Play Leader Strike Play Full Screen Leader Strike Leader Strike is a fun first individual shooter with a political bend! The war of the world's pioneers intensifies, and the standard war of words turns into a war of arms! Bring the most beloved government official, for example, Vladimir Putin, Kim Jong Un and, obviously, Donald Trump into battle. Each pioneer has their own special arrangement of weapons and moves, but you can also gather weapons on the floor. When you have chosen your pioneer, you can either make your own amusement room or join a current server. The point of every match is simple. You should however decimate many restricting government officials as it would be prudent and earn the most noteworthy score. Your weapons have limited ammunition, so be sure to painstakingly shoot and gather any new weapons that you find. As you advance, you can use collected focus to review your characters and open new weapons. Could you govern the world and turn into the wildest MP?
