin slaughtered the animals -- every last man, woman, and child. Then Anakin confronts Jedi traitor Count Dooku in the first battle of the Cloning War. Dooku gave it to him and the meeting made Anakin go all the way. Later, when he takes Amidala's hand as his bride in a secret wedding in Naboo, he does so with a cybernetic replacement arm. In the months that followed, Anakin became a legend in the galaxy as he and Obi Wan defeated the advance of the Separatist army. But despite the accolade, Anakin suffered all this time because he was often separated from his wife for months at a time. It was during this time that Anakin grew closer to Chancellor Palpatine. Palpatine began to teach Anakin about the true power of the Force. This closeness, and the contradictory teachings Anakin received from Palpatine, caused a growing rift between Anakin and his master, Obi Wan. In turbulent times when the Republic dissolved to make way for the Palpatine Empire, Anakin finally found his true source of power - anger, fear and hatred. Taking his rightful place on emperor Palpatine's side, Anakin shed his previous identity and loyalty to the Jedi council and took his real name, Darth Vader, Dark Lord of the Sith. Darth Vader is eventually betrayed by his former master, Obi Wan Kenobi -- leading to an epic show between old friends. Despite Vader's power, Obi Wan defeats him, sadly wounding Vader and leaving him to die. It was Vader's anger that kept him alive. Eventually his broken body was recovered through a series of operations. Now equipped with cybernetics and respirator systems, Darth Vader takes the form we all know and love. Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! Digital Trends can earn commissions when you buy through links on our site. The Galaxy is ready to be picked up when you wear the Garmin Legacy Series Darth Vader Special Edition smartwatch. The Sith-inspired watch features a 45mm case, leather and black silicone bands, slate bezels and red and black design elements that include TIE Vader fighters. Working on your galaxy takeover strategy, Darth Vader smartwatches will support you with fitness and health tracking tools, smart notifications, music storage and Garmin Pay nirsenting payments Buy Now The watch fiber reinforced polymer box has a polymer back cover and a stainless steel bezel. The 1.3-inch diameter lens is Corning Gorilla Glass 3, so have to take a beating as you travel the galaxy in search of the errant Jedi, princesses, rebels, and various wrong people. Garmin said the watch is suitable for wrists from 5.3 inches to 7.9 inches in circumference. The 260 x 260 pixel touch screen is a sun-visible transfective MIP (memory in pixels), so you should be able to track your progress, read alerts, and see the time in any lighting conditions short of a leap into hyperspace. Weighing 50.5 grams (1.8 ounces), the watch is rated water in five atmospheres. The battery only lasts up to eight days in smartwatch mode, 18 hours in GPS mode, and six hours in GPS mode with music. Garmin's list of smartwatch encyclopedic features and functions runs the gamut of connectivity, communication, activity tracking, training, and intelligent features. Compatible with iOS and Android smartphones, Darth Vader watches are also connected via Bluetooth, ANT+, and Wi-Fi. The number of sensors alone is remarkable when you consider how little the watch weighs: GPS, GLONASS, Galileo, wrist heart rate monitors, barometric altimeters, compasses, gyroscopes, accelerometers, thermometers, and pulse oximeter sensors. In addition to activity, movement, steps, sleep tracking and exercise monitoring, the watch has feature sets for running, golf, cycling, swimming and more. The special edition Darth Vader is one of the Garmin Legacy Series and Legacy Hero Series smartwatches that also includes special editions for Rey, Captain Marvel, and First Avenger. The \$400 Darth Vader Special Edition smartwatch comes with black silicone tape, charging and data cables, and documentation. If the urge to conquer is unrelenting or if you want a Star Wars-themed smartwatch for family members or yourself, Garmin's Darth Vader Special Edition is a competent and functional tool with a

unique theme. Buy Now We strive to help our readers find the best deals on quality products and services, and we choose what we cover carefully and independently. Editor's Recommendation For any parent whose children are Lego fans it is a constant threat. When one of the bricks or minifigures it embeds itself into the under your bare feet, it releases a special type of pain that is usually reserved for tripping toes, pieces of paper, or shrimp forks to the neck. In this new place promoting the brand's latest Star Wars bits and bob, Jung von Matt's agency suggests that it may not be mistake if you happen to be poking your toes at the lightsaber of the dark lord of the Sith. It coincides with the launch of original content episodes for a collection of Star Wars microfighters - familiar spacecraft and other vehicles in the form of Lego mini-s - that will surely get your kids excited enough to exponentially increase the chances of a midnight confrontation with your own Vader. When it comes to Star Wars, you have to give the Empire credit: they've got style. Shiny, blocky, analog, monochrome style that looks good on everything from the Death Star to the torture droid IT-O interrogators. If you've ever wanted to hack into a piece of TIE Fighter and wear it on your wrist, the Los Angeles-based watch brand Devon has come up with a watch for you. It's called, quite rightly, Devon's Star Wars watch, and it looks like the kind of thing Emperor Palpatine would give the Grand Mof to retire, just before forcing it out of the airlock. A limited edition watch, the Devon Star Wars watch is a mash-up of many of the Empire's design details, including echoes of Darth Vader's helmet and a stand that makes it look exactly like a TIE Fighter. It was also pinned with the Imperial Emblem, and even a watch strap modelled after Lord Vader's Sith gloves. The watch's face, meanwhile, looks designed after the Death Star's control panel, including many funky analog dials, all of which seem to beat to Alderaan's destruction. If you're in the market to watch Star Wars, this certainly beats the cheap Ewoks Swatch you had when you were a kid. However, before you go looking to buy one, says the caveat: at \$28,500, a Devon Star Wars watch costs about as much as a Star Destroyer. You can order one here. Fill about half a cup with chocolate chips and microwave for about 1 minute, pausing after 30 seconds to make it tumultuous. Once melted, I always add a few more chocolate chips, give it a try, and wait for them to completely melt. Put a spoonful of melted chocolate in each mold. Then, hold both sides of the mold and lift it up and down. Shaking the mold will help remove air bubbles. It will also help ensure that all the subtle details of Darth Vader's face will be filled in. Add more chocolate spoon until each mold is full and beat again. My previous speed picture was filled with quite positive responses, so I thought I should make a better :) I hope you enjoyed the video, and left any questions, feedback, and/or responses in the comments section below! I also accept requests, so leave me advice if you want! So far I'm thinking of drawing the Joker Heath Ledger or the original Joker from the comics). S have a great day! Just In Your Mind: Welcome to Just In Your Mind. I just have to try and do Darth Vader's make-up for the movie. It was fun trying to try Make Darth Vader's helmet with my hair. I want to repeat and see if I can make my hair look better, I guess I should add it to my future list. Haha.. I hope you enjoy! Make-up uses Pariadise's face paint in white and black Fab face paint in light and dark grey eye-shadow in blackMusic: intro and outro music by:seffapeffa music by: brickz72 Everyone loves to hate archvillain. In the tech industry, it has been clear for some time now that Microsoft is no longer up to the role - you can't have an archvillian who keeps spouting empty threats - so auditions have been opened for his successor. Could it be Apple? Antennae and restrictive App Store policies make his candidacy plausible. Google? Equivocation on China's problems and flirting with a deal that undermines neutrality shows promise. Facebook? Sure, but it's not goliath technology. Then came the Oracle. By suing Google for its supposed android infringement on Java patents, Oracle has confirmed the worst fears of those who question its stewardship in Java. In one bold stroke, the company has undermined the most promising alternative to the iPhone, accelerating Java's slide into a legacy-hood, and thumbs up its nose in the open source community -- both by enforcing Java patents and, in the growing value of Joker, a deep OpenSolaris on the same day. (MySQL customer, how do you feel right now?) [See Josh Fruhlinger's analysis of Oracle's scorched earth fight to benefit from | Stay up to date with JavaWorld Enterprise Java newsletter. ]Like evil rivals goldman sachs bonus monster round. But does the Oracle in the archvillain role have legs? Outside the tech world, no one hears much about Oracle apart from its acquisitions: PeopleSoft, Siebel, BEA, Sun. Otherwise, Oracle keeps a fairly low profile for a company worth \$113 billion. Messing up android's little-popular consumer game change, especially if the lawsuit drags on for years in the public eye. And much more, starting with the Sun's acquisition and subsequent brutal layoffs. That's part of the pattern: Around Silicon Valley Oracle is known as the Bermuda Triangle predator, devouring all kinds of companies with promising technology and less gentle with their personnel. Throw in combative CEOs, exorbitant software maintenance costs, and hardball corporate culture, and maybe we have a winner? In the end, I think not. Like Microsoft, Oracle dominates software categories that are no longer considered advanced -- except that Oracle's core databases, ERP, and business server applications are even less attractive than desktop software. Who can blame the company for taking stock of its portfolio and finding a way to, for lack of a better word, monetize it (and maybe get a slice of the mobile pie)? We were at an interesting point in the tech industry when the old lion looked visibly new ideas are great but, since the laws of the forest never change, will not shy away from any means necessary to stay on top.
