This mod I liked very much and with his help I was able to make my character more expressive. But I ran into a problem. During any action in different light, the eyes of the character are as necessary, with a detailed pupil and iris, but after fights, especially if my character has done someone harm, the textures of the eyes are smeared and as if sometimes elevated. As a result, fiery-orange animals turn eyes into large black pupils with a minimum of protein and thorn. Sometimes they look like a whirlpool of cream in coffee. The most interesting thing is that after saving and rebooting, this problem disappears. What could be the problem and how to solve it, because reboots constantly after every battle — somehow don't want to?! Beaming as the original in the hundred times puts Great mod, thank you! What kind of launcher and where to put it - the one I have in the guide with the game in general fashion not displayed and just the settings of the game or it should be set separately? Tell me, please! Yes... Same one in the folder with SkyrimLauncher if you put modes with esp files (and of course correctly, basically everything is always throwing in the data folder if you ask for a replacement of files then confirm) then make the same launcher/files/and there against the fashion you need (for its activation) brand... it's simple) THAN WHAT TO WRITE IN THE FACE. If you don't see the fashion (the Data Files button is black out) file my documents.ini. Start team (or Windows q r) and introduce a regedit. Looking for HKEY\_LOCAL\_MACHINE/SOFTWARE/Bethesda Softworks/Skyrim/. We find the line installed path. In it, in the Value column, it is probably written, even if it does not match the current location of the game. Therefore, the launcher does not see the files. We change the path to the right one (i.e. point out in the meaning where we have the skyrim game for example D:\Skyrim). 1-20 21-40 41-60 61-80 81-100 101-115 Add to the game updated eye textures, especially heterichromia, for people, argonians, elves, cajits and orke. Brighter unique eyes for Elves available as well as darker ones.- New textures will be added in future release! The Eyes of Beauty offers many new eye textures for player and NPCs. All texture is high resolution and is made for the best result in Skyrim. No other eyes will be so real and unique. THE EYES OF BEAUTYYou are an air of autumn, pale and rose; But all the sea of sadness in my bloodsurges, and ebbing, leaves my lips morose, Salt with the memory of the bitter flood. In vain, your hand slides my faint bosom o'r, What you're looking for, crush, is desecrateBy woman's tooth and talon; Ah, no moreSeek in me for a heart that gave those dogs. It's a devastation where the dragons rest,And tear and glue and glue themselves and kill - a perfume swims across your naked chest! Beauty, loud scourge of spirits, has your way! With flame-like eyes flaring up at bright festivals these tatters spared the animals!
