Characters Epic Seven is a turn-based RPG. You have to put together a group of characters who fight against other players in a real-time arena. The character lines of this game are also very diverse. There are more than 100 characters, 200 monsters, 3 guardians and more than 60 artifacts (to equip characters to activate passive skills). All characters have different speed state (called Combat Readiness) that determine who attacks first. Every character has a character called Souls. This allows for characters who use special skills in battles. Skills can be upgraded in different ways. One minus point is that Epic Seven doesn't have a census system. You won't be able to know what kind of weapon you have. One trick for you is to click on the character, then select their weapons and then click the swap to see the list of interchangeable weapons. It's also the only way to know which items you own. Gameplay Edesing the Epic Seven engine is quite simple, so it won't take long to get used to it. In the team you can select up to 4 characters for combat and defense. During the battle, the character learns his skills for destroying enemies. Basic skills can be used at any time. However, you will have to wait for a certain number of turns to use special skills. When you use these skills, you will gather souls. These souls are needed to summon the stewards on the team. At the bottom of the battle screen you can check the soul bar. Click on the administrator icon to call it up. It helps you battle by harming your enemies. You can equip administrators in group settings. Since this is a turn-based RPG, you should know some of your character's abilities. Using these skills at the right time is the key to winning. In addition, when the level in battle, you will face giant monsters. Win by increasing the strength of the sign. This means strengthening their skills, activating, increasing and equip them with powerful weapons.
